- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year

Attachment 3 - Revenue Credit Workpaper

1 Rent from Electric Property - Transmission Related (Note 3) 1.217.503 (Sum Line 1) 2 Total Rent Revenues 1,217,503

Account 456 - Other Electric Revenues (Note 1)

,	
3 Schedule 1A	\$ 810,951
4 Net revenues associated with Network Integration Transmission Service (NITS) for which	
the load is not included in the divisor (difference between NITS credits from PJM and PJM	
NITS charges paid by Transmission Owner) (Note 4)	-
5 Point to Point Service revenues for which the load is not included in the divisor received by Transmission Owner (Note 4)	1,816,356
6 PJM Transitional Revenue Neutrality (Note 1)	-
7 PJM Transitional Market Expansion (Note 1)	-
8 Professional Services (Note 3)	-
9 Revenues from Directly Assigned Transmission Facility Charges (Note 2)	619,380
10 Rent or Attachment Fees associated with Transmission Facilities (Note 3)	-
11 Gross Revenue Credits (Sum Lines 2-10)	4,464,191
12 Less line 17g	(779,872)

Revenue Adjustment to determine Revenue Credit

13 Total Revenue Credits

Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula

will be included as a revenue credit or included in the peak on line 173 of Appendix A. 15 Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges

are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.

Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1) right-of-way leases and leases for space on transmission facilities for telecommunications; (2) transmission tower licenses for wireless antennas; (3) right-of-way property leases for farming, grazing or nurseries; (4) licenses of intellectual property (including a portable oil degasification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, high-voltage substation maintenance, safety training, transformer oil testing, and circuit breaker testing) to other utilities and large customers (collectively, products). Company will retain 50% of net revenues consistent with Pacific Gas and Electric Company, 90 FERC ¶ 61,314. Note: in order to use lines 17a - 17g, the utility must track in separate subaccounts the revenues and costs associated with each secondary use (except for the cost of the associated income taxes).

	,		
17a	Revenues included in lines 1-11 which are subject to 50/50 sharing.		1,217,503
17b	Costs associated with revenues in line 17a	Attachment 5 - Cost Support	342,240
17c	Net Revenues (17a - 17b)		875,263
17d	50% Share of Net Revenues (17c / 2)		437,631
17e	Costs associated with revenues in line 17a that are included in FERC accounts recovered through the formula times the allocator used to functionalize the amounts in the FERC account to the transmission service at issue.		-
	Net Revenue Credit (17d + 17e)		437,631
17g 18			(779,872)
10	Note 4: If the facilities associated with the revenues are not included in the formula, the revenue is shown here but not included in the total above and is explained in the Cost Support; for example revenues associated with distribution facilities. In addition, Revenues from Schedule 12 are not included in the total above to the extent they are credited under		
	Schedule 12.		2,957,703
19	Amount offset in line 4 above		136,986,863

21 Note 4: SECA revenues booked in Account 447.

20 Total Account 454, 456 and 456.1 146,850,423

Instructions				
Transmission Depreciation Expense is the gross cumulative amount based upon	on tax records of capitalized AFUDC equity embedded in the gross			
plant attributable to the transmission function multiplied by the Capital Recovery				
date of the Settlement in Docket No ER19-5 et al, and at least every five years				
revise its depreciation rates (unless the company has otherwise submitted an F	PA Section 205 rate filing that addresses its depreciation rates in			
the prior five years).				
Capital Recovery Rate is the book depreciation rate applicable to the underlying				
"AFUDC-Equity" category reflects the nondeductible component of depreciation	n expense related to the capitalized equity portion of Allowance for			
Funds Used During Construction (AFUDC).				
Upon enactment of changes in tax law, accumulated deferred income taxes are				
resulting in deficient or (excess) accumulated deferred income taxes (ADIT).				
function will be based upon tax records and calculated in the calendar year in w				
for financial reporting purposes. See Attachment 1B - ADIT Amortization, Colu				
the current year amortization. The current year amortization of deficient and (ex	bess) ADTLIS recorded in PERC Accounts 410.1 and 411.1.

^{*} Primarily represents vehicle and facility cost that are charged to the utilities and included within the clearing account. The cost in the utility clearing accounts get distributed to various FERC accounts during the utility overhead allocation process.

Atlantic City Electric Company

Attachment 6 - Estimate and Reconciliation Worksheet

Step Month Year Exec Summary April Year 2 TO populates the formula with Year 1 data from FERC Form 1 data for Year 1 (e.g., 2004) Year 2 TO estimates all transmission Cap Adds and CWIP for Year 2 weighted based on Months expected to be in service in Year 2 (e.g., 2005) Year 2 TO adds weighted Cap Adds to plant in service in Formula Year 2 Post results of Step 3 on PJM web site Year 2 Results of Step 3 go into effect for the Rate Year 1 (e.g., June 1, 2005 - May 31, 2006) 5 June 6 Year 3 TO populates the formula with Year 2 data from FERC Form 1 for Year 2 (e.g., 2005) Year 3 Reconciliation - TO calculates Reconciliation by removing from Year 2 data - the total Cap Adds placed in service in Year 2 and adding weighted average in Year 2 actual Cap Adds and CWIP in Reconciliation (adjusted to include any Reconciliation amount from prior year) 8 April Year 3 TO estimates Cap Adds and CWIP during Year 3 weighted based on Months expected to be in service in Year 3 (e.g., 2006) Year 3 Reconciliation - TO adds the difference between the Reconciliation in Step 7 and the forecast in Line 5 with interest to the result of Step 7 (this difference is also added to Step 8 in the subsequent year) May Year 3 Post results of Step 9 on PJM web site 11 June Year 3 Results of Step 9 go into effect for the Rate Year 2 (e.g., June 1, 2006 - May 31, 2007) 1 April Year 2 TO populates the formula with Year 1 data from FERC Form 1 data for Year 1 (e.g., 2004) 125.075.638 Rev Reg based on Year 1 data Must run Appendix A to get this number (without inputs in lines 20, 21 or 43a of Appendix A) Year 2 TO estimates all transmission Cap Adds and CWIP for Year 2 weighted based on Months expected to be in service in Year 2 (e.g., 2005)

Input to Line 43a of Appendix A

Month In Service or Month for CWIP

#DIV/0!

#DIV/01

3 April Year 2 TO adds weighted Cap Adds to plant in service in Formula

\$ - Input to Formula Line 21

4 May Year 2 Post results of Step 3 on PJM web site

125,075,638 Must run Appendix A to get this number (with inputs on lines 21 and 43a of Attachment A)

5 June Year 2 Results of Step 3 go into effect for the Rate Year 1 (e.g., June 1, 2005 - May 31, 2006)

\$ 125,075,638

6 April Year 3 TO populates the formula with Year 2 data from FERC Form 1 for Year 2 (e.g., 2005)

159,527,055 Rev Req based on Prior Year data

Must run Appendix A to get this number (without inputs in lines 20, 21 or 43a of Appendix A)

75,147,816

7 April Year 3 Reconcilitation - TO calculates Reconcilitation by removing from Year 2 data - the total Cap Adds placed in service in Year 2 and adding weighted average in Year 2 actual Cap Adds and CWIP in Reconcilitation (adjusted to include any Reconcilitation amount from prior year)

Remove all Cap Adds placed in service in Year 2

For Reconciliation only - remove actual New Transmission Plant Additions for Year 2

\$ 153,615,737 Input to Formula Line 20

Add weighted Cap Adds actually placed in service in Year 2

Attachment 6E – Delmarva Formula Rate Update Filing

May 14, 2021

Ms. Kimberly D. Bose Secretary Federal Energy Regulatory Commission 888 First Street, N.E. Room 1A Washington, DC 20426

Re: Delmarva Power & Light Company ("Delmarva"), Docket No. ER09-1158

Informational Filing of 2021 Formula Rate Annual Update;

Notice of Annual Update

Dear Ms. Bose,

Delmarva hereby submits electronically, for informational purposes, its 2021 Annual Formula Rate Update. On November 3, 2015, the Commission approved an uncontested settlement agreement ("Settlement") filed in Docket Nos. EL13-48, *et al.*¹ Formula Rate implementation protocols contained in the Settlement provide that:

[o]n or before May 15 of each year, Delmarva [Delmarva Power & Light Company] shall recalculate its Annual Transmission Revenue Requirements, producing an "Annual Update" for the upcoming Rate Year, and:

- (i) cause such Annual Update to be posted at a publicly accessible location on PJM's internet website;
- (ii) cause notice of such posting to be provided to PJM's membership; and
- (iii) file such Annual Update with the FERC as an informational filing.²

The same information contained in this informational filing has been transmitted to PJM for posting on its website as required by the Formula Rate implementation protocols. Thus, all interested parties should have ample notice of and access to the Annual Update. The protocols provide specific procedures for notice, review, exchanges of information and potential challenges to aspects of the Annual Update. Consequently, and as the Commission has concluded, there is no need for the Commission to notice this informational filing for comment. ³

² See Settlement, Exhibit A containing PJM Tariff Attachment H3-E, Section 2.b.

¹ Baltimore Gas and Electric Company, et al., 153 FERC ¶ 61,140 (2015).

³ See Letter Order Re: Annual Update to Formula Rate in Docket No. ER09-1158 (February 17, 2010).

Delmarva's 2021 Annual Update contains no expenses or costs that have been alleged or judged in any administrative or judicial proceeding to be illegal, duplicative, or unnecessary costs that are demonstrably the product of discriminatory employment practices, as defined in 18 C.F.R. § 35.13(b)(7).

In addition, Delmarva provides notification regarding accounting changes made in 2020. Delmarva did not implement any new accounting guidance or accounting policies that impacted transmission formula rates. Delmarva did make certain reclassifications between FERC accounts for certain IT software upgrade and compliance costs as well as specific distribution-related scopes of work. Additionally, Delmarva notes that it utilized the COVID-19-related AFUDC waiver issued by FERC in Docket No. AC20-127-000.

Other accounting changes as defined in the Settlement are discussed in applicable disclosure statements filed within the Securities and Exchange Commission Form 10-K and/or within the FERC Form No. 1. Delmarva has made no change to Other Post-Employment Benefits ("OPEB") charges that exceed the filing threshold set forth in the Protocols.⁴

Thank you for your attention to this informational filing. Please direct any questions to the undersigned.

Very truly yours,

/s/ Amy L. Blauman

Amy L. Blauman

Enclosures

cc: All parties on Service Lists in Docket Nos. ER05-515, EL13-48 and EL15-27.

⁴ See Settlement, Exhibit A containing PJM Tariff Attachment H3-E, Section 2.h.

- Electric portion only
- Electric portion only

 Exclude Construction Work in Progress and leases that are expensed as O&M (rather than amortized). New Transmission plant
 that is expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service. New Transmission plant expected
 to be placed in service in the current calendar year that is not included in the PJM Regional Transmission Plan (RTEP) detailed on Attachments 9 or 9A.
 For the Reconciliation, new transmission plant that was actually placed in service weighted by the number of months it was actually in service

 CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive).
- Transmission Portion Only
- All EPRI Annual Membership Dues

- All EPAI Annual Membership Dues
 All Regulatory Commission Expenses
 Safety related advertising included in Account 930.1
 Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized in Form 1 at 351.h.
 The currently effective income tax rate, where FT is the Federal income tax rate, service FT is the Federal income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of each state and how the blended or composite SIT was developed.
- The ROE is 10.5% which includes a base ROE of 10.0% ROE per FERC order in Docket No. EL13-48 and a 50 basis point RTO membership adder as authorized by FERC: provided, that the projects
- Education and outreach expenses relating to transmission, for example sitting or billing
 As provided for in Section 34.1 of the PJM OATT and the PJM established billing determinants will not be revised or updated in the annual rate reconciliations per settlement in ER05-515.

- As provided for in Section 34.1 of the PJM OAT1 and the PJM established billing determinants will not be revised or updated in the annual rate reconciliations per Amount of transmission plant excluded from rates per Attachment 5.

 Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Customers who have made lump-sum payments (net of accumulated depreciation) towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A. Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmission Owner whole on Line 155.

 Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 are included in Transmission O&M.
- 0
- If they are booked to Acct 565, they are included in on line 64
- Securitization bonds may be included in the capital structure per settlement in ER05-515.

 ACE capital structure is initially fixed at 50% common equity and 50% debt per settlement in ER05-515 subject to moratorium provisions in the settlement.

 Per the settlement in ER05-515, the facility credits of \$15,000 per month paid to Vineland will increase to \$37,500 per month (prorated for partial months) effective on the date FERC approves the settlement in ER05-515.

- enective on the date FERC approves the settlement in ENUS-315.

 See Attachment 5 Cost Support, section entitled "PBOP Expense in FERC Account 926" for additional information per FERC orders in Docket Nos. EL13-48, EL15-27 and ER16-456.

 See Attachment 5 Cost Support, section entitled "Other Income Tax Adjustment" for additional information.

 A utility that elected to use amortization of tax credits against staxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.1) multiplied by (1/1-T). A utility must not include tax credits as a reduction to rate base and as an amortization against taxable income.
- The Accumulated Deferred Income Tax (ADIT) balances in Accounts 190, 281, 282, and 283 are measured using the enacted tax rate that is expected to apply when the underlying temporary differences are expected to be settled or realized. To preserve rate base neutrality, theses balances appropriately exclude ADIT amounts associated with income tax related regulatory assets and liabilities. The balances in Accounts 190, 281, 282 and 283 are adjusted in accordance with Treasury regulation Section 1.167(i)-(fh)(6) and averaged in accordance with IRC Section 1808(i)9(ii) in the calculations of rate base in the projected revenue requirement and in the true-up adjustment. Differences attributable to over-projection of ADIT in the projected revenue requirement will result in a proportionate reversal of the projected prorated ADIT activity by 50 percent of the difference between the projected month is projected review, when projected month is adjustment to the projected prorated ADIT activity is 40 percent of the difference between the projected month is activity. However, when projected month is an activity and the actual monthly ADIT activity is a decrease, 50 percent of actual monthly ADIT activity is a foreign and actual monthly ADIT activity is a machine actual month is actual mo
- These balances represent the unamortized federal and state deficient / (excess) deferred income taxes. To preserve rate base neutrality and consistent with the exclusion of ADIT amounts associated with income tax-related regulatory assets and liabilities as described in Note V, regulatory assets and liabilities of deficient and excess ADIT are reflected without tax gross-up. For the Annual Update (Projected) filing, see Attachment 10 ADIT Rate Base Adjustment, Column F for inputs. For the Annual Update (True-Up) filing, See Attachment 10 ADIT Rate Base Adjustment, Column F for inputs.
- Long Term Debt balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 18.c & d to 21.c & d in the Form No. 1. The balances for January through
- Preferred Stock balance will reflect the 13 month average of the balances, or which the 1st and 13th are found on page 112 line 3.c. & d in the Form No. 1. The balances for January through November shall represent the actual balances in DPL's books and records (trial balance or monthly balance sheet).

 Preferred Stock balance will reflect the 13 month average of the balances, or which the 1st and 13th are found on page 112 line 3.c. & d in the Form No. 1. The balances for January through November shall represent the actual balances in DPL's books and records (trial balance or monthly balance sheet).
- Common Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 16.c & d in the Form No. 1. The balances for January through November shall represent the actual balances in DPL's books and records (trial balance or monthly balance sheet).
- AA Only the transmission portion of amounts reported at Form 1, page 227, line 5 is used. The transmission portion of line 5 is specified in a footnote to the Form 1, page 227.

Delmarva Power & Light Company Accumulated Deferred Income Taxes (ADIT) - Transmission Allocated Attachment 1A - ADIT Summary

Rate Year = Projected for the 12 Months Ended December 31, 2021

1. For purposes of calculating transmission allocated projected activity, use Columns (F), (G), and (H) and set the "Rate Year" below to "Projected Activity". For purposes of calculating the "True-Up" adjustment, use Columns (I), (J), (K), (L), and (M) and set the "Rate Year" below to "True-Up Adjustment".

Rate Year Projected Activity

2. For the Annual Update (Projected) filing, see Attachment 1A - ADIT Summary, Column H for inputs. For the Annual Update (True-Up) filing, See Attachment 1A - ADIT Summary, Column M for inputs.

Notes

- A The computations on this workpaper apply the proration rules of Reg. Sec. 1.167(i)-1(h)(6) to the annual activity of accumulated deferred income taxes subject to the normalization requirements. Activity related to the portions of the account balances not subject to the proration requirement are averaged instead of prorated. For accumulated deferred income taxes subject to the normalization requirements, activity for months prior to the future portion of the test period is averaged rather than prorated. This section is used to prorate the projected ADIT belance.
- B The balances in Accounts 190, 281, 282 and 283 are adjusted in accordance with Treasury regulation Section 1.167(l)-1(h)(6) and averaged in accordance with IRC Section 168(l)(9)(B) in the calculations of rate base in the projected revenue requirement will result in a proportionate reversal of the projected prorated ADIT activity in the true-up adjustment to the extent of the over-projection. Of ADIT in the projected revenue requirement will result in a proportionate reversal of the projected prorated ADIT activity in a disconnection of ADIT in the projected revenue requirement will result in an adjustment to the projected prorated ADIT activity in adjustment to the projected prorated ADIT activity in adjustment to the projected prorated ADIT activity in adjustment to the projected provated ADIT activity in a decrease. So percent of the actual monthly ADIT activity will be used. This section is used to calculate ADIT activity in the true-up adjustment only.
- c Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (amount of projected activity) that did not occur) and a positive in Column J represents under-projection (activity) over projected activity), if projected and actual activity are both negative, a negative in Column J represents under-projection (accused activity) over projected activity) over projected activity over projected activity over projected activity) are both negative, a negative in Column J represents under-projection (accused activity) and a positive activity over projected activity) are both negative, a negative in Column J represents under-projection (activity) and activity) are both negative, a negative in Column J represents under-projection (activity) and activity) are both negative, a negative in Column J represents under-projection (activity) and activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are both negative, an egative in Column J represents under-projection (activity) are projected activity are both negative, and a
- Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter Column G x [Column Il Column F]. If Column J is under-projected, enter the amount from Column G and complete Column L). In other situations, enter zero.
- E Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from Column J. In other situations, enter zero.
- F IRS normalization adjustment for timing when accelerated tax depreciation should affect rate base.

Delmarva Power & Light Company Accumulated Deferred Income Taxes (ADIT) Attachment 1B - ADIT Worksheet - End of Year

				December 31, 2021 (Projected)		
Line	ADIT (Not Subject to Proration)	Total	Gas, Production, Distribution, or Other Related	Only Transmission Related	Plant Related	Labor Related
1 2 3 4 5	ADIT-190 ADIT-281 ADIT-282 ADIT-283 ADIT-255	15,049,671 - (162,007,470) (7,155,411) (480,978)			14,459,139 - (162,007,470) (1,780,547) (480,978)	590,532 - - (4,912,106)
6	Subtotal - Transmission ADIT	(154,594,188)		- (462,758)	(149,809,856)	(4,321,574)

Note: ADIT associated with Gain or Loss on Reacquired Debt included in ADIT-283, Column A is excluded from rate base and instead included in Cost of Debt on Attachment H-3D, Line 111. A deferred tax (liability) should be reported as a positive balance and a deferred tax asset should be reported as a negative balance on Attachment H-3D, Line 111. The ADIT balance is based on the 13 month average.

(1.468.465)

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B - F and each separate ADIT item will be listed, dissimilar items with amounts exceeding \$100,000 will be listed separately.

Line	Description	Total				

(1,468,465) Note: ADIT associated with Gain or Loss on Reacquired Debt included in ADIT-283, Column A is excluded from rate base and instead included in Cost of Debt on Attachment H-3D, Line 111. A deferred tax (liability) should be reported as a positive balance and a deferred tax asset should be reported as a negative balance on Attachment H-3D, Line 111. The ADIT balance is based on the 13 month average.

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B - F and each separate ADIT item will be listed, dissimilar items with amounts exceeding \$100,000 will be listed separately.

7 ADIT (Reacquired Debt)

(A)	(B)	(C) Gas, Production,	(D) Only	(E)	(F)	(G)
ADIT-190 (Not Subject to Proration)	Total	Distribution, or Other Related	Transmission Related	Plant Related	Labor Related	Justification
Accrued Benefits	1,298,894	181,845	-	-		ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are
Accrued Bonuses & Incentives	2,368,297	331,562	-	-	2,036,736	recoverable in the transmission formula. ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are
Accrued Environmental Liability	250 461	250 461				recoverable in the transmission formula. ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued Liability - Legal	17.322	17.322	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula. ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued OPEB	4.965.280	695.139				FAS No. 106 requires accrual basis instead of cash basis accounting for post retirement health care and life
	,,,,,,	,			, <u></u>	insurance benefits for book purposes. These amounts are removed from rate base below.
Accrued Other Expenses	3.156.517	3.156.517		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued Payroll Taxes - AIP	166,081	23,251	-	-		ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Retention	(0)	(0)		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued Severance	25,095	3,513	-		21,582	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Vacation	439,208	439,208	-	-	-	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Worker's Compensation	1,416,978	198,377	-	-	1,218,601	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Allowance for Doubtful Accounts	8.372.832	8.372.832		-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Asset Retirement Obligation	4.371.483	4.371.483		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Deferred Compensation	21.784	21.784	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Deferred Revenue	3.247.612	3.247.612		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Merrill Creek Liability	(0)	(0)	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Other Deferred Credits	339,382	339,382	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Purchased Power	3,708,022	3,708,022	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Regulatory Liability	2,588,611	2,588,611	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Sales & Use Tax Reserve	296.364	296.364	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
State Income Taxes	(52.118)	(52.118)	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
State Net Operating Loss Carryforward	49,098,991	9,570,525	-	39,528,466		The state net operating loss carry-forward, net of federal taxes, is included to the extent attributable to plant in service that is included in rate base.
Unamortized Investment Tax Credit	468,877	65,643	-	403,235		Pursuant to the requirements of ASC 740, ACE's accumulated deferred income taxes must encompass all timing differences regardless of whether the difference is normalized or flowed-through. These balances represent the deferred taxes of unamortized ITC. These amounts are removed from rate base below.
Other 190	13.532	13.532	-	-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
FAS 109 Regulatory Liability Gross Up	111,905,727	11,190,573	-	100,715,154	-	Accumulated Deferred Income Taxes attributable to income tax related regulatory assets and liabilities. This balance is excluded from rate base and removed below.
Charitable Contribution Carryforward	-	-		-	-	
Meraer Commitments	-	-	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.

1. For purposes of calculating transmission allocated projected activity, use Columns (F), (G), and (H) and set the "Rate Year" below to "Projected Activity". For purposet the "Rate Year" below to "True-Up Adjustment". ses of calculating the "True-Up" adjustment, use Columns (I), (J), (K), (L), and (M) and

2. For the Annual Update (Projected) filing, see Attachment 1A - ADIT Summary, Column H for inputs. For the Annual Update (True-Up) filing, See Attachment 1A - ADIT Summary, Column M for inputs.

- A This section is used to calculate the projected deficient / (secess) ADIT balances. The computations in columns A-H of this windpaper apply the proation rises of Reg. Sec. 1.167()-(h)(iii) to the projected annual activity of deficient / (secess) accumulated defined riccome bases subject to the remaination requirements. Activity related to the portion of the accurant balances not subject to the promotion requirement are averaged instead of prorated. For deficient / (secess) accumulated defined riccome bases subject to the remaination requirement, projected activity for mortion of the base profit of secess places to the remaination requirement, projected activity for mortion of the base profit of section profit has provided activity for mortion of the base profit of section of the base profit of section profit has provided activity for mortion of the base profit of section file that provided activity for mortion of the base profit of section file that provided activity for mortion of the base profit of section file that provided activity for mortion of the base profit of section file that provided activity for mortion of the base profit of section file that provided activity for mortion of the base profit of section file that provided activity for mortion of the base profit of section file that provided activity for mortion of the base profit of section file that provided activity for mortion of the base profit of the base profit of the base profit of the base profit of the profit of the base profit of the b

- Column (I) preserves prosition when actual monthly and pojocated monthly actively are either both increases or decreases. Specifically, if Column (I) is over-projected, enter Column (G) x [Column (I) is Column (I) in over-projected, enter Column (G) x [Column (I) in column (I) in c

Instructions

- 1. For transmission allocated deficient / (excess) deferred income taxes related to rate changes occurring after September 30, 2018, insert new amortization table that delineate the deficient and excess deferred taxes by protected property, unprotected property, and unprotected non-property by ADIT category.
- 2. Set the amortization period for unprotected property to 5 years and unprotected non-property to 4 years. The amortization of deficient and (excess) ADIT designated as protected will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements.
- 3. Update applicable formulas in the "Total Federal Deficient / (Excess) Deferred Income Taxes" and "Total State Deficient / (Excess) Deferred Income Taxes" sections to ensure appropriate inclusion of deficient / (excess) ADIT deferred income taxes related to rate changes occurring after September 30, 2018.
- 4. Insert note explaining the event giving rise to the deficient / (excess) ADIT including the start and end date for the amortization. The amortization ceases after the related regulatory asset / liability is drawn down to zero.

Notes

- A Deficient and (excess) ADIT related to the Tax Cuts and Jobs Act of 2017 (TCJA) will be amortized beginning January 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments, tax return amendments, or new IRS guidance. The amortization of protected property related deficient and (excess) ADIT will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected property related excess) ADIT will be fully amortized by December 31, 2022. The unprotected non-property related excess and deficient ADIT will be fully amortized by December 31, 2021. Note The amortization formula in Column F will change based on where DPL resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- B The remaining unamortized excess and deficient ADIT related to the Tax Reform Act of 1986 will be amortized using the Average Rate Assumption Method (ARAM) as provided in the Settlement in Docket No. ER19-5 et al. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.

24	Difference	(0)		

Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they will not be included
- B Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they will not be included
- C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year

Revenue Adjustment to determine Revenue Credit

KNOWING ADJUSTMENT AND VERSIONS OF THE PROPERTY OF THE PROPERT

16 Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated reverues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.

17 Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1) gifty-d-way leases and leases for space on transmission hotilizes for telecommunications; (2) transmission tweet leases for telecommunications; (2) transmission aments for telecommunications; (3) transmission aments for telecommunications; (4) transmission aments for telecommunications; (4

the cost of the associated income taxee).

18a Revenues included in lines 1-11 which are subject to 50/50 sharing.

18b Costa associated with revenues in line 1 8a

18c Net Revenues (18a - 18b)

18d 50% Share ONe Revenues (18b - 12)

18e Costa associated with revenues in line 1 7a that are included in FERC accounts recovered through the formula times the allicitator used to functionalize the amounts in the FFRC account to the transmission service at issue.

18f Net Revenue Credit (18d - 18e)

19g Line 16f lies line 18a

19 Note 4. If the collisies associated with the revenues are not included in the formula, the revenue is shown here but not included in the total above and is explained in the Cost Support for example revenues associated with distribution facilities. In addition, Revenues from Schedule 12 are not included in the total above to the extent they are credited under Schedule 12.

21 Total Account 454, 456 and 456.1 22 Note 4: SECA revenues booked in Account 447.

В

7		(A)	(B)	(C)
8		PJM Billed Revenue Received	True-up	Annual (net of true-ups)
9	Jan-May (Year 1)			
10	June-Dec (Year 1)	43,728,486	(9,138,068)	52,866,554
11				52,866,554
12	TO calculates Reconcillation Revenues for Year 1 (e.g. 2018) by populating template with Year	1 actuals.		
13	Jan-Dec (Year 1)	168,406,299		56,289,229

Notes:

For each project or Attachment H-3D, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H-3D will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H-3D and any Projects paid by the RTO to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line S below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6B. Column (I) adds the interest on the sum of Col. (G), (H), and (I).

Prior Period Adjustment is he mount of an adjustment to correct an error in a prior period. The adjustment will include a gross-up for income tax purposes, as appropriate. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.

 B Recovery of abundoned plant is limited to any abundoned plant recovery authorized by FERC C
 Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance inclusion in rate base; and (iii) a demonstration that AVIDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits do not contain entries for APIDC for each CWIP project in rate base; and (iii) above will show that morthly debts and credits for no contain entries for APIDC for each CWIP project in rate base; (ii) the CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits for no contain entries for APIDC for each CWIP project rate that the commission of the year balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits for one of the year balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits for one of the year balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits for other will be zero until the Commission of the year balances.

 E Unamortized Abandoned Plant and Amortization of Abandoned Plant the Commission of the year balances are for the calcular year the revenue under this formula begin the control of the year balance are for the calcular year the revenue under this formula begi

- Electric portion only
- Electric portion only

 Exclude Construction Work in Progress and leases that are expensed as O&M (rather than amortized). New Transmission plant
 that is expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service. New Transmission plant expected
 to be placed in service in the current calendar year that is not included in the PJM Regional Transmission Plan (RTEP) detailed on Attachments 9 or 9A.
 For the Reconciliation, new transmission plant that was actually placed in service weighted by the number of months it was actually in service

 CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive).
- Transmission Portion Only
- All EPRI Annual Membership Dues

- All EPAI Annual Membership Dues
 All Regulatory Commission Expenses
 Safety related advertising included in Account 930.1
 Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized in Form 1 at 351.h.
 The currently effective income tax rate, where FT is the Federal income tax rate, service FT is the Federal income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of each state and how the blended or composite SIT was developed.
- The ROE is 10.5% which includes a base ROE of 10.0% ROE per FERC order in Docket No. EL13-48 and a 50 basis point RTO membership adder as authorized by FERC: provided, that the projects
- Education and outreach expenses relating to transmission, for example sitting or billing
 As provided for in Section 34.1 of the PJM OATT and the PJM established billing determinants will not be revised or updated in the annual rate reconciliations per settlement in ER05-515.

- As provided for in Section 34.1 of the PJM OAT1 and the PJM established billing determinants will not be revised or updated in the annual rate reconciliations per Amount of transmission plant excluded from rates per Attachment 5.

 Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Customers who have made lump-sum payments (net of accumulated depreciation) towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A. Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmission Owner whole on Line 155.

 Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 are included in Transmission O&M.
- 0
- If they are booked to Acct 565, they are included in on line 64
- Securitization bonds may be included in the capital structure per settlement in ER05-515.

 ACE capital structure is initially fixed at 50% common equity and 50% debt per settlement in ER05-515 subject to moratorium provisions in the settlement.

 Per the settlement in ER05-515, the facility credits of \$15,000 per month paid to Vineland will increase to \$37,500 per month (prorated for partial months) effective on the date FERC approves the settlement in ER05-515.

- enective on the date FERC approves the settlement in ENUS-315.

 See Attachment 5 Cost Support, section entitled "PBOP Expense in FERC Account 926" for additional information per FERC orders in Docket Nos. EL13-48, EL15-27 and ER16-456.

 See Attachment 5 Cost Support, section entitled "Other Income Tax Adjustment" for additional information.

 A utility that elected to use amortization of tax credits against staxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.1) multiplied by (1/1-T). A utility must not include tax credits as a reduction to rate base and as an amortization against taxable income.
- The Accumulated Deferred Income Tax (ADIT) balances in Accounts 190, 281, 282, and 283 are measured using the enacted tax rate that is expected to apply when the underlying temporary differences are expected to be settled or realized. To preserve rate base neutrality, theses balances appropriately exclude ADIT amounts associated with income tax related regulatory assets and liabilities. The balances in Accounts 190, 281, 282 and 283 are adjusted in accordance with Treasury regulation Section 1.167(i)-(fh)(6) and averaged in accordance with IRC Section 1808(i)(9)(8) in the calculations of rate base in the projected revenue requirement and in the true-up adjustment. Differences attributable to over-projection of ADIT in the projected revenue requirement will result in a proportionate reversal of the projected prorated ADIT activity by 50 percent of the difference between the projected provided with the projected provided monthly ADIT activity is a facrosase, 50 percent of the difference between the projected monthly activity. However, when projected monthly ADIT activity is a decrease, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is a decrease and actual monthly ADIT activity is a facrosase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is a facrosase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of
- These balances represent the unamortized federal and state deficient / (excess) deferred income taxes. To preserve rate base neutrality and consistent with the exclusion of ADIT amounts associated with income tax-related regulatory assets and liabilities as described in Note V, regulatory assets and liabilities of deficient and excess ADIT are reflected without tax gross-up. For the Annual Update (Projected) filing, see Attachment 10 ADIT Rate Base Adjustment, Column F for inputs. For the Annual Update (True-Up) filing, See Attachment 10 ADIT Rate Base Adjustment, Column F for inputs.
- Long Term Debt balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 18.c & d to 21.c & d in the Form No. 1. The balances for January through
- Preferred Stock balance will reflect the 13 month average of the balances, or which the 1st and 13th are found on page 112 line 3.c. & d in the Form No. 1. The balances for January through November shall represent the actual balances in DPL's books and records (trial balance or monthly balance sheet).

 Preferred Stock balance will reflect the 13 month average of the balances, or which the 1st and 13th are found on page 112 line 3.c. & d in the Form No. 1. The balances for January through November shall represent the actual balances in DPL's books and records (trial balance or monthly balance sheet).
- Common Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 16.c & d in the Form No. 1. The balances for January through November shall represent the actual balances in DPL's books and records (trial balance or monthly balance sheet).
- AA Only the transmission portion of amounts reported at Form 1, page 227, line 5 is used. The transmission portion of line 5 is specified in a footnote to the Form 1, page 227.

Delmarva Power & Light Company Accumulated Deferred Income Taxes (ADIT) - Transmission Allocated Attachment 1A - ADIT Summary

Rate Year = Actual for the 12 Months Ended December 31, 2020

Instructions

Rate Year Pro

ected Activity

Check

2. For the Annual Update (Projected) filing, see Attachment 1A - ADIT Summary, Column H for inputs. For the Annual Update (True-Up) filing, See Attachment 1A - ADIT Summary, Column M for inputs.

Notes

- A The computations on this workpaper apply the proration rules of Reg. Sec. 1.167(i)-1(h)(6) to the annual activity of accumulated deferred income taxes subject to the normalization requirements. Activity related to the portions of the account behances not subject to the proration requirement are averaged instead of prorated. For accumulated deferred income taxes subject to the normalization requirements, activity for months prior to the future portion of the test period is averaged rather than prorated. This section is used to prorate the projected ADIT behances.
- B The balances in Accounts 180, 281, 282 and 283 are adjusted in accordance with Treasury regulation Section 1.157(n)-10)(g) and everaged in accordance with RC Section 168(0)(s)(g) in the calculations of risk base in the projected revenue requirement and in the true-up adjustment. Differences attributable to over-projection of ADIT in the projected evenue requirement will result in a proportionate reversal of the projected provinced ADIT activity in the true-up and the projected provinced ADIT activity is a few and a section of the actual monthly activity. However, when projected monthly ADIT activity is a few and actual monthly activity. However, when projected monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is a few and actual monthly ADIT activity is the true-up adjustment only.
- c Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (amount of projected activity). Had tidd not occur) and a positive in Column J represents under-projection (accuses a databal activity) ear both negative, a negative in Column J represents under-projection (accuses and activity) are both negative, a negative in Column J represents under-projection (accuses and activity) ear projection (accused activity) are both negative, and activity are both negative, and a
- D Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter Column G x [Column WColumn F]. If Column J is under-projected, enter the amount from Column G and complete Column L). In other situations, enter zero.
- E Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from Column J. In other situations, enter
- IRS normalization adjustment for timing when accelerated tax depreciation should affect rate base.

Delmarva Power & Light Company Accumulated Deferred Income Taxes (ADIT) Attachment 1B - ADIT Worksheet - End of Year

				December 31, 2020(Actual)		
Line	ADIT (Not Subject to Proration)	Total	Gas, Production, Distribution, or Other Related	Only Transmission Related	Plant Related	Labor Related
1	ADIT-190	15,849,112			15,258,580	590,532
2	ADIT-281	· · · · · · · · · · · · · · · · · · ·			and the second second	
3	ADIT-282	(160,426,408)			(160,426,408)	
4	ADIT-283	(7,296,113)		(462,758)	(1,811,373)	(5,021,982)
5	ADITC-255	(587,418)		-	(587,418)	-
6	Subtotal - Transmission ADIT	(152,460,827)		(462,758)	(147,566,619)	(4,431,450)

Note: ADIT associated with Gain or Loss on Reacquired Debt included in ADIT-283, Column A is excluded from rate base and instead included in Cost of Debt on Attachment H-3D, Line 111. A deferred tax (liability) should be reported as a positive balance and a deferred tax asset should be reported as a negative balance on Attachment H-3D, Line 111. The ADIT balance is based on the 13 month average.

(1.468.465)

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B - F and each separate ADIT item will be listed, dissimilar items with amounts exceeding \$100,000 will be listed separately.

Description

ADIT (Reacquired Debt)

(A)	(B)	(C) Gas, Production, Distribution, or	(D) Only Transmission	(E) Plant	(F) Labor	(G)
ADIT-190 (Not Subject to Proration)	Total	Other Related	Related	Related	Related	Justification
Accrued Benefits	1,298,894	181,845	-	•	1,117,049	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Bonuses & Incentives	2,368,297	331,562	-		2,036,736	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Environmental Liability	250.461	250,461				ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued Liability - Legal	17.322	17.322				ADIT excluded because the directiving account(s) are not recoverable in the transmission formula.
Accrued OPEB	4,965,280	695,139	-	-	4,270,141	FAS No. 106 requires accrual basis instead of cash basis accounting for post retirement health care and life insurance benefits for book purposes. These amounts are removed from rate base below.
Accrued Other Expenses	3.156.517	3.156.517				ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued Payroll Taxes - AIP	166,081	23,251	-	-	142,830	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Retention	(0)	(0)			(0)	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued Severance	25,095	3,513	-	-		ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Vacation	439,208	439,208				ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Worker's Compensation	1,416,978	198,377	-	-	1,218,601	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Allowance for Doubtful Accounts	8.372.832	8.372.832			-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Asset Retirement Obligation	4,371,483	4,371,483				ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Deferred Compensation	21,784	21,784				ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Deferred Revenue	3,247,612	3,247,612		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Merrill Creek Liability	(0)	(0)		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Other Deferred Credits	339,382	339,382		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Purchased Power	3.708.022	3.708.022		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Regulatory Liability	2,588,611	2,588,611		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Sales & Use Tax Reserve	296.364	296.364		-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
State Income Taxes	(52,118)	(52,118)	-	•		Federal Taxes on state income taxes
State Net Operating Loss Carryforward	49,098,991	9,570,525	-	39,528,466		The state net operating loss carry-forward, net of federal taxes, is included to the extent attributable to plant in service that is included in rate base.
Unamortized Investment Tax Credit	468,877	65,643		403,235		Pursuant to the requirements of ASC 740, ACE's accumulated deferred income taxes must encompass all timing differences regardless of whether the difference is normalized or flowed-through. These balances represent the deferred taxes of unamortized ITC. These amounts are removed from rate base below.
Other 190	13.532	13,532			-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
FAS 109 Regulatory Liability Gross Up	111,905,727	11,190,573	-	100,715,154		Accumulated Deferred Income Taxes attributable to income tax related regulatory assets and liabilities. This balance is excluded from rate base and removed below.
Charitable Contribution Carryforward	-	-				ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.

 ADIT (Reacquired Debt)
 (1,514,439)

Note: ADIT associated with Gain or Loss on Reacquired Debt included in ADIT-283, Column A is excluded from rate base and instead included in Cost of Debt on Attachment H-3D, Line 111. A deferred tax (liability) should be reported as a positive balance and a deferred tax asset should be reported as a negative balance on Attachment H-3D, Line 111. The ADIT balance is based on the 13 month average.

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B - F and each separate ADIT item will be listed, dissimilar items with amounts exceeding \$100,000 will be listed separately.

(A)	(B)	(C) Gas. Production.	(D) Only	(E)	(F)	(G)
ADIT-190 (Not Subject to Proration)	Total	Distribution, or Other Related	Transmission Related	Plant Related	Labor Related	Justification
Accrued Benefits	1,191,472	166,806	-	-	1,024,666	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Bonuses & Incentives	1,848,763	258,827	-	-	1,589,937	ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Environmental Liability	263.074	263.074	-	-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued OPEB	5,314,223	743,991	-	-	4,570,232	FAS No. 106 requires accrual basis instead of cash basis accounting for post retirement health care and life insurance benefits for book purposes. These amounts are removed from rate base below.
Accrued Other Expenses	2.172.308	2.172.308		-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued Payroll Taxes - AIP	101,692	14,237	-	-		ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Accrued Vacation	1,318,753	1,318,753	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Accrued Worker's Compensation	1,207,349	169,029	-	-		ADIT relates to all functions and attributable to underlying operating and maintenance expenses that are recoverable in the transmission formula.
Allowance for Doubtful Accounts	4.053.793	4.053.793	-	-		ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Asset Retirement Obligation	3.911.011	3.911.011	-	-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Deferred Compensation	8.625	8.625	-	-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Merger Commitments	402.764	402.764		-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Purchased Power	3,482,238	3,482,238	-	-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Regulatory Liability	(4,081,789)	(4,081,789)	-	-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
Sales & Use Tax Reserve	290,452	290,452	-	-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
State Net Operating Loss Carryforward	44,149,043	9,075,531	=	35,073,513	•	The state net operating loss carry-forward, net of federal taxes, is included to the extent attributable to plant in service that is included in rate base.
Unamortized Investment Tax Credit	555,445	77,762	-	477,683	-	Pursuant to the requirements of ASC 740, ACE's accumulated deferred income taxes must encompass all siming differences regardless of whether the difference is normalized or flowed-through. These balances represent the deferred taxes of unamortized ITC. These amounts are removed from rate base below.
Other 190	(49.741)	(49.741)	-	-	-	ADIT excluded because the underlying account(s) are not recoverable in the transmission formula.
FAS 109 Regulatory Liability Gross Up	131,954,446	13,195,445	-	118,759,001	-	Accumulated Deferred Income Taxes attributable to income tax related regulatory assets and liabilities. This balance is excluded from rate base and removed below.

1. For purposes of calculating transmission allocated projected activity, use Columns (F), (G), and (H) and set the "Rate Year" below to "Projected Activity". For purposet the "Rate Year" below to "True-Up Adjustment". ses of calculating the "True-Up" adjustment, use Columns (I), (J), (K), (L), and (M) and

2. For the Annual Update (Projected) filing, see Attachment 1A - ADIT Summary, Column H for inputs. For the Annual Update (True-Up) filing, See Attachment 1A - ADIT Summary, Column M for inputs.

- A This section is used to calculate the projected deficient / (secess) ADIT balances. The computations in columns A-H of this windpaper apply the proation rises of Reg. Sec. 1.167()-(h)(iii) to the projected annual activity of deficient / (secess) accumulated defined riccome bases subject to the remaination requirements. Activity related to the portion of the accurant balances not subject to the promotion requirement are averaged instead of prorated. For deficient / (secess) accumulated defined riccome bases subject to the remaination requirement, projected activity for mortion of the base profit of second profit balances.

- Column (I) preserves prosition when actual monthly and pojocated monthly actively are either both increases or decreases. Specifically, if Column (I) is over-projected, enter Column (G) x [Column (I) is Column (I) in over-projected, enter Column (G) x [Column (I) in column (I) in c

Instructions

- 1. For transmission allocated deficient / (excess) deferred income taxes related to rate changes occurring after September 30, 2018, insert new amortization table that delineate the deficient and excess deferred taxes by protected property, unprotected property, and unprotected non-property by ADIT category.
- 2. Set the amortization period for unprotected property to 5 years and unprotected non-property to 4 years. The amortization of deficient and (excess) ADIT designated as protected will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements.
- 3. Update applicable formulas in the "Total Federal Deficient / (Excess) Deferred Income Taxes" and "Total State Deficient / (Excess) Deferred Income Taxes" sections to ensure appropriate inclusion of deficient / (excess) ADIT deferred income taxes related to rate changes occurring after September 30, 2018.
- 4. Insert note explaining the event giving rise to the deficient / (excess) ADIT including the start and end date for the amortization. The amortization ceases after the related regulatory asset / liability is drawn down to zero.

Notes

- A Deficient and (excess) ADIT related to the Tax Cuts and Jobs Act of 2017 (TCJA) will be amortized beginning January 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments, tax return amendments, or new IRS guidance. The amortization of protected property related deficient and (excess) ADIT will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected property related excess) ADIT will be fully amortized by December 31, 2022. The unprotected non-property related excess and deficient ADIT will be fully amortized by December 31, 2021. Note The amortization formula in Column F will change based on where DPL resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- B The remaining unamortized excess and deficient ADIT related to the Tax Reform Act of 1986 will be amortized using the Average Rate Assumption Method (ARAM) as provided in the Settlement in Docket No. ER19-5 et al. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.

Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they will not be included
- B Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they will not be included
- C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year

Revenue Adjustment to determine Revenue Credit

KNOWING ADJUSTMENT AND VERSIONS OF THE PROPERTY OF THE PROPERT

16 Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated reverues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.

17 Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1) gifty-d-way leases and leases for space on transmission hotilizes for telecommunications; (2) transmission tweet leases for telecommunications; (2) transmission maintenance and consulting services (including energized circuit maintenance, high-violage substation maintenance, safety training, transformer oil testing, and circuit beset testing) to their utilises and talge customers (collectively, produces). Company will retain 50% of not reversues consistent with Pacific Cass and Electric Company, 50 FERC § 10.14. Nater on other use lines 18st 18st gift, but stilly must state, but the cost of the associated income taxes.)

the cost of the associated income taxee).

18a Revenues included in lines 1-11 which are subject to 50/50 sharing.

18b Costa associated with revenues in line 1 8a

18c Net Revenues (18a - 18b)

18d 50% Share ONe Revenues (18b - 12)

18e Costa associated with revenues in line 1 7a that are included in FERC accounts recovered through the formula times the allicitator used to functionalize the amounts in the FFRC account to the transmission service at issue.

18f Net Revenue Credit (18d - 18e)

19g Line 16f lies line 18a

19 Note 4. If the collisies associated with the revenues are not included in the formula, the revenue is shown here but not included in the total above and is explained in the Cost Support for example revenues associated with distribution facilities. In addition, Revenues from Schedule 12 are not included in the total above to the extent they are credited under Schedule 12.

21 Total Account 454, 456 and 456.1 22 Note 4: SECA revenues booked in Account 447.

4	Total Annual Revenue Requirements (Note A)		-	-	-	-	-		#DIV/0!	#DIV/0!

- Note:
 1) From Attachment 6, line 17, col. 13 for the projection for the Rate Year.
 2) From Attachment 6, line 17, col. 13 for that project based on the actual cases for the Rate Year.
 2) From Attachment 6, line 17, col. 13 for that project based on the actual cases for the Rate Year.
 2) From Attachment 6, line 17, col. 13 for that project based on the project actual cases for the Rate Year.
 2) From Attachment 6, line 17, col. 13 for that project based on the project of the Rate Year.
 2) From Attachment 6, line 17, col. 13 for that project based on the project of the Project of Not Rate Year.
 2) Column E, lines 3 are the dollar amounts of Revenue Received from the project of the Project of Not Revenue Requirement in Column C.
 2) Column D, lines 3 are sourced from the project of evenue requirement for the year at issue.
 4) Interest from Attachment 6.
 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

6	TO calculates NITS revenues, net of true-ups, received in calendar Year 1 (e.g., 2018)			

(A) P.JM Billed Revenue Received Annual (net of true-ups) Jan-May (Year 1) June-Dec (Year 1) 12 TO calculates Reconcillation Revenues for Year 1 (e.g. 2018) by populating template with Year 1 actuals.

Notes: Α

В

For each project or Attachment H-3D, the utility will populate the formula rate with the inputs for the Trus-Up Year. The revenue requirements, based on actual operating results for the Trus-Up Year, associated with the projects and Attachment H-3D will then be entered in Col. (P) above. Column (E) above contains the actual revenues received associated with Attachment H-3D and any Projects paid by the RTO to the utility during the Trus-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (P) to calculate the Trus-Up Algustreent. The Prior Period Adjustment from Line S below is input in Col. (H). Column (I) as the applicable interest rate from Attachment 6B. Column (I) adds the interest on the sum of Col. (G), (H), and (I).

Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The adjustment will include a gross-up for income tax purposes, as appropriate. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.

Monthly Interest Rate Interest Income (Expense)

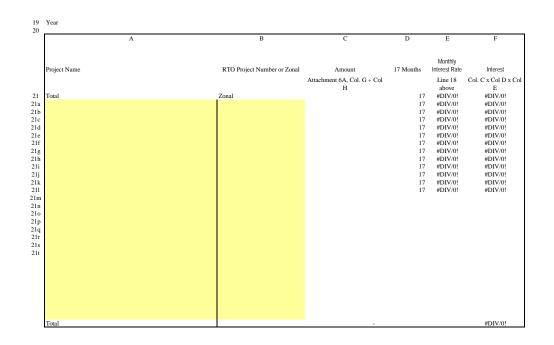

Attachment 6B True-Up Interest Rate Delmarva Power & Light Company

[A]

Note A:

(1) The FERC Quarterly Interest Rate in column [A] is the interest applicable to the Month indicated.

- Notes:
 A Recovery of regulatory asset or any associated amortization expenses is limited to any regulatory assets authorized by FERC.
 B Recovery of abundoned plant is limited to any abundoned plant recovery authorized by FERC C
 Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance inclusion in rate base; and (iii) a demonstration that AVIDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits do not contain entries for APIDC for each CWIP project in rate base; and (iii) above will show that morthly debts and credits for no contain entries for APIDC for each CWIP project in rate base; (ii) the CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits for no contain entries for APIDC for each CWIP project rate the base. The annual report will recommiss in (iii) above will show that morthly debts and credits for no contain entries for APIDC for each CWIP project rate the base; and (iii) a demonstration to a contain entries for APIDC for each CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits for one APIDC for each CWIP project and the CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that morthly debts and credits for one APIDC for each CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will also contain entries for APIDC for each CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will also contain entries fo

- Electric portion only
- A Electric portion only

 B Exclude Construction Work In Progress and leases that are expensed as O&M (rather than amortized). New Transmission plant
 - that is expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service. New Transmission plant expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service. New Transmission plant expected to be placed in service in the current calendar year that is not included in the PJM Regional Transmission Plan (RTEP) must be separately detailed on Attachment 5.

For the Reconciliation, new transmission plant that was actually placed in service weighted by the number of months it was actually in service CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive).

- C Transmission Portion Only
 D All EPRI Annual Membership Dues

- All Regulatory Commission Expenses
 Safety related advertising included in Account 930.1
 Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized in Form 1 at 351.h.
- The currently effective income tax rate, where FTT is the Federal income tax rate; STT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of each state and how the blended or composite SIT was developed.
- J The ROE is 10.5% which includes a base ROE of 10.0% ROE per FERC order in Docket No. EL13-48 and a 50 basis point RTO membership adder as authorized by FERC: provided, that the projects identified in Docket Nos. ER08-686 and ER08-1423 have been awarded an additional 150 basis point adder and, thus, their ROE is 12.0%.
- K Education and outreach expenses relating to transmission, for example siting or billing
- As provided for in Section 34.1 of the PJM OATT and the PJM established billing determinants will not be revised or updated in the annual rate reconciliations per settlement in ER05-515. Amount of transmission plant excluded from rates per Attachment 5.
- N Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Customers who have made lump-sum payments (net of accumulated depreciation) towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A.

 Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmission Owner whole on Line 155.

 O Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 are included in Transmission O&M.
- If they are booked to Acct 565, they are included in on line 64 Securitization bonds may be included in the capital structure per settlement in ER05-515.
- Q ACE capital structure is initially fixed at 50% common equity and 50% debt per settlement in ER05-515 subject to moratorium provisions in the settlement.
 R Per the settlement in ER05-515, the facility credits of \$15,000 per month paid to Vineland will increase to \$37,500 per month (prorated for partial months) effective on the date FERC approves the settlement in ER05-515.
- See Attachment 5 Cost Support, section entitled "90Per Tax Adjustment" for additional information per FERC orders in Docket Nos. EL13-48 , EL15-27 and ER16-456.

 To See Attachment 5 Cost Support, section entitled "90ther Income Tax Adjustment" for additional information.

Delmarva Power & Light Company Accumulated Deferred Income Taxes (ADIT) Attachment 1A - Accumulated Deferred Income Taxes (ADIT) Worksheet

Line	ADIT	Total	Gas, Production, Distribution, or Other Related	Only Transmission Related	Plant Related	Labor Related

Instructions

- 1. For transmission allocated deficient / (excess) accumulated deferred income taxes (ADIT) related to rate change(s) to income tax rates occurring after September 30, 2018, insert new amortization table(s) that delineates the deficient and (excess) ADIT by category (i.e., protected property, unprotected property, and unprotected non-property).
- 2. Set the amortization period for unprotected property to 5 years and unprotected non-property to 4 years. The amortization of deficient and (excess) ADIT designated as protected will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements.
- 3. Update applicable formulas in the "Total Federal Deficient / (Excess) Deferred Income Taxes" and "Total State Deficient / (Excess) Deferred Income Taxes" sections to ensure appropriate inclusion of deficient / (excess) ADIT balances related to rate changes occurring after September 30, 2018.
- 4. Insert note explaining the event giving rise to the deficient / (excess) ADIT including the start and end date for the amortization. The amortization ceases after the related regulatory asset / liability is drawn down to zero.

Notes

- A Deficient and (excess) ADIT related to the Tax Cuts and Jobs Act of 2017 (TCJA) will be amortized beginning January 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments, amendments to income tax returns, or new IRS guidance. The amortization of protected property related deficient and (excess) ADIT will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected property related deficient and (excess) ADIT will be fully amortized by December 31, 2022. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by December 31, 2021. Note The amortization formula in Column F will change based on where DPL resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- B The remaining unamortized deficient and (excess) ADIT related to the Tax Reform Act of 1986 will be amortized using the Average Rate Assumption Method (ARAM) as provided in the Settlement in Docket No. ER19-5 et al. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.

Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they will not be included
- B Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they will not be included
- C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above
- Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year

Revenue Adjustment to determine Revenue Credit

20 Total Account 454, 456 and 456,1

21 Note 4: SECA revenues booked in Account 447.

- 14 Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula will be included as a revenue credit or included in the peak on line 173 of Appendix A.
- 15 Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.
- Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1) right-of-way leases and leases for space on transmission facilities for telecommunications; (2) transmission tower licenses for wireless antennas; (3) right-of-way property leases for farming, grazing or nurseries; (4) licenses of intellectual property (including a portable oil degasification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, high-voltage substation maintenance, safety training, transformer oil testing, and circuit breaker testing) to other utilities and large customers (collectively, products). Company will retain 50% of net revenues consistent with Pacific Gas and Electric Company, 90 FERC ¶ 61,314. Note: in order to use lines 17a 17g, the utility must track in separate subaccounts the revenues and costs associated with each secondary use (except for the cost of the associated income taxes).

17a Revenues included in lines 1-11 which are subject to 50/50 sharing.	1,210,187

J	BOP Expense in FERC 926						
	Attachment A Line #s, Descriptions, Notes, Form 1 Page #s	s and Instructions	Total A&G Form 1 Amount	Account 926 Form 1 Amount	PBOP in FERC 926 current rate year		Explanation of change in PBOP in FERC V25
	68 Total A&G	Total: p.323.197.b Account 926: p.323.187.b and c	96,541,540	9,307,960	(837,816)	(302,032)	The actuarisity determined amount of OPEB exposes in ERPC 924 decreased 9.05 million from the prior year. The decrease was mainly due to fiscretable asset robusts which serve 14.49% in 2020 compared to the expected return of 6.7%. Returns in 2019 were unfavorable at 4.46% compared to the expected return of 6.7%. Further, interest rates decreased from 4.27% in 2019 to 12.7% in 2020. The impact of the decreases in the discount rate decreases interest cost and increases service cost; however, the discrease in interest cost more than offset the increase in service cost.

^{*} Primarily represents vehicle and facility cost that are charged to the utilities and included within the clearing account. The cost in the utility clearing accounts get distributed to various FERC accounts during the utility overhead allocation process.

Attachment 6 - Estimate and Reconciliation Worksheet

Step	Month	Year	Action
Exec	Summary		
1	April	Year 2	TO populates the formula with Year 1 data from FERC Form 1 data for Year 1 (e.g., 2004)
2	April	Year 2	TO estimates all transmission Cap Adds and CWIP for Year 2 weighted based on Months expected to be in service in Year 2 (e.g., 2005)
3	April	Year 2	TO adds weighted Cap Adds to plant in service in Formula
4	May	Year 2	Post results of Step 3 on PJM web site
5	June	Year 2	Results of Step 3 go into effect for the Rate Year 1 (e.g., June 1, 2005 - May 31, 2006)
6	April	Year 3	TO populates the formula with Year 2 data from FERC Form 1 for Year 2 (e.g., 2005)
7	April	Year 3	Reconciliation - TO calculates Reconciliation by removing from Year 2 data - the total Cap Adds placed in service in Year 2 and adding weighted average in Year 2 actual Cap Adds and CWIP in Reconciliation
			(adjusted to include any Reconciliation amount from prior year)
8	April	Year 3	TO estimates Cap Adds and CWIP during Year 3 weighted based on Months expected to be in service in Year 3 (e.g., 2006)
9	April	Year 3	Reconciliation - TO adds the difference between the Reconciliation in Step 7 and the forecast in Line 5 with interest to the result of Step 7 (this difference is also added to Step 8 in the subsequent year)
10	May	Year 3	Post results of Step 9 on PJM web site
11	June	Year 3	Results of Step 9 go into effect for the Rate Year 2 (e.g., June 1, 2006 - May 31, 2007)
1	April	Year 2	TO populates the formula with Year 1 data from FERC Form 1 data for Year 1 (e.g., 2004)

7 April Year 3 Reconciliation - TO calculates Reconciliation by removing from Year 2 data - the total Cap Adds placed in service in Year 2 and adding weighted average in Year 2 actual Cap Adds and CWIP in Reconciliation (adjusted to include any Reconciliation amount from prior year)

Remove all Cap Adds placed in service in Year 2

For Reconciliation only - remove actual New Transmission Plant Additions for Year 2

\$ 79,228,430 Input to Formula Line 20

Add weighted Cap Adds actually placed in service in Year 2

Attachment 6F – PEPCO Formula Rate Update Filing

May 14, 2021 An Exelon Company

Ms. Kimberly D. Bose, Secretary Federal Energy Regulatory Commission 888 First Street, N.E. Room 1A Washington, DC 20426

Re: Potomac Electric Power Company ("Pepco"), Docket No. ER09-1159 Informational Filing of 2020 Formula Rate Annual Update;

Notice of Annual Meeting

Dear Ms. Bose,

Pepco hereby submits electronically, for informational purposes, its 2021 Annual Formula Rate Update. The Formula Rate implementation protocols in effect¹ provide that:

On an annual basis, Pepco shall calculate its Annual Transmission Revenue Requirements ("ATTR"). For each Annual Update, Pepco shall:

- (i) cause such Annual Update to be posted at a publicly accessible location on PJM's internet website;
- (ii) cause notice of such posting to be provided to PJM's membership; and
- (iii) file such Annual Update with the FERC as an informational filing.²

The same information contained in this informational filing has been transmitted to PJM for posting on its website as required by the Formula Rate implementation protocols. Thus, all interested parties should have ample notice of and access to the Annual Update. The protocols provide specific procedures for notice, review, exchanges of information and potential challenges to aspects of the Annual Update. Consequently, and as the Commission has concluded, there is no need for the Commission to notice this informational filing for comment.³

Pepco's 2021 Annual Update contains no expenses or costs that have been alleged or judged in any administrative or judicial proceeding to be illegal, duplicative, or unnecessary costs that are demonstrably the product of discriminatory employment practices, as defined in 18

¹ On April 30, 2020, a motion for interim rate relief granted in Docket No. ER19-1475-003 placed into effect the revised Formula Rate Template and Protocols filed pursuant to an April 24, 2020 Offer of Settlement (Settlement). *See* Potomac Electric Power Company, 171 FERC ¶ 63,016 (2020).

² See Formula Rate Protocols, PJM Tariff Attachment H9-B, Section 2.c.

³ See Letter Order Re: Annual Update to Formula Rate in Docket No. ER09-1159 (February 17, 2010).

C.F.R. § 35.13(b)(7).

In addition, Pepco provides notification regarding accounting changes made in 2020. Pepco did not implement any new accounting guidance or accounting policies that impacted transmission formula rates. Pepco did make certain reclassifications between FERC accounts for certain IT software upgrade and compliance costs as well as specific distribution-related scopes of work.

Other accounting changes as defined in the Settlement are discussed in applicable disclosure statements filed within the Securities and Exchange Commission Form 10-K and/or within the FERC Form No. 1. Pepco has made no change to Other Post-Employment Benefits ("OPEB") charges that exceed the filing threshold set forth in the Protocols.⁴

Thank you for your attention to this informational filing. Please direct any questions to the undersigned.

Very truly yours,

/s/ Amy L. Blauman

Amy L. Blauman

Enclosures

cc:

All parties on Service Lists in Docket Nos. ER05-515, EL13-48 and EL15-27 and ER19-1475.

- Electric portion only
- Electric portion only

 Exclude Construction Work in Progress and leases that are expensed as O&M (rather than amortized). New Transmission plant
 that is expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service. New Transmission plant expected
 to be placed in service in the current calendar year that is not included in the PJM Regional Transmission Plan (RTEP) detailed on Attachments 9 or 9A.
 For the Reconciliation, new transmission plant that was actually placed in service weighted by the number of months it was actually in service
 CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive).
- Transmission Portion Only
- All EPRI Annual Membership Dues

- All EPAI Annual Membership Dues
 All Regulatory Commission Expenses
 Safety related advertising included in Account 930.1
 Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized in Form 1 at 351.h.
 The currently effective income tax rate, where FT is the Federal income tax rate, service FT is the Federal income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of each state and how the blended or composite SIT was developed.
- The ROE is 10.5% which includes a base ROE of 10.0% ROE per FERC order in Docket No. EL13-48 and a 50 basis point RTO membership adder as authorized by FERC: provided, that the projects
- Education and outreach expenses relating to transmission, for example sitting or billing
 As provided for in Section 34.1 of the PJM OATT and the PJM established billing determinants will not be revised or updated in the annual rate reconciliations per settlement in ER05-515.
- As provided for in Section 34.1 of the PJM OAT1 and the PJM established billing determinants will not be revised or updated in the annual rate reconciliations per Amount of transmission plant excluded from rates per Attachment 5.

 Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Customers who have made lump-sum payments (net of accumulated depreciation) towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A. Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmission Owner whole on Line 155.

 Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 are included in Transmission O&M.
- 0 If they are booked to Acct 565, they are included in on line 64

- Securitization bonds may be included in the capital structure per settlement in ER05-515.

 Pepco capital structure is derived from gross debt.

 Per the settlement in ER05-515, the facility credits of \$15,000 per month paid to Vineland will increase to \$37,500 per month (prorated for partial months)
- effective on the date FERC approves the settlement in ER05-515.

 See Attachment 5 Cost Support, section entitled "PBOP Expense in FERC Account 926" for additional information per FERC orders in Docket Nos. EL13-48, EL15-27 and ER16-456. s

- See Attachment 5 Cost Support, section entitled "Other Income Tax Adjustment" for additional information.

 Potomac Electric Power Company elected to amortize investment tax credits against recoverable income tax expense, rather than to reduce rate base by unamortized investment tax credit. Amortization reduces income tax expense and reduces the revenue requirement by the amount of the Investment Tax Credit Amortization (Form 1, 266.8.1) multiplied by (1/1-T).

 The Accumulated Deferred Income Tax (ADIT) balances in Accounts 190, 281, 282, and 283 are measured using the enacted tax rate that is expected to apply when the underlying temporary differences are expected to be settled or realized. To preserve rate base neutrality, theses balances appropriately exclude ADIT amounts associated with income tax related regulatory assets and liabilities. The balances in Accounts 190, 281, 282 and 283 are adjusted in accordance with TRC Section 188(in(9)(B) in the calculations of rate base in the projected revenue requirement and in the true-up adjustment. Differences attributable to over-projection of ADIT in the projected revenue requirement will result in a proportionate reversal of the projected prorated ADIT activity in the use-up adjustment to the ever-projection. Differences attributable to over-projection of ADIT in the projected revenue requirement will result in an adjustment to the projected prorated ADIT activity is a decrease, 50 percent of the difference between the projected monthly activity and the actual monthly ADIT activity is a decrease, 50 percent of actual monthly ADIT activity is a decrease, 50 percent of the actual monthly ADIT activity is a decrease, 50 percent of other actual monthly ADIT activity is a decrease, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is a decrease, 50 percent of actual monthly ADIT activity is an increase, 50 percent of actual monthly ADIT activity is an incre
- These balances represent the unamoritized federal and state deficient / (excess) deferred income taxes. To preserve rate base neutrality and consistent with the exclusion of ADIT amounts associated with income tax-related regulatory assets and liabilities as described in Note V, regulatory assets and liabilities for deficient and excess ADIT are reflected without tax gross-up. For the Annual Update (Projected) filing, see Attachment 1D ADIT Rate Base Adjustment, Column F for inputs. For the Annual Update (True-Up) filing, See Attachment 1D ADIT Rate Base Adjustment, Column F for inputs.
- X Long Term Debt balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 18.c & d in the Form No. 1. The balances for January through November shall represent the actual balances in Pepco's books and records (trial balance or monthly balance sheet).

 Y Preferred Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 line 3.c & d in the Form No. 1. The balances for January through November
- shall represent the actual balances in Pepco's books and records (trial balance or monthly balance sheet).
- Common Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 16.c & d in the Form No. 1. The balances for January through November shall represent the actual balances in Pepco's books and records (trial balance or monthly balance sheet).
 AA Only the transmission portion of amounts reported at Form 1, page 227, line 5 is used. The transmission portion is derived by applying the wages and salary allocator to the total of line 5 and is specified in

Potomac Electric Power Company Accumulated Deferred Income Taxes (ADIT) - Transmission Allocated Attachment 1A - ADIT Summary

Rate Year = Projected for the 12 Months Ended December 31, 2021

In atrusation

1. For purposes of calculating transmission allocated projected activity, use Columns (F), (G), and (H) and set the "Rate Year' below to "Projected Activity". For purposes of calculating the "True-Up" adjustment, use Columns (I), (J), (K), (L), and (M) and set the "Rate Year' below to "True-Up" Adjustment".

Rate Year Projected

ected Activity

Check

2. For the Annual Update (Projected) filing, see Attachment 1A - ADIT Summary, Column H for inputs. For the Annual Update (True-Up) filing, See Attachment 1A - ADIT Summary, Column M for inputs.

Notes

- A The computations on this workpaper apply the proration rules of Reg. Sec. 1.167(i)-1(h)(6) to the annual activity of accumulated deferred income taxes subject to the normalization requirements. Activity related to the portions of the account balances not subject to the proration requirement are averaged instead of prorated. For accumulated deferred income taxes subject to the normalization requirements, activity for months prior to the future portion of the test period is averaged rather than prorated. This section is used to prorate the projected ADTb balance.
- B The balances in Accounts 180, 281, 282 and 283 are adjusted in accordance with Treasury regulation Section 1.157(n)-10)(g) and everaged in accordance with RC Section 168(0)(s)(g) in the calculations of risk base in the projected revenue requirement and in the true-up adjustment. Differences attributable to over-projection of ADIT in the projected evenue requirement will result in a proportionate reversal of the projected provinced ADIT activity in the true-up adjustment. Differences attributable to over-projection or ADIT activity is a recommendation of the projected provinced ADIT activity is a recommendation of the projected provinced and activity is an activity and activity and activity and activity is an activity and activity activity and activity and activity activity activity activity and activity and activity activity activity activity activity activity acti
- c Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (amount of projected activity). Had tidd not occur) and a positive in Column J represents under-projection (accuses a databal activity) ear both negative, a negative in Column J represents under-projection (accuses and activity) are point activity) and a positive in Column J represents under-projection (accuses and activity) ear position (activity) and a positive in Column J represents over-projection (accused activity) that did not occur.
- D Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter Column G x [Column VColumn F]. If Column J is under-projected, enter the amount from Column G and complete Column L). In other situations, enter zero.
- E Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from Column J. In other situations, enter
- IRS normalization adjustment for timing when accelerated tax depreciation should affect rate base.

Potomac Electric Power Company Accumulated Deferred Income Taxes (ADIT) Attachment 1B - ADIT Worksheet - End of Year

				December 31, 2021 (Projected)		
Line	ADIT (Not Subject to Proration)	Total	Gas, Production, Distribution, or Other Related	Only Transmission Related	Plant Related	Labor Related

6	Subtotal - Transmission ADIT	(147,775,165)		1,169,395	(142,404,466)	(6,540,094)
Line	Description	Total				

Note: ADIT associated with Gain or Loss on Reacquired Debt included in ADIT-283, Column A is excluded from rate base and instead included in Cost of Debt on Attachment H-9A, Line 111. A deferred tax (liability) should be reported as a positive balance and a deferred tax asset should be reported as a negative balance on Attachment H-9A, Line 111.

(3,046,798)

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B - F and each separate ADIT item will be listed, dissimilar items with amounts exceeding \$100,000 will be listed separately.

1. For purposes of calculating transmission allocated projected activity, use Columns (F), (G), and (H) and set the "Rate Year" below to "Projected Activity". For purpose the "Rate Year" below to "True-Up Adjustment". ses of calculating the "True-Up" adjustment, use Columns (I), (J), (K), (L), and (M) and

2. For the Annual Update (Projected) filing, see Attachment 1A - ADIT Summary, Column H for inputs. For the Annual Update (True-Up) filing, See Attachment 1A - ADIT Summary, Column M for inputs.

- A This section is used to calculate the projected deficient / (secess) ADIT balances. The computations in columns A-H of this windpaper apply the proation rises of Reg. Sec. 1.167()-(h)(iii) to the projected annual activity of deficient / (secess) accumulated defined riccome bases subject to the remaination requirements. Activity related to the portion of the accurant balances not subject to the promotion requirement are averaged instead of prorated. For deficient / (secess) accumulated defined riccome bases subject to the remaination requirement, projected activity for mortion of the base protein sequirement are averaged instead of prorated. For deficient / (secess) accumulated defined riccome bases subject to the remaination requirement, projected activity for mortion of the base protein sequirement are averaged instead of provided.

- Column (I) preserves prosition when actual monthly and projected monthly actively are either both increases or decreases. Specifically, if Column (I) is over-projected, enter Column (IC) is Column (II). In other situations, enter area.

 Column (I) applies when (I) Column (I) is under-projected AND (I2) actual monthly and projected monthly actively are either both increases or decreases. Enter the amount from Column (IJ). In other situations, enter area.

Instructions

- 1. For transmission allocated deficient / (excess) deferred income taxes related to rate changes occurring after September 30, 2018, insert new amortization table that delineate the deficient and excess deferred taxes by protected property, unprotected property, and unprotected non-property by ADIT category.
- 2. Set the amortization period for unprotected property to 5 years and unprotected non-property to 4 years. The amortization of deficient and (excess) ADIT designated as protected will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements.
- 3. Update applicable formulas in the "Total Federal Deficient / (Excess) Deferred Income Taxes" and "Total State Deficient / (Excess) Deferred Income Taxes" sections to ensure appropriate inclusion of deficient / (excess) ADIT deferred income taxes related to rate changes occurring after September 30, 2018.
- 4. Insert note explaining the event giving rise to the deficient / (excess) ADIT including the start and end date for the amortization. The amortization ceases after the related regulatory asset / liability is drawn down to zero.

Notes

- A Deficient and (excess) ADIT related to the Tax Cuts and Jobs Act of 2017 (TCJA) will be amortized beginning January 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, belances and categorizations may be changed if required by audit adjustments, tax return amendments, or new IRS guidance. The amortization of protected property related deficient and (excess) ADIT will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected property related deficient and (excess) ADIT will be fully amortized by December 31, 2022. The unprotected non-property related excess and deficient ADIT will be fully amortized by December 31, 2021. Note The amortization formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- B The remaining unamortized excess and deficient ADIT related to the Tax Reform Act of 1986 will be amortized using the Average Rate Assumption Method (ARAM) as provided in the Settlement in Docket No. ER19-5 et al. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Maryland 2018 "Apportionment Weighting Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by September 30, 2022. The unamortized in formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- D The remaining unamortized deficient and (excess) ADIT related to the Washington, D.C. 2018 "Apportionment Weighting Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) state related ADIT including related amortization is reported net of federal taxes. Note The amortization formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1
- The remaining unamortized deficient and (excess) ADIT related to the Washington, D.C. 2017 "Corporate Rate Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unamortized deficient and (excess) state related ADIT including related amortization is reported net of federal taxes. Note The amortization formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Washington, D.C. 2016 "Corporate Rate Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by September 30, 2022. Note The amortization formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Washington, D.C. 2015 "Corporate Rate Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected anon-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) state related ADIT including related amortization is reported net of federal taxes. Note The amortization formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- H The remaining unamortized deficient and (excess) ADIT related to the Maryland 2007 "Corporate Rate Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADIT mill be fully amortized by September 30, 2022. The unprotected deficient and (excess) approval except formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.

27 Difference Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they will not be included
- Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they will not be included

0

- C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year

Allocation of Property taxes to Transmission Function Year Ended December 31, 2020

Revenue Adjustment to determine Revenue Credit

15

Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for teleswhere in this Attachment or elsewhere in the formula will be included as a revenue credit or included in the peak on line 173 of Appendix A.

16 Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.

17 Note 3. Retermining treatment for the following specified secondary uses of transmission assets:

(1) right-of-way leases and leases for space on transmission facilities for telecommunications;

(2) transmission tower licenses for wireless antenses, (3) right-of-way proporty leases for farming, grazing or nutreties; (4) licenses of intellectual property including a portable oil degastification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, light-oiting substitution maintenance, substitution and consulting services (including energized circuit maintenance) and circuit between the consultance of the con

	Revenues included in lines 1-11 which are subject to 50/50 sharing.		\$ 11,861,79
18b	Costs associated with revenues in line 18a	Attachment 5 - Cost Support	\$ 3,268,75
18c	Net Revenues (18a - 18b)		8,593,03
18d	50% Share of Net Revenues (18c / 2)		4,296,51
18e	Costs associated with revenues in line 17a that are included in FERC accounts recovered through the formula times the allocator used to functionalize the amounts in the FERC account to the transmission service at issue.		
18f	Net Revenue Credit (18d + 18e)		4,296,518
18g	Line 18f less line 18a		(7,565,272
19	Note 4. If the facilities associated with the revenues are not included in the formula, the revenue is shown here but not included in the total above and is explained in the Cost Support, for example revenues associated with distribution facilities. In addition, Revenues from Schedule 12 are not included in the total above to the extent they are credited under Schedule 12.		75,023,026
20	Amount offset in line 4 above		171.907.84

21 Total Account 454, 456 and 456.1
22 Note 4: SECA revenues booked in Account 447.

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
 Inclusive of any CWIP or mamoritized abandoned plant included in rate base when authorized by FERC order less any perfunded AFIDC, if applicable.
 Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value is line 1. This value includes whosequent capital investments required to maintain the facilities to their original capabilities.
 Project Nor Plant is the Project Gross Plant is the total capital investments required to maintain the facilities to their original capabilities.
 Project Nor Plant is the control capital investments required to maintain the facilities to their original capabilities.
 Project Nor Plant is the Project Gross Plant in the Project Cross Plant Indicated in the same excludes any regulatory suct, which are to externed as a separate line item.
 Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment II, page 3, line 14. Project Depreciation Expense includes the amoritation of Abandoned Plant The Nor Re Req is the value to be used in the rate calculation under the applicable Schodule under the PBM ONTT for each project.
 The Nor Re Req is the value to be used in the rate calculation under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodul

Notes:

1) From Attachment 6, line 17, col. 13 for the projection for the Rate Year.

2) From Attachment 6, line 17, col. 13 for that project based on the actual costs for the Rate Year.

2) From Attachment 6, line 17, col. 13 for that project based on the actual costs for the Rate Year.

3) The 'Revenue Received' on line 2, Col. (E), is the total amount of revenue distributed to company in the year as shown on pages 328-330 of the Form No 1. The Revenue Received is input on line 2, Col. Excludes any True-Up revenues. Column E, lines as are the dollar amounts of Revenue Received effecting the 'sim Column E. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Net Revenue Requirement in Column C. Instance

Prior Period Adjustments

	, and the second			
6	TO calculates NITS revenues, net of true-ups, received in calendar Year 1 (e.g., 2018)			
7		(A)	(B)	(C)
8		P IM Billed Revenue Received	True-un	Annual (net of true-ups)

12 TO calculates Reconciliation Revenues for Year 1 (e.g. 2018) by populating template with Year 1 actuals.

13 Jan-Dec (Year 1) 174,504,469 174,504,469

For each project or Attachment H-9A, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H-9A will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H-9A and any Projects paid by the RTO to the utility during the True-Up Year. Then in Col. (G), Col. (E) is substrated from Col. (F) to calculate the True-Pap Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6B. Column (I) adds the interest on the sum of Col. (G), (H), and (I).

Prior Period Adjustment is the amount of an adjustment for correct an error in a prior period. The adjustment will include a gross-up for income tax purposes, as appropriate. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.

- Notes:

 A Recovery of regulatory asset or any associated amortization expenses is limited to any regulatory assets authorized by FERC.

 B Recovery of abundoned plant is limited to any abundoned plant recovery authorized by FERC.

 Includes only UPP authorized by the Commission for inclusion in rate base; (ii) the CWIP balance inclusion in rate base; (ii) the CWIP balance inclusion in rate base; (ii) the CWIP balance inclusion in rate base; (ii) the CWIP balance included in rate base; and (iii) a demonstration that APUDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that monthly debts and credits do not contain enteries for APUDC for each CWIP project in rate base;
- D ADIT and Accumulated Deferred Income Tax Credits are computed using the average of the end of the year and the projection of the year balances.
- Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the weighted cost of capital will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.

 Hammore deviation of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.
- when cost are inst recovered.

 Fundamorized Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.

 Fundamorized Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.

 The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, secrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocators in Col. (g) and Col. (m) will be the same allocators used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance are collected from the control of the cost of abandoned plant.

 The Formula Rate is a possible of the cost of abandoned plant.

 The Formula Rate is a possible of the cost of abandoned plant.

 The Formula Rate is a possible of the cost of abandoned plant.

 The Formula Rate is a possible of the cost of abandoned plant.

 The Formula Rate is a possible of the cost of abandoned plant.

- Electric portion only

 Exclude Construction Work In Progress and leases that are expensed as O&M (rather than amortized). New Transmission plant
 that is expected to be placed in service in the current calendar year weighted by number of months it is expected to be in-service. New Transmission plant expected
 to be placed in service in the current calendar year that is not included in the PJM Regional Transmission Plan (RTEP) detailed on Attachments 9 or 9A.

For the Reconciliation, new transmission plant that was actually placed in service weighted by the number of months it was actually in service CWIP will be linked to Attachment 6 which shows detail support by project (incentive and non-incentive).

- Transmission Portion Only All EPRI Annual Membership Dues
- All Regulatory Commission Expenses Safety related advertising included in Account 930.1
- Sately related advertising included in Account \$30.1. Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized in Form 1 at 351.h.

 The currently effective income tax rate, where FTT is the Federal income tax rate; STT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of each state and how the blended or busbels 15T was developed.

 The ROE is 10.5% which includes a base ROE of 10.0% ROE per FERC order in Docket No. EL13-48 and a 50 basis point RTO membership adder as authorized by FERC: provided, that the projects

- K Education and outreach expenses relating to transmission, for example siting or billing
 L As provided for in Section 34.1 of the PJM OATT and the PJM established billing determinants will not be revised or updated in the annual rate reconciliations per settlement in ER05-515.
- As provided for in section 4-1 of the 7-30 OAT I and the 7-30 establishment will not be revised or upbased in the antique rare reconciliations p. Amount of transmission plant excluded from rates per Attachment 5.

 Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Coutners who have made lump-sum payments (net of accumulated depreciation) towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A. Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmission Owner whole on Line 155. Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 are included in Transmission O&M.
- О If they are booked to Acct 565, they are included in on line 64

- If they are booked to Acct 565, they are included in one 164
 Securitization bonds may be included in the capital structure per settlement in ER05-515.
 Pepco capital structure is derived from gross debt.
 Per the settlement in ER05-515, the facility credits of \$15,000 per month paid to Vineland will increase to \$37,500 per month (prorated for partial months) effective on the date FERC approves the settlement in ER05-515.
 See Attachment 5 Cost Support, section entitled "PBOP Expense in FERC Account 926" for additional information per FERC orders in Docket Nos. EL13-48, EL15-27 and ER16-456.
 See Attachment 5 Cost Support, section entitled "Other Income Tax Adjustment" for additional information.
 Potomac Electric Power Company elected to amortize investment tax credits, adjust recoverable income tax expense, rather than to reduce rate base by unamortized investment tax credits. Amortization reduces income tax expense and reduces the revenue requirement by the amount of the Investment Tax Credit Amortization (Form 1, 266.8.f) multiplied by (1/1-T).
- reauces income tax expense and reduces the revenue requirement by the amount of the Investment Tax Credit Amortization (Form 1, 268.8.1) multiplied by (1/1-T).

 The Accumulated Deferred Income Tax (ADIT) balances in Accounts 190, 281, 282, and 283 are measured using the enacted tax rate that is expected to apply when the underlying temporary differences are expected to be settled or realized. To preserve rate base neutratly, theses balances appropriately exclude ADIT amounts associated with income tax related regulatory assets and liabilities. The balances in Accounts 190, 281, 282 and 283 are adjusted in accordance with Treasury regulation Section 1.167(I)-(1h)(6) and averaged in accordance with IRC Section 168(i)(9)(8) in the calculations of rate base in the projected review never requirement and in the true-up adjustment. Differences attributable to over-projection of ADIT in the projected review requirement will requirement will result in a proportionate reversal of the projected prorated ADIT activity by 50 percent of the difference between the projected monthly ADIT activity and the actual monthly ADIT activity is an increase, 50 percent of the actual monthly ADIT activity will be used. Likewise, when projected monthly ADIT activity is a decrease and actual monthly ADIT activity will be used. For the Annual Update (Projected) filing, see Attachment 1A ADIT Summary, Column H for inputs. For the Annual Update (True-Up) filing, See Attachment 1A ADIT Summary, Column M for inputs.
- These balances represent the unamortized federal and state deficient / (excess) deferred income taxes. To preserve rate base neutrality and consistent with the exclusion of ADIT amounts associated with income tax-related regulatory assets and liabilities as described in Net 9. regulatory assets and liabilities for deficient and excess ADIT are reflected without tax gross-up. For the Annual Update (Projected) filing, see Attachment 10 ADIT Rate Base Adjustment, Column of For inputs. For the Annual Update (True-Up) filing, See Attachment 10 ADIT Rate Base Adjustment, Column of For inputs.
- Long Term Debt balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 18.c & d to 21.c & d in the Form No. 1. The balance
- Preferred Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 line 3.c & d in the Form No. 1. The balances for January through November shall represent the actual balances in Pepco's books and records (trial balance or monthly balance sheet).
- Common Stock belance will reflect the 13 months area of the belances, of which the 1st and 13th are found on page 112 lines 16.c & d in the Form No. 1. The balances for January through November shall represent the actual balances in Pepco's books and records (trial balance or monthly balance sheet).

 AA Only the transmission portion of amounts reported at Form 1, page 227, line 5 is used. The transmission portion is derived by applying the wages and salary allocator to the total of line 5 and is specified in a football to the Form 1 of the Fo

Instructions

1. For purposes of calculating transmission allocated projected activity, use Columns (F), (G), and (H) and set the "Rate Year" below to "Projected Activity". For purposes of calculating the "True-Up" adjustment, use Columns (I), (J), (K), (L), and (M) and set the "Rate Year" below to "True-Up Adjustment".

Rate Year True-Up Adjustment Check

2. For the Annual Update (Projected) filing, see Attachment 1A - ADIT Summary, Column H for inputs. For the Annual Update (True-Up) filing, See Attachment 1A - ADIT Summary, Column M for inputs.

Notes

- The computations on this workpaper apply the proration rules of Reg. Sec. 1.167(i)-1(h)(6) to the annual activity of accumulated deferred income taxes subject to the normalization requirements. Activity related to the portions of the account balances not subject to the proration requirements are averaged instead of prorated. For accumulated deferred income taxes subject to the normalization requirements, activity for months prior to the future portion of the test period is averaged related than prorated. This section is used to prorate the projected ADIT balances.
- p The balances in Accounts 190, 281, 282 and 283 are adjusted in accordance with Treasury regulation Section 1.167(i)-1(h)(6) and averaged in accordance with IRC Section 168(i)(9)(8) in the calculations of rate base in the projected revenue requirement and in the true-up adjustment. Offerences attributable to over-projection of ADI in the projected revenue requirement will result in an applicament oversign of the projected prorated ADI activity in the true-up adjustment to the extent of the over-projection. Differences attributable to order projection of ADI in the projected revenue requirement will result in an adjustment to the projected prorated ADI activity by 50 percent of the differences between the projected mornithy activity and the actual monthly activity. However, when projected mornithy ADI activity is an increase, 50 percent of a charal monthly ADI activity is a decrease and statual monthly ADI activity is an increase, 50 percent of actual monthly ADI activity is a decrease and statual monthly ADI activity is an increase, 50 percent of actual monthly ADI activity will be used. This section is used to calculate ADI activity in the true-up actual monthly ADI activity is a decrease and statual monthly ADI activity in the true-up actual monthly ADI activity will be used. This section is used to calculate ADI activity in the true-up actual monthly ADI activity in the true-up actual monthly ADI activity in the true-up actual monthly ADI activity in the true-up actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in the actual monthly ADI activity in
- c Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (amount of projected activity). If an objected activity is made activity are both negative, a negative in Column J represents under-projection (account activity) are projected activity) and a positive in Column J represents under-projection (account activity) over projected activity) and a positive in Column J represents under-projection (account activity) are projected activity) and a positive in Column J represents over-projection (account activity) and activity over projected activity) and a positive in Column J represents under-projection (account activity) and activity over projected activity) and a positive in Column J represents under-projection (account activity) are positive in Column J represents under-projection (account activity) are positive in Column J represents under-projection (account activity) are positive in Column J represents under-projection (account activity) account activity over projected activity) and a positive in Column J represents under-projection (account activity) account activity over projected activity) and a positive in Column J represents under-projection (account activity) account activity over projected activity in account activity over projected activity in account activity over projected activity in account activity account activity over projected activity account activity account activity account activity over projected activity account activity ac
- D Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter Column G x [Column | Column F]. If Column J is under-projected, enter the amount from Column G and complete Column L). In other situations, enter zero.
- E Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from Column J. In other situations, enter
- F IRS normalization adjustment for timing when accelerated tax depreciation should affect rate base.

Potomac Electric Power Company Accumulated Deferred Income Taxes (ADIT) Attachment 1B - ADIT Worksheet - End of Year

				December 31, 2020(Actual)		
			Gas, Production,	Only		
			Distribution, or	Transmission	Plant	Labor
Line	ADIT (Not Subject to Proration)	Total	Other Related	Related	Related	Related
1	ADIT-190	3,954,324		1,169,395	760,983	2,023,946
2	ADIT-281					
3	ADIT-282	(138,442,898)			(138,442,898)	-
4	ADIT-283	(10,042,040)			(1,392,669)	(8,649,371)
5	ADITC-255	100		-		
6	Subtotal - Transmission ADIT	(144,530,614)		1,169,395	(139,074,584)	(6,625,424)
	Proveletter	Total				

Note: ADIT associated with Gain or Loss on Reacquired Debt included in ADIT-283, Column A is excluded from rate base and instead included in Cost of Debt on Attachment H-9A, Line 111. A deferred tax (liability) should be reported as a positive balance and a deferred tax asset should be reported as a negative balance on Attachment H-9A, Line 111.

(3,046,798)

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B - F and each separate ADIT item will be listed, dissimilar items with amounts exceeding \$100,000 will be listed separately.

7 ADIT (Reacquired Debt)

The computation in rotations And office windings region for a product or data of fine, Sec. 11.1(TP) (1)(til) and managing in accordance with PC Section 15(1)(til) (1)(til) code for a region of the computation of the project of the region of the re
- C Column (J) is the difference between projected morthly and actual morthly activity (Column (I) minus Column (F)). Specifically, it projected and actual activity are both positive, a negative in Column (J) represents over-projection (amount or projected activity) that did not occur) and a positive in Column (J) represents under-projection (access of actual activity over projected activity). If projected and actual activity are both negative, a negative in Column (J) represents under-
- D Column (K) preserves proration when actual monthly and projected monthly archivity are either both increases or decreases. Specifically, if Column (J) is over-projected, enter Column (G) x [Column (I) Column (F)]. If C projected, enter the amount from Column (G) and complete Column (L). In other situations, enter zero.
- F IRS normalization adjustment

Instructions

- 1. For transmission allocated deficient / (excess) deferred income taxes related to rate changes occurring after September 30, 2018, insert new amortization table that delineate the deficient and excess deferred taxes by protected property, unprotected property, and unprotected non-property by ADIT category.
- 2. Set the amortization period for unprotected property to 5 years and unprotected non-property to 4 years. The amortization of deficient and (excess) ADIT designated as protected will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements.
- 3. Update applicable formulas in the "Total Federal Deficient / (Excess) Deferred Income Taxes" and "Total State Deficient / (Excess) Deferred Income Taxes" sections to ensure appropriate inclusion of deficient / (excess) ADIT deferred income taxes related to rate changes occurring after September 30, 2018.
- 4. Insert note explaining the event giving rise to the deficient / (excess) ADIT including the start and end date for the amortization. The amortization ceases after the related regulatory asset/ liability is drawn down to zero.

. . .

- A Deficient and (excoss) ADT related to the Tax Cuts and Jobs Act of 2017 (TCJA) will be amortized beginning January 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-6 et al. The amortization periods for upprotected property and unprotected mon-propenty related deficient and (excoss) ADT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by add adjustments, sur return amendments, or new IRS guidance. The amortization of protected propenty related deficient and (excess) ADT will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements and may vary by year depending on where each underlying asset resides in its individual less in its individual less control and property related excess ADT will be fully amortized by December 31, 2021. Note The amortization formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of deficient and (excess) ADT will be carried in FERC Accounts 410.1 and 411.1.
- B The remaining unamortized excess and deficient ADIT related to the Tax Reform Act of 1986 will be amortized using the Average Rate Assumption Method (ARAM) as provided in the Settlement in Docket No. ER19-5 et al. The current year amortization of deficient and reforeass) ADIT is recorded in FERCA Accounts 410,1 and 411.1.
- C The remaining unamortized deficient and (excess) ADT related to the Manyland 2016 *Apontionment Weighting Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADT are twee and an anothe changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) also related ADT including related amortization is reported net of federal taxes. Note The amortization formula in Column F Net Inchange based on where Peop considers in the amortization of vice and (excess) ADT will be fully amortized by September 30, 2023. The unamortized deficient and (excess) and inchange and excess and acceptance of the propriet
- D The remaining unamortized deficient and (excess) ADIT related to the Washington, D.C. 2018 'Apportionment Weighting Change's as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) ADIT including related amortization is reported net of federal taxes. Note The amortization of officient and excess ADIT is recorded in FERK Accounts 410.1 and 411.1 - E The remaining unamortized deficient and (excess) ADIT related to the Washington, D.C. 2017 *Corporate Rate Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods are unprotected properly and unprotected non-properly related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected properly related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unamortized deficient and (excess) state related ADIT including related amortization is reported not of federal taxes. Note The amortization formula in Column F will change based on where Peopoc resides in the amortization of vice. The current year amortization of vice and (excess) ADIT will change based on where Peopoc resides in the amortization of vice. The current year amortization of vice and (excess) ADIT will change based on where Peopoc resides in the amortization of vice.
- F The remaining unamortized deficient and (excess) ADIT related to the Washington, D.C. 2016 "Corporate Rate Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected and efficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, belances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by September 30, 2022. Note The amortization formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERCA accounts 410.1 and 411.1.
- G The remaining unamortized deficient and (excess) ADIT related to the Washington, D.C. 2015 "Corporate Rate Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected and excess) ADIT are fixed and cannot be changed without the Commission's express approval except, belances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) active related ADIT including related amortization is reported net of federal taxes. Note -The amortization formula in Column F will change based on where Pepco resides in the amortization cycle. The current year amortization of excess) is recorded in FERC Accounts 410.1 and 411.1.
- H The remaining unamortized deficient and (excess) ADIT related to the Maryland 2007 "Corporate Rate Change" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The unprotected property related deficient and (excess) ADIT will be fully amortized by September 30, 2023. The unprotected non-property related deficient and (excess) ADIT are fixed amortization is reported net of federal taxes. Note The amortization formula in Column F will change based on where Peopro resides in the amortization cycle. The current officient and (excess) ADIT is recorded in FERC Accounts 4.01-and 411.1.

For deficient and (excess) accumulated deferred income taxes (ADIT) related to change(s) to income tax rates occurring after September 30, 2018, insert calculations that support the re-measurement amount delineated by category (i.e., protected property, unprotected property, and unprotected non-property).

Set the allocation percentages equal to the applicable percentages at the date of the rate change.

A Categorization of items as protected or ron-protected will remain as originally agreed, absert a change in guidance from the Internal Revenue Service (RSS) with respect to that items. Balances associated with the tax rate change will not be adjusted (except for amortization each year) absert audit adjustments, tax enturn amendments, or a change in IRS guidance. Any resulting remigrate with pre-principally disclosed including the basis for the change.

26	Total "Taxes Other Than Income Taxes" - acct 408.10 (p. 114.14)	366,136,605

27 Difference Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they will not be included
- B Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they will not be included

0

- Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year

Allocation of Property taxes to Transmission Function Year Ended December 31, 2020

Revenue Adjustment to determine Revenue Credit

Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not to Note 1: All revenues related to transmission that are received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula will be included as a revenue receit or included in the peak on line 17'd Appendix A.

16 Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.

17 Note 3. Retembling treatment for the following specified secondary uses of treatministor assets:

(1) right-of-way leases and leases for space on treatministon facilities for telecommunications;

(2) transmission tower licenses for wireless anternac; (3) right-of-way proporty leases for faming, grazing or nusreies; (4) licenses of intellectual property (including a portable oil degasification process and scheduling software); and (5) transmission maintenance and consulting services (including energized circuit maintenance, high-votage substation maintenance, assety variant; partsolime of testings and circuit breaster stealing) to other utilities of the contract of the contra

18a	Revenues included in lines 1-11 which are subject to 50/50 sharing.		\$ 11,861,79

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
 Inclusive of any CWIP or mamoritized abandoned plant included in rate base when authorized by FERC order less any perfunded AFIDC, if applicable.
 Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value is line 1. This value includes whosequent capital investments required to maintain the facilities to their original capabilities.
 Project Nor Plant is the Project Gross Plant is the total capital investments required to maintain the facilities to their original capabilities.
 Project Nor Plant is the control capital investments required to maintain the facilities to their original capabilities.
 Project Nor Plant is the Project Gross Plant in the Project Cross Plant Indicated in the same excludes any regulatory suct, which are to externed as a separate line item.
 Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment II, page 3, line 14. Project Depreciation Expense includes the amoritation of Abandoned Plant The Nor Re Req is the value to be used in the rate calculation under the applicable Schodule under the PBM ONTT for each project.
 The Nor Re Req is the value to be used in the rate calculation under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule under the applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodule Under the Applicable Schodul

	Notes:					Monthly Interest Rate Interest Income (Expense)			#DIV/0! #DIV/0!	

Notes:
1) From Attachment 6, line 17, col. 13 for the projection for the Rate Year.
2) From Attachment 6, line 17, col. 13 for that project based on the actual costs for the Rate Year.
3) From Attachment 6, line 17, col. 13 for that project based on the actual costs for the Rate Year.
3) The Tevenue Received on line 2, col. (E), is the total anount of revenue distributed to company in the year as shown on pages 328-330 of the Form No 1. The Revenue Received is input on line 2, Col. E excludes any True-Up revenues.
Column E, lines 3 are the dollar amounts of Revenue Received Revenue Received has don't be projected New Revenue Requirement in Column C.
Column D, lines 3 are sourced from the projected revenue requirement for the year at issue.
4) Interest from Attachment 6,
5) From Fertial Adjustment from line 5 is pro rata to each project, unless the error was project specific.

Prior Period Adjustments

5		-	-	-
6	TO calculates NITS revenues, net of true-ups, received in calendar Year 1 (e.g., 2018)			
7		(A)	(B)	(C)
8		PJM Billed Revenue Received	True-up	Annual (net of true-ups)
9	Jan-May (Year 1)			-
10	June-Dec (Year 1)			-
11				-
12	TO calculates Reconciliation Revenues for Year 1 (e.g. 2018) by populating template with	th Year 1 actuals.		
13	Jan-Dec (Year 1)			-

For each project or Attachment H-9A, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H-9A will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H-9A and any Projects paid by the RTO to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6B. Column (I) adds the interest on the sum of Col. (G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).

For Period Adjustment is the amount of an adjustment to correct an error in a prior period. The adjustment will include a gross-up for income tax purposes, as appropriate. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.

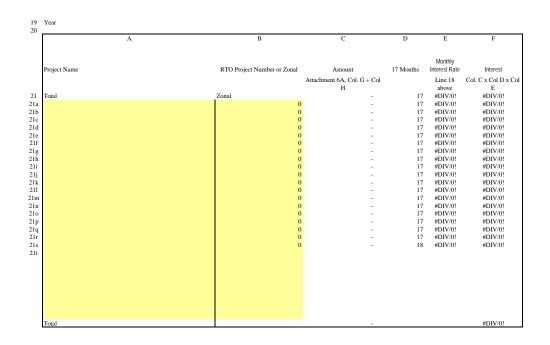

Attachment 6B True-Up Interest Rate Potomac Electric Power Company

[A]

Note A:

(1) The FERC Quarterly Interest Rate in column [A] is the interest applicable to the Month indicated.

- Notes:

 A Recovery of regulatory asset or any associated amortization expenses is limited to any regulatory assets authorized by FERC.

 B Recovery of abundoned plant is limited to any abundoned plant recovery authorized by FERC.

 Includes only UPP authorized by the Commission for inclusion in rate base; (ii) the CWIP balance inclusion in rate base; (ii) the CWIP balance inclusion in rate base; (ii) the CWIP balance inclusion in rate base; (ii) the CWIP balance included in rate base; and (iii) a demonstration that APUDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that monthly debts and credits do not contain enteries for APUDC for each CWIP project in rate base;
- D ADIT and Accumulated Deferred Income Tax Credits are computed using the average of the end of the year and the projection of the year balances.
- Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the weighted cost of capital will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.

 Hammore device the Commission of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.
- when cost are inst recovered.

 Fundamorized Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.

 Fundamorized Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.

 The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, secrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocators in Col. (g) and Col. (m) will be the same allocators used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance are collected from customers through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance are collected from customers through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance are collected from customers through cost accruals, the amount to be deducted from rate base should exclude the portion of any balance are collected from customers through cost accruals to account that are recovered under the Formula Rate. Since reserves can be created by an offsetting balance are collected from customers through cost accruals to the account that are recovered under the Formula Rate. Since reserves can be created by an offsetting balance are collected from customers through cost accruals to the account that are recovered under the Formula Rate. Since reserves can be created by an offs

- H Calculate using 13 month average balance, except ADIT.

 1 Projected balances are for the calendar year the revenue under this formula begins to be charged.

 J From Attachment 5, line 45 column F for the end of year balance and records for other months.
- In the true-up calculation, actual monthly balance records are used.

Attachment 6G – PECO Formula Rate Update Filing

May 28, 2021

Ms. Kimberly D. Bose Secretary Federal Energy Regulatory Commission 888 First Street, N.E. Room 1A Washington, DC 20426 Via e-filing

Re: PECO Energy Company

Docket No. ER17-1519

Informational Filing of 2021 Formula Rate Annual Update; Notice of Annual

Meeting

Dear Ms. Bose,

PECO Energy Company ("PECO") hereby submits electronically, for informational purposes, its Annual Update Information pursuant to the Formula Rate Implementation Protocols ("Protocols") of PECO contained in Attachment H-7C of the PJM Interconnection, L.L.C. Open Access Tariff ("Tariff"). Pursuant to the December 5, 2019 Order in the above-referenced docket and the Rules of Practice and Procedure of the Federal Energy Regulatory Commission ("Commission" or "FERC"), PECO Energy Company ("PECO") submitted its compliance filing with the Commission on January 2, 2020, which was accepted on April 7, 2020. The Formula Rate implementation protocols provide that:

On or before May 31 of each year, PECO shall provide its Annual Update and True-Up Adjustments to PJM Interconnection, L.L.C. ("PJM"), cause such information to be posted on the PJM website and OASIS, and file such information with the Federal Energy Regulatory Commission ("FERC") as an informational filing. Within five (5) days of such posting, PECO shall cause notice of such posting to be provided via an email exploder list. Interested Parties can subscribe to the exploder list on the PJM website. For purposes of these Protocols, the term Interested Party includes, but is not limited to, customers under the PJM Tariff, state utility regulatory commissions, the Organization of PJM States, Inc., consumer advocacy agencies, and state attorneys general.¹

The same information contained in this informational filing has been transmitted to PJM for posting on its website as required by the Protocols. Thus, all interested parties should have ample notice of and access to the Annual Update Information. The Protocols provide specific procedures for notice, review, exchanges of information, and potential challenges to aspects of the Annual Update Information.

¹ See PJM Tariff, Attachment H-7C, Sections II.B.-C.

As required by the Protocols, notice of an Annual Meeting to be held on June 25, 2021 is also being provided on the PJM website. The Annual Meeting will permit PECO to explain and clarify the Annual Update and True-Up Adjustment and will provide interested parties an opportunity to seek information and clarifications about the Annual Update and True-up Adjustment.

PECO has prepared the 2021 Annual Update Information in a manner consistent with its Protocols, as set forth in Attachment H-7C of the PJM Tariff. Appendices 1A and 1B are the projected net revenue requirements for the Network Integration Transmission Service ("NITS") and MDTAC, respectively, that will be used by PJM to determine charges for service to the PECO zone during the June 1, 2021 through May 31, 2022 rate period. Appendices 2A and 2B are the True-Up Calculations that provide the formula worksheets that reflect 2020 actuals and support the True-Up Adjustments for NITS and MDTAC, respectively. Appendix 3 is the additional workpapers that, in accordance with Protocols, must be submitted with Annual Update.

Sections II.F and II.G of the Protocols identify certain information that is to be provided in the Annual Update and projected net revenue requirement. This information is provided herein.

A. Changes to Formula References to the FERC Form No. 1

In accordance with Section II.F.6 of the Protocols, PECO has identified one change in the Formula References to the FERC Form No. 1.

This change relates to the adjustment of lines associated with the calculation for Land Held for Future Use as a result of line adjustments to the FERC Form No. 1 page 214. Accordingly, the instruction for the calculation on Attachment 4- Rate Base, page 1 of 2, Column f of the Formula Rate has been updated from "214.16,d, 214.17,d, 214.18,d, 214.20,d, 214.23,d, and 214.25,d for end of year, records for other months" to "214.26,d, 214.27,d, 214.28,d, 214.30,d, 214.33,d, 214.34,d, 214.36,d and 214.39,d for end of year, records for other months".

B. Material Adjustments to the FERC Form No. 1

In accordance with Section II.F.7 of the Protocols, PECO confirms that the Annual Update Information contains no material adjustments to FERC Form No 1.²

C. Affiliate Cost Allocation

In accordance with Section II.F.8 of the Protocols, PECO is hereby providing information about affiliate cost allocation. Exelon Business Services Company ("EBSC") offers a range of services to PECO and other affiliated members of the Exelon family of companies. Under the terms of the General Services Agreement ("GSA") between PECO and the EBSC, which was approved in the PECO/Unicom merger proceeding with the Pennsylvania Public Utility

² "Land Held for Future Use" balance has been reduced by \$334,450 as of December 31, 2019 and \$1,095,750 as of December 31, 2020 to exclude the asset retirement costs for the land.

Commission ("PA PUC") at Docket No. A-110550F0147, the services furnished by the EBSC to PECO are to be billed at the EBSC's cost. Direct charges are made for services where possible. Otherwise, costs are allocated to affiliates of EBSC on the basis of the allocation factors/methodologies identified in the attachment to the GSA, which were previously reviewed and approved by the U.S. Securities and Exchange Commission ("SEC"). Costs distributed to PECO are recorded to the appropriate common Administrative & General expense accounts on PECO's books. No changes to cost allocation methodologies were made from the prior year. Refer to pages 429 and 429.1 of the FERC Form No. 1 for the magnitude of such costs that have been allocated or directly assigned to PECO and each affiliate by service category or function.

D. Accounting Changes

In accordance with Sections II.F.9 and II.G.5 of the Protocols, PECO confirms that any accounting changes are discussed in applicable disclosure statements filed with the SEC or contained within PECO's FERC Form No. 1.

E. Items Included on a Non-Historical Cost Basis

In accordance with Sections II.F.10 and II.G.6 of the Protocols, PECO has identified the following item included in the projected net revenue requirement that is on a non-historical cost basis:

(1) Other Post-Employment Benefits ("OPEB"). PECO has made no change to OPEB costs reflected in the formula.

F. Reorganization or Merger Transaction

In accordance with Sections II.F.11 and II.G.7 of the Protocols, PECO confirms there have been no reorganization or merger transactions approved.³

³ On February 25, 2021, Exelon Generation submitted an application with the Federal Energy Regulatory Commission seeking authorization for a "spin" transaction after which, if approved, Exelon Corporation and its remaining subsidiaries (including PECO) will retain no interest or affiliation with Exelon Generation. See Exelon Generation Company, LLC and its Subsidiaries, *Application for Authorization Under Section 203 of the Federal Power Act and Request for Expedited Consideration*, Docket No. EC-21-57-000 (filed February 25, 2021).

Thank you for your attention to this informational filing. Please direct any questions to the undersigned.

Very truly yours,

/s/ Jack R. Garfinkle Associate General Counsel

Formula Rate - Non-Levelized Rate Formula Template Utilizing FERC Form 1 Data

PECO Energy Company

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#) References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Notes:

Reserved

The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income. Account

- Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 12, column 5 minus amortization of Regulatory Asset at page 3, line 7, column 5. For Prepayments, refer to Note K in Attachment 4.
- Page 3, Line 5: Attachment 5B, Line 4 Exclude: (1) amortization of CAP Shopping and Seamless Moves; (2) amortization of DSP IV Admin Costs; (3) Miscellaneous Advertising; (4) SEPA Solar Power Study; (5) PSU Sponsorship; (6) EU IT Prepaid Meter Assess O&M; and (7) Customer Operations AMI/CI O&M. Include Communications, Public Advocacy and Corporate Relations and Government and Regulatory Affairs and Public Policy expenses listed in Account 923 found at Form 1 323.184.b. Attachment 5B, Lines, 11, and 12 - Exclude EPRI Annual Membership Dues listed in Form 1 at 353.f. non-safety-related advertising included in Account 930.1 found at 323.191.b and Chamber of Commerce Dues and Civic Organization Expenses in Account 930.2 found at 323.192.b; include the costs related to Project
 - Cancellation Fees and Remediation Expenditures (provided, that with regard to the Metal Bank Superfund, PECO must include as a credit any receipts received from the EPA and/or obtained through litigation with the remediation contractors related to Metal Bank Superfund). Attachment 5B, Line 9- include Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351,h., and exclude all other Regulatory Commission Expenses itemized at 351,h.
- Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- The currently effective income tax rate, where FIT is the Federal income tax rate, where FIT is the Federal income tax rate, and p = "the percentage of federal income tax deductible for state income tax rate, in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 36). Excess Deferred Income Taxes reduce income tax expense by the amount of the expense multiplied by (T/1-T).

Inputs Required: SIT= 9,99% (State Income Tax Rate or Composite SIT) 0.00% (percent of federal income tax deductible for state purposes)

- Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).
- Removes dollar amount of transmission plant to be included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those f
- Reserved ROE will be supported in the original filing and no change in ROE may be made absent a Section 205 or Section 206 filing with FERC. The equity component of the capital structure will be capped at 55.75% and shall not be subject to change during the ROE Moratorium Period established under the Settlement Agreement in Docket No. ER17-1519. Thereafter, the cap shall be subject to change pursuant to sections 205 and 206 of the Federal Power Act.
- Reserved
- All items related to Contributions in Aid of Construction (CIAC), including investment in CIAC and CIAC related ADIT, excess/(deficient) ADIT and amortization of excess/(deficient) ADIT shall be excluded from the formula rate.
- Transmission-related ADIT, Excess/(Deficient) ADIT, and the amortization of Excess/(Deficient) ADIT, and the amortization of Excess/(Deficient) ADIT, and the amortization of Book Premiums on Reacquired Debt, Pension Expense Provision, Loss on Reacquired Debt, FAS 112 and Electric Rate Case Expense - Regulatory Asset - Current.
- ADIT, Excess/(Deficient) ADIT and the amortizaiton of Excess/(Deficient) ADIT related to Accrued Benefits, Deferred Compensation, Vacation pay Change in Provision and Accrued Vacation shall be excluded from the formula rate.
- All ADIT-190, ADIT-282, and ADIT-283 amounts reflected on Attachment 4C must be based on a timing difference between book expense recognition and expense recognition for tax purposes.
- Calculated using 13 month average balance, except ADIT.
- Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until FERC explicitly approves recovery of the cost of abandoned plant pursuant to Section 205 of the FPA.
- Recovery of Regulatory Asset is permitted only as specifically authorized pursuant to Section 205 or 206 of the FPA by FERC. Recovery of any regulatory assets not specifically identified in the initial version of this formula rate template approved by FERC in Docket No. ER17-1519-000 will require specific authorization from
- Excludes Asset Retirement Obligation balances
- Company shall include only gains and losses on interest rate locks associated with debt issuances. Absent a Section 205 filing, Company shall not include in the Formula Rate, the gains, losses, or costs related to other hedges.
- The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference. Items that can be included in formula for recovery are AFUDC Equity. Meals & Entertainment (50%). Memberships & Dues Not Deductible, Additional Compensation to Employee Stock, and Life Insurance Premiums. Items that can not be included in formula for recovery are Dividend Received Deductions, Equity in Earnings of Unconsol. Subs, and Other Perms (Rabbi Trust). Commission authorization is required in order to include any other permanent difference as an adjustment to the income tax allowance computation in the Formula Rate Template.
- Calculated on Attachment 4A.
- Unfunded Reserves are customer contributed capital such as when Injuries and Damages expense is accrued but not vet incurred. Also, pursuant to Special Instructions to Accounts 228.1 through 228.4.
 - no amounts shall be credited to accounts 228.1 through 228.4 unless authorized by a regulatory authority or authorities to be collected in a utility's rates.
- Amortization of Regulatory Asset for Environmental Remediation of Manufactured Gas Plants shall be excluded from the formula rate.

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
- Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable.
- Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities.
 Gross plant does not include Unmortized Abandoned Plant.
 Project NF Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes any regulatory asset, which are to be entered as separate line items.

1.749.823.734

- Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 14. Project Depreciation Expense includes the amortization of Abandoned Plant Times Up Adjustment is calculated on the Attachment 3 Project Tuve-up Schedule for the Rate Year
 The Net Rev Req is the value to be used in the rate calculation under the applicable Schedule 12 under the PJM OATT for each project.

- In the tel few Reeq as the value to be used in the rate calculation under the applicable Schodule 12 under the PM OATT for each praying the Total General Institute to be used in the rate calculation under the applicable Schodule 12 under the PM OATT for each praying the properties of the properties of the PM of the Total General Institute to be used in PM of the P

- Requires approaches the recommendation in th
- over the remaining months of the Rate Year.

 Zonal on line 17a refers to all projects not qualifying for regional recovery

 Additional refund \$850,00 per year for 2018-2021 and \$0 for 2022 and beyond.

		1	,	(

Notes:

1 Rate Base

A Line 5 includes a 100 basis point increase in ROE that is used only to determine the increase in return and income taxes associated with a 100 basis point increase in ROE. Any actual ROE incentive must be approved by the Commission.

For example, if the Commission were to grant a 137 basis point ROE incentive, the increase in return and taxes for a 100 basis point increase in ROE would be multiplied by 1.37 on Attachment 1 column 12.

Attachment H-7, Page 2 line 47, Col.5

B The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H-7 that are not the result of a timing difference

- Notes:
 1) From Attachment 1, line 17, col. 14 for the projection for the Rate Year.
 2) From Attachment 1, line 17, col. 14, less col. 15(a) for each project and Attachment H-7, line 7 for zonal.
 3) "Revenue Received" on line 3 Zonal, Col. (E), is the total amount of revenue received for the True-Up Year under PJM OATT Attachments 7, 8 and H-7 and "Revenue Received" on letter-denominated line 3 entries, Col. (E), is the amount of revenue received for the True-Up Year for the project designated in Cols. A and B under PJM OATT Schedule 12 PECO Appendix and PECO Appendix A as reported on pages 328-330 of the Form No 1. The Revenue Received in Col. E excludes any True-Up revenues

- 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

Prior Period Adjustments

	(a)	(b)	(c)	(d)
	Prior Period Adjustments	Amount	Interest	Total
	(Note B)	In Dollars	(Note B)	Col. (b) + Col. (c)
5		(126,458)	-	(126,458)

- A For each project or Attachment H, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H and any Projects paid by the RTO to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col.(G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).
- B Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. Interest will be calculated for the prior period adjustment based on the FERC Refund interest rate specified in 18 CFR 35.19(a) for the period up to the date the projected rates went into effect. PECO will provide the supporting worksheet for the interest calculation when prior period adjustment is needed.
- The Actual Revenue Requirement in the True-up Adjustment calculation for years 2020 and later shall use the depreciation and amortization rates approved for use by the Commission when PECO performs the True-Up Adjustment.

Notes:

- A Recovery of regulatory asset is limited to any regulatory assets authorized by FERC.
- B Recovery of abandoned plant is limited to any abandoned plant recovery authorized by FERC.
- C Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that monthly debts and receits to one contain entries for AFUDC for each CWIP project in rate base.
- D ADIT and Accumulated Deferred Income Tax Credits are computed using the average of the year and the end of the year balances. The projection will use lines 16, 19 and 36 of Attachment 4A to populate the average ADIT balance on line 28 above.
- E Recovery of a Regulatory Asset is permitted only for pre-commercial and formation expenses, and is subject to FERC approval before the amortization of the Regulatory Asset can be included in rates. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the weighted cost of capital will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.
- F Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.
- G The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion of sets to account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account.
- H Calculate using 13 month average balance, except ADIT. SERP will not be included as an unfunded reserve in the formula rate.
- I Projected balances are for the calendar year the revenue under this formula begins to be charged.
- J Excludes ARO amounts.
- K Total prepayments, including Fleet Activity, allocated to transmission as follows: (1) amounts solely related to transmission allocated 100% to transmission; (2) amounts solely related to distribution, gas or non-utility allocated 0% to transmission; (3) amounts related to electric general allocated using the wages and salaries allocator (Attachment H-7), p. 4, line 11, column (5)), (4) amounts related to common labor or plant allocated using the wages and salaries allocator (Attachment H-7, p. 4, line 11, column (5)), multiplied by either common labor percent to electric (Attachment 7-PBOP, Note B, Electric Labor) or by common utility plant percent to electric (per FFI page 350) as applicable depending upon the nature of the prepayment item.
- L TLF shall be equal to 50 percent of the lesser of (a) the transmission portion of FERC Form 1, page 227, line 5, column c per FERC Form No. 1) and (b) \$9 million. The TLF recovery percentage and cap will be subject to modification only through Commission authorization under section 205 or section 206 of the Federal Power Act.

- Instructions for Account 190:

 1. ADIT items related only to Non-Electric Operations (e.g., Gas, Water, Sewer) or Production are directly assigned to Column C

 2. ADIT items related only to Transmission are directly assigned to Column D

 3. ADIT items related to Plant other than general plant, intangible plant or common plant and not in Columns C & D are included in Column E

 4. ADIT items related to labor, general plant, intangible plant or common plant and not in Columns C & D are included in Column E

 5. Deferred income taxes arise when items are included in taxable income in different periods than they are included in rates, therefore if the item giving rise to the ADIT is not included in the formula, the associated ADIT amount shall be excluded

Notes:

- A Long Term Debt balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 18.c & d to 21.c & d in the Form No. 1.
- B Preferred Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 line 3.c & d in the Form No. 1
- C Common Stock balance will reflect the 13 month average of the balances, of which the 1st and 13th are found on page 112 lines 3.c & d, 12.c & d, and 16.c & d in the Form No. 1 as shown on lines 10-12 above A cap on the equity percentage of PECO's capital structure shall be 55.75%.

Long Term Interest (117, sum of 62.c through 67.c), Excluding LVT Interest (Note G)

- ROE will be supported in the original filing and no change in ROE may be made absent FERC authorization pursuant to a section 205 or section 206.
- D The Account 216.1 balance is input only if positive number in the FERC Form No. 1 (112.12.c).
- Sum of transmission related electric and common amortized investment tax credit amounts. Total electric amount allocated to transmission as follows: (1) amounts solely related to transmission; (2) amounts solely related to distribution, gas or non-utility allocated 0% to transmission; (3) amounts related to electric general allocated using the wages and salaries allocator (Attachment H-7, p. 4, line 11, column (5)); (4) amount related to common plant allocated to transmission using the wages and salaries allocator (Attachment H-7, p. 4, line 11, column (5)), multiplied by common utility plant percent to electric (per FF1 page 356).
- F Labor and Plant related taxes due to merger are to be excluded consistent with hold harmless commitment.
- G All short-term interest related expense will be removed from the formula rate template.

Criteria for Allocation:

- Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they shall not be included.

- Allocator. If the taxes are 100% recovered at retail they shall not be included.

 Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they shall not be included.

 Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator.

 Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above.

 Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year.

Attachment 6G PECO	

Attachment 7 PBOPs PECO Energy Company

Page 1 of 1

Calculation of PBOP Expenses

	(a)		(b)	(c)	(d)
			PECO Total		Electric
				Portion not	Col. (c) x Electric
				Capitalized	Labor in Note B
1	Total PBOP expenses allowed (Note A)		1,066,173	679,716	541,406
2	Total PBOP Expenses in A&G in the current year			(1,257,843)	(1,001,894)
3	PBOP Adjustment	Line 1 minus line 2			1,543,300

Notes:

A The source of the amounts from the Actuary Study supporting the amount in line 1, column (b) is the 3rd page of the attachment to the January 24, 2017 Willis Towers Watson report on PBOPs for PECO.

		\$	%
В	Electric Labor (354.28.b)	182,842,035	79.65%
	Gas Labor sum (355.62.b)	46,709,857	20.35%
	Total	229,551,892	

C The Willis Towers Watson report on PBOPs does not breakout the amount related to construction labor that is capitalized. As a result, the portion not capitalized is calculated as labor expensed divided by total labor.

- Notes:
 - Columns (A), (B), (C), and (D) are fixed and cannot be changed absent Commission approval or acceptance. The depreciation / amortization expense is calculated separately for each row.
- For Electric General and Common General plant, except FERC account 303, Column (E) is the remaining life of the assets in the account of plant added in each year is a vintage) weighted by the gross plant balance of each account or subaccount. The remaining life for each vintage is equal to the area under the Mortality Curve specified in Columns (C) and (D) using a half year convention for the first year placed in service. The weighted remaining life is calculated once a year at the beginning of the year.
- 3 For FERC accounts 303, 352 through 359 and 390 through 398, Column F is fixed and cannot be changed absent Commission approval or acceptance.
- 4 Column (G) is the depreciable amount of gross plant investment reported in the annual FERC Form No. 1 filing on pages 207 (Electric) and 356 (Common) by account or subaccount. Column (H) is the accumulated depreciation by account or subaccount.
- Column (I) is the end of year depreciable net plant in the account or subaccount.
- 6 Reserved
- 7 Reserved
- 8 At least every 5 years, PECO Energy Company will file with the Commission a depreciation study supporting its existing Estimated Life and Mortality Curve for each account or subaccount.
- 9 The depreciation expense associated with Asset Retirement Obligations (booked to accounts 359.1 and 399.1) are not included in the tables above.
- The life of each software or other intangible plant will be estimated at the time the plant is placed into service, and will not change over the life of the plant absent Commission approval or acceptance. The combined amortization expense for all intangible plant shall be the sum of each individual plant balance amortized over the life of each individual plant established in this manner.
- The depreciation expenses related to Common General Electric common plant. The depreciation expenses associated with Transportation Equipment and Power Operated Tools are excluded from Account 403 and directly assigned to the functional O&M and capital accounts based on use.

Notes:

EDIT data, including EDIT amortization amount and balance, for Protected, Non-Protected Property and Non-Protected, Non-Protected, Non-Protected Property and Non-Protected, Non-Protected Property - Transmission (Line 15): \$79,726,712; Protected Property - Transmission and Gas (Line 19): \$11,901,494; Non-Protected Property (Line 23): \$16,962,821; Non-Protected Non-Property (Line 26): \$260,021). The amortization schedule of the EDIT balance related to Tax Cuts and Job Act of 2017 shall be consistent with the following periods:

Protected: ARAM Non-Protected Property: 7 years Non-Protected, Non-Property: 5 years

The Non-Protected Property EDIT balance shall be fully amortized by the end of 2024 and the Non-Protected, non-Property EDIT balance shall be fully amortized by the end of 2022.

The data of the annual amortization amount and balance are from PECO's Tax Accounting records.

D EDIT balance was reclassified from ADIT to EDIT in December 2017.

PECO Energy Company Accumulated Deferred Income Taxes Remeasurement Attachment 9A - Deficient / (Excess) Deferred Income Taxes Worksheet

Instructions

In secondary with ASC 740, deferred are needs and liabilities are adjusted (pre-measured) for the effect of the change is tax law (including tex rates) in the period that the change is nearest. Adjustments are recorded in the appropriate (defeored income tax balance these accounts (Accounts 19), 231, 232 and 231) based on the nature of the enterior of the enterior of the contract of the enterior

Set the allocation percentages equal to the applicable percentages at the date of the rate change.

Notes

- C The allocation factors for lines 45 and 47 are subject to the change as reflected in Attachment 9 Excess / (Deficient) Deferred Income Taxes, lines 17 and 20.

For the 12 months ended 12/31/2020

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#) References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Notes:

The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income. Account

- Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 12, column 5 minus amortization of Regulatory Asset at page 3, line 7, column 5. For Prepayments, refer to Note K in Attachment 4.
- Page 3, Line 5: Attachment 5B, Line 4 Exclude: (1) amortization of CAP Shopping and Seamless Moves; (2) amortization of DSP IV Admin Costs; (3) Miscellaneous Advertising; (4) SEPA Solar Power Study; (5) PSU Sponsorship; (6) EU IT Prepaid Meter Assess O&M; and (7) Customer Operations AMI/CI O&M. Include Communications, Public Advocacy and Corporate Relations and Government and Regulatory Affairs and Public Policy expenses listed in Account 923 found at Form 1 323.184.b. Attachment 5B, Lines, 11, and 12 - Exclude EPRI Annual Membership Dues listed in Form 1 at 353.f, non-safety-related advertising included in Account 930.1 found at 323.191.b and Chamber of Commerce Dues and Civic Organization Expenses in Account 930.2 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.191.b and Chamber of Commerce Dues and Civic Organization Expenses in Account 930.2 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; include the costs related advertising included in Account 930.1 found at 323.192.b; included in Account 930.1 found at 323.192.b; included in Account 930.1 found at 323.192.b; included in Account 930.1 found at 323.192.b; included in Account 930.1 f
 - Fees and Remediation Expenditures (provided, that with regard to the Metal Bank Superfund), PECO must include as a credit any receipts received from the EPA and/or obtained through litigation with the remediation contractors related to Metal Bank Superfund). Attachment 5B, Line 9- include Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351,h., and exclude all other Regulatory Commission Expenses itemized at 351,h.
- Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income tax rate in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 36). Excess Deferred Income Taxes reduce income tax expense by the amount of the expense multiplied by (T/1-T).

Inputs Required: SIT= 9,99% (State Income Tax Rate or Composite SIT) 0.00% (percent of federal income tax deductible for state purposes)

- Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).
- Removes dollar amount of transmission plant to be included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those f when the generator is shut down.
- Reserved ROE will be supported in the original filing and no change in ROE may be made absent a Section 205 or Section 206 filing with FERC. The equity component of the capital structure will be capped at 55.75% and shall not be subject to change during the ROE Moratorium Period established under the Settlement Agreement in Docket No. ER17-1519. Thereafter, the cap shall be subject to change pursuant to sections 205 and 206 of the Federal Power Act.
- Reserved
- All items related to Contributions in Aid of Construction (CIAC), including investment in CIAC and CIAC related ADIT, excess/(deficient) ADIT and amortization of excess/(deficient) ADIT shall be excluded from the formula rate.
- Transmission-related ADIT, Excess/(Deficient) ADIT, and the amortization of Excess/(Deficient) ADIT, and the amortization of Excess/(Deficient) ADIT, and the amortization of Book Premiums on Reacquired Debt, Pension Expense Provision, Loss on Reacquired Debt, FAS 112 and Electric Rate Case Expense - Regulatory Asset - Current.
- ADIT, Excess/(Deficient) ADIT and the amortization of Excess/(Deficient) ADIT related to Accrued Benefits, Deferred Compensation, Vacation pay Change in Provision and Accrued Vacation shall be excluded from the formula rate
- All ADIT-190, ADIT-282, and ADIT-283 amounts reflected on Attachment 4C must be based on a timing difference between book expense recognition and expense recognition for tax purposes.
- Calculated using 13 month average balance, except ADIT.
- Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until FERC explicitly approves recovery of the cost of abandoned plant pursuant to Section 205 of the FPA.
- Recovery of Regulatory Asset is permitted only as specifically authorized pursuant to Section 205 or 206 of the FPA by FERC. Recovery of any regulatory assets not specifically identified in the initial version of this formula rate template approved by FERC in Docket No. ER17-1519-000 will require specific authorization from
- Excludes Asset Retirement Obligation balances
- Company shall include only gains and losses on interest rate locks associated with debt issuances. Absent a Section 205 filing, Company shall not include in the Formula Rate, the gains, losses, or costs related to other hedges.
- The Tax Effect of Permanent Differences captures the differences captures the differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference. Items that can be included in formula for recovery are AFUDC Equity, Meals & Entertainment (50%), Memberships & Dues Not Deductible, Additional Compensation to Employee Stock, and Life Insurance Premiums. Items that can not be included in formula for recovery are Dividend Received Deductions, Equity in Earnings of Unconsol. Subs, and Other Perms (Rabbi Trust). Commission authorization is required in order to include any other permanent difference as an adjustment to the income tax allowance computation in the Formula Rate Template.
- Calculated on Attachment 4A.
- Unfunded Reserves are customer contributed capital such as when Injuries and Damages expense is accrued but not yet incurred. Also, pursuant to Special Instructions to Accounts 228.1 through 228.4, no amounts shall be credited to accounts 228.1 through 228.4 unless authorized by a regulatory authority or authorities to be collected in a utility's rates.
- Amortization of Regulatory Asset for Environmental Remediation of Manufactured Gas Plants shall be excluded from the formula rate.

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
- Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable.
- Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities.
 Gross plant does not include Unmortized Abandoned Plant.
 Project NF Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes any regulatory asset, which are to be entered as separate line items.
- Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 14. Project Depreciation Expense includes the amortization of Abandoned Plant Times Up Adjustment is calculated on the Attachment 3 Project Tuve-up Schedule for the Rate Year
 The Net Rev Req is the value to be used in the rate calculation under the applicable Schedule 12 under the PJM OATT for each project.

- The Net Rev Nee, as the value to be used in the relationation under the adjustment of the capture (see Apropose).

 The Total General, Intangable and Common Depreciation Depreciation expenses exception expenses directly associated with a project and thereby included in page 2 column 9.

 The Unamortized Abandoned Plant balance is included in NeP flant, and Amortization founded Plant is included in Depreciation's Amortization for Senses.

 The Competitive Red Concession is the revenue, if any, that the company agreed to, for instance, to be selected to bail disclibites are least of a competitive process and equals the amount by which the annual revenue requirement is reduced from the ceiling rate

- Requires approaches the recommendation in th
- over the remaining months of the Rate Year.

 Zonal on line 17a refers to all projects not qualifying for regional recovery

 Additional refund \$850,00 per year for 2018-2021 and \$0 for 2022 and beyond.

22	Return and Income Taxes wi	th 100 basis point increase in ROE	(Sum lines 7 & 21)						98,091,746
24 25 26 27	Incremental Return and Incor Rate Base (line 1)		(Sum lines 23 & 24) (Line 22 - line 25) I by Rate Base	(Line 26 / line 27)					73,305,660 17,270,624 90,576,284 7,515,463 995,284,151 0.0076

- A Line 5 includes a 100 basis point increase in ROE that is used only to determine the increase in return and income taxes associated with a 100 basis point increase in ROE. Any actual ROE incentive must be approved by the Commission. For example, if the Commission were to grant a 137 basis point ROE incentive, the increase in return and taxes for a 100 basis point increase in ROE would be multiplied by 1.37 on Attachment 1 column 12.
- B The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H-7 that are not the result of a timing difference

- Notes:
 1) From Attachment 1, line 17, col. 14 for the projection for the Rate Year.
 2) From Attachment 1, line 17, col. 14, less col. 15(a) for each project and Attachment H-7, line 7 for zonal.
 3) "Revenue Received" on line 3 Zonal, Col. (E), is the total amount of revenue received for the True-Up Year under PJM OATT Attachments 7, 8 and H-7 and "Revenue Received" on letter-denominated line 3 entries, Col. (E), is the amount of revenue received for the True-Up
- Year for the project designated in Cols. A and B under PJM OATT Schedule 12 PECO Appendix and PECO Appendix A as reported on pages 328-330 of the Form No 1. The Revenue Received in Col. E excludes any True-Up revenues
- 4) Interest from Attachment 6.
- 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

Prior Period Adjustments

	(a)	(b)	(c)	(d)
	Prior Period Adjustments	Amount	Interest	Total
	(Note B)	In Dollars	(Note B)	Col. (b) + Col. (c)
5		(117,723)	-	(117,723)

- A For each project or Attachment H, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H and any Projects paid by the RTO to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col.(G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).
- B Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. Interest will be calculated for the prior period adjustment based on the FERC Refund interest rate specified in 18 CFR 35.19(a) for the period up to the date the projected rates went into effect. PECO will provide the supporting worksheet for the interest calculation when prior period adjustment is needed.
- The Actual Revenue Requirement in the True-up Adjustment calculation for years 2020 and later shall use the depreciation and amortization rates approved for use by the Commission when PECO performs the True-Up Adjustment.

Notes:

- A Recovery of regulatory asset is limited to any regulatory assets authorized by FERC.
- Recovery of abandoned plant is limited to any abandoned plant recovery authorized by FERC.
- C Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1. The demonstration in (iii) above will show that monthly debts and credits do not contain entries for AFUDC for each CWIP project in rate base.
- D ADIT and Accumulated Deferred Income Tax Credits are computed using the average of the beginning of the year and the end of the year balances. The projection will use lines 16, 19 and 36 of Attachment 4A to populate the average ADIT balance on line 28 above.
- E Recovery of a Regulatory Asset is permitted only for pre-commercial and formation expenses, and is subject to FERC approval before the amortization of the Regulatory Asset can be included in rates. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the weighted cost of capital will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.
- F Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.
- G The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account.) Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offsetting balance sheet account.
- H Calculate using 13 month average balance, except ADIT. SERP will not be included as an unfunded reserve in the formula rate.
- Projected balances are for the calendar year the revenue under this formula begins to be charged.
- J Excludes ARO amounts.
- K Total prepayments, including Fleet Activity, allocated to transmission as follows: (1) amounts solely related to transmission allocated 100% to transmission; (2) amounts solely related to distribution, gas or non-utility allocated 0% to transmission; (3) amounts related to electric general allocated using the wages and salaries allocator (Attachment H-7, p. 4, line 11, column (5)), (4) amounts related to common labor or plant allocated using the wages and salaries allocator (Attachment H-7, p. 4, line 11, column (5)), multiplied by either common labor percent to electric (per FF1 page 35) os a spicioside depending upon the nature of the prepayment iren.
- L TLF shall be equal to 50 percent of the lesser of (a) the transmission portion of FERC Form 1, page 227, line 5, column c per FERC Form No. 1) and (b) \$9 million. The TLF recovery percentage and cap will be subject to modification only through Commission authorization under section 205 or section 206 of the Federal Power Act.

				,,
	Revenue Adjustment to determine Revenue Credit			
16a	Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not			
	received as a LSE), for which the cost of the service is recovered under this formula, except as			
	specifically provided for elsewhere in this Attachment or elsewhere in the formula, will be included			
	as a revenue credit in line 2; provided, that the revenue credit on line 2 will not include revenues			
	associated with transmission service the loads for which are included in the rate divisor in			
	Attachment H-7, page 1, line 11.			-
16b	Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are			
	included in the Rates, the associated revenues are included in the Rates. If the costs associated with			
	the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated			
	revenues are not included in the Rates.			
16c				
	Note 3: Ratemaking treatment for the following specified secondary uses of transmission assets: (1)			
	right-of-way leases and leases for space on transmission facilities for telecommunications; (2)			
	transmission tower licenses for wireless antennas; (3) right-of-way property leases for farming,			
	grazing or nurseries; (4) licenses of intellectual property (including a portable oil degasification			
	process and scheduling software); and (5) transmission maintenance and consulting services			
	(including energized circuit maintenance, high-voltage substation maintenance, safety training,			
	transformer oil testing, and circuit breaker testing) to other utilities and large customers			
	(collectively, products). Company will retain 50% of net revenues consistent with Pacific Gas and			
	Electric Company, 90 FERC ¶ 61,314. Note: in order to use lines 17a - 17g, the utility must track in			
	separate subaccounts and by department the revenues and costs associated with each secondary use			
	(except for the cost of the associated income taxes). The cost associated with the secondary transmission use is 3/4 of the total department costs.			
	transmission use is 3/4 of the total department costs.			
17a	Revenues included in lines 1-11 which are subject to 50/50 sharing.			7,774,819

Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they shall not be included.
- B Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they shall not be included.
- C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator.
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above.
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year.

Attachment 7 PBOPs PECO Energy Company

Page 1 of 1

Calculation of PBOP Expenses

	(a)		(b) PECO Total	(c)	(d) Electric
				Portion not Capitalized	Col. (c) x Electric Labor in Note B
1	Total PBOP expenses allowed (Note A)		1,066,173	679,716	541,406
2	Total PBOP Expenses in A&G in the current year			(1,257,843)	(1,001,894)
3	PBOP Adjustment	Line 1 minus line 2			1,543,300

Notes:

A The source of the amounts from the Actuary Study supporting the amount in line 1, column (b) is the 3rd page of the attachment to the January 24, 2017 Willis Towers Watson report on PBOPs for PECO.

		\$	%
В	Electric Labor (354.28.b)	182,842,035	79.65%
	Gas Labor sum (355.62.b)	46,709,857	20.35%
	Total	229,551,892	

C The Willis Towers Watson report on PBOPs does not breakout the amount related to construction labor that is capitalized. As a result, the portion not capitalized is calculated as labor expensed divided by total labor.

Page 4 of 4

- Notes:
- 1 Columns (A), (B), (C), and (D) are fixed and cannot be changed absent Commission approval or acceptance. The depreciation / amortization expense is calculated separately for each row.
- For Electric General and Common General plant, except FERC account 303, Column (E) is the remaining life of the assets in the account for each vintage (amount of plant added in each year is a vintage) weighted by the gross plant balance of each account or subaccount. The remaining life for each vintage is equal to the area under the Mortality Curve specified in Columns (C) and (D) using a half year convention for the first year placed in service. The weighted remaining life is calculated once a year at the beginning of the year.
- 3 For FERC accounts 303, 352 through 359 and 390 through 398, Column F is fixed and cannot be changed absent Commission approval or acceptance.
- 4 Column (G) is the depreciable amount of gross plant investment reported in the annual FERC Form No. 1 filing on pages 207 (Electric) and 356 (Common) by account or subaccount. Column (H) is the accumulated depreciation by account or subaccount.
- Column (I) is the end of year depreciable net plant in the account or subaccount.
- 6 Reserved
- 7 Reserved
- 8 At least every 5 years, PECO Energy Company will file with the Commission a depreciation study supporting its existing Estimated Life and Mortality Curve for each account or subaccount.
- 9 The depreciation expense associated with Asset Retirement Obligations (booked to accounts 359.1 and 399.1) are not included in the tables above.
- The life of each software or other intangible plant will be estimated at the time the plant is placed into service, and will not change over the life of each individual plant established in this manner.
- The depreciation expenses related to Common General Electric common plant. The depreciation expenses associated with Transportation Equipment and Power Operated Tools are excluded from Account 403 and directly assigned to the functional O&M and capital accounts based on use.

Attachment 9 Excess / (Deficient) Deferred Income Taxes (Note B and Attachment H-7 Notes N, O and P)

Notes:

EDIT data, including EDIT amortization amount and balance, for Protected, Non-Protected Property and Non-Protected, Non-Protected, Non-Protected Property and Non-Protected, Non-Protected Property - Transmission (Line 15): \$79,726,712; Protected Property - Transmission and Gas (Line 19): \$11,901,494; Non-Protected Property (Line 23): \$16,962,821; Non-Protected Non-Property (Line 26): \$260,021). The amortization schedule of the EDIT balance related to Tax Cuts and Job Act of 2017 shall be consistent with the following periods:

Protected: ARAM Non-Protected Property: 7 years Non-Protected, Non-Property: 5 years

The Non-Protected Property EDIT balance shall be fully amortized by the end of 2024 and the Non-Protected, non-Property EDIT balance shall be fully amortized by the end of 2022.

The data of the annual amortization amount and balance are from PECO's Tax Accounting records.

EDIT balance was reclassified from ADIT to EDIT in December 2017.

In secondary with ASC 760, deferred tax must, and liabilities are adjusted (presented) for the effect of the change is tax tow (necleding tax rates) in the paried that the change is extended. Adjustments are recorded in the appropriate deferred known to takene other accounts (Accounts 109, 201, 223 and 223) based on the nature of the temporary difference and the related classification registerates for the accounts. If an a result of actions or expected action by a regulator, it is proble that the effect of a remove of electrons in taxes psychle resulting from a change in tax less or rates will be recovered from or passed through to extensive through tenter rates, a regulatory act or liability is recognized in Accounts 123. (Other Regulatory Assets), or Accounts 244 (Other Regulatory Labilities), as appropriate, for that probable future revenue. The amortization of deficient and excess deferred income taxes that will be recovered from or passed through to customers through future rates will be recovered from the revenue of the revenue or probable future revenue or continuous accounts and the revenue or passed through to customers through future rates will be recovered from the revenue or passed through to customers through future rates will be recovered in FEEC Accounts 410. [Powtonion for Deferred Room Taxes, Chilly Operating Johnson For Deferred Roomers Taxes, Chilly Operating Roomers and Taxes and the revenue or reduction of the revenue or reduction of the revenue or reduction of the revenue or reduction of the revenue or reduction of the revenue or reduction of the revenue or reduction of the regulator account 411.2 (Provision for Deferred Roomer Taxes, Chilly Operation Roomers Roomers, Children Roomers Roomers, Children Roomers Roomers, Children Roomers, Roomers Roomers, Children Roomers, Roomers, Children Roomers, Roomers, Children Roomers, Roomers, Children Roomers, Roomers, Children Roomers, Roomers, Children Roomers, Roomers, Children Roomers, Roomers, Children Roomers, Roomers, Children Roomers, Roomer

2. Set the allocation percentages equal to the applicable percentages at the date of the rate change.

Notes

- C The allocation factors for lines 45 and 47 are subject to the change as reflected in Attachment 9 Excess / (Deficient) Deferred Income Taxes, lines 17 and 20.

Incl

Appendix 3
Additional Workpapers Required by the Protocols

Supporting documentation and workpapers for Attachment H-7A, Attachment 3 Project True-Up will include for each new Schedule 12 tariffed project listed individually on letter-denominated Line 3 entries documentation of: (1) the month in which project construction began and the date upon which the project (or first operationally in service portion of the project) was placed in service,

- (2) the current budgeted project costs as listed on the PJM website, and
- (3) the costs cleared to plant in service as of December 31 of the True-Up Year.

For the True-Up Year plus the preceding December, supporting documentation in electronic spreadsheet format will also include end-of-month gross plant balances for:

- (1) each Schedule 12 project listed individually on letter-denominated Line 3 entries and
- (2) the sum of the non-Schedule 12 projects included in the Attachment H-7A, Attachment 3, Line 3 Zonal entry.

In addition, PECO will provide a workpaper that lists the original in-service cost for each Schedule 12 tariffed project that is 100% allocated to PECO;

New Schedule 12 tarriffed projects listed individually:

Protocol F.3

Schedule 12 tarriffed projects that are 100% allocated to PECO:

Project Description	RTO Number	Original In-Service Cost	Notes
Upgrade two 230 kV breakers at Whitpain #235 and #325	b0005	-	Α
Upgrade Plymouth Meeting 230 kV breakers #215	b0022	-	Α
Add capacitors in north Philadelphia - Buckingham	b0043.1	1,232,268	
Add capacitors in north Philadelphia - Woodburne	b0043.2	1,736,497	
Add capacitors in north Philadelphia - North Wales	b0043.3	1,525,973	
Replace Richmond 69KV breaker #20 with 40,000 A	b0044	-	Α
Jumper out Richmond 69KV breaker #40	b0045	-	Α
Replace Richmond 69KV breaker #120 with 40,000 A	b0047	-	Α
Add a new Roxborough 69kV breaker (#215)	b0059	42,984	
Circuit Breaker Upgrades at Whitpain - 230kV bus breakers #125 and #215	b0175	-	Α
Replace Whitpain 230kV circuit breaker #165	b0180	-	Α
Replace Whitpain 230kV circuit breaker #J105	b0181	-	Α
Upgrade Plymouth Meeting 230kV circuit breaker #125	b0182	-	Α
Install three 28.8MVAR capacitors at Planebrook 35kV substation	b0205	3,631,396	
Replace two wave traps and ammeter at Peach Bottom, and two wave traps and ammeter at Newlinville 230l	kV		
substations	b0266	238,283	
Upgrade North Wales breaker #105	b0269.7	-	Α
Upgrade Waneeta 230 kV breaker '285'	b0269.8	-	Α
Install 161MVAR capacitor at Warrington 230 kV substation	b0280.1	2,784,541	
Install 161MVAR capacitor at Bradford 230 kV substation	b0280.2	3,506,480	
Install 28.8MVAR capacitor at Warrington 34kV substation	b0280.3	745,859	
Install 18MVAR capacitor at Waverly 13.8kV substation	b0280.4	-	Α
Tunnel - Grays Ferry 230kV - Replace terminal equipment 220-89 line	b0351	26,751	
Tunnel - Parrish 230kV - Replace terminal equipment 220-27 line	b0352	25,452	
Install 3% reactors on both lines from Eddystone - Lianerch	b0353.1	1,274,337	
Install identical second 230/138kV transformer in parallel with existing transformer at Plymouth Meeting	b0353.2	8,251,051	
Replace Whitpain 230 kV breaker 135	b0353.3	752,100	
Replace Whitpain 230 kV breaker 145	b0353.4	752,100	
Eddystone - Island Rd Upgrade line terminal equipment(CB # 235, three disconnect switches and two CTs) -	new		
emergency rating of 1411 MVA, same impedance data	b0354	-	Α
Install SPS at Chichester	b0413	-	Α
Whitpain PRA 500/230kV Transformer	b0438	1,026,041	
Peach Bottom PRA 500/230kV Transformer	b0443	-	Α
Replace station cable at Hartman on the Warrington - Hartman 230 kV circuit	b0508.1	23,428	
Jarrett - Heaton - Upgrade 230kV line terminal equipment (220-51 line)	b0509	309,935	
Replace Plymouth Meeting 230 kV breaker '335'	b0829.5	-	Α
Install a 2nd 230/138 kV XFMR and 35 MVAR CAP at Heaton 138 kV bus	b0842	10,850,110	
Replace Heaton 138kV breaker '150'	b0842.1	241,114	
Install a 75 MVAR CAP at Llanerch 138 kV bus	b0843	5,870,803	
Replace station cable at Whitpain and Jarrett substations on the Jarrett - Whitpain 230 kV circuit 220-52	b0920	87,808	
Replace Breaker #115 at Printz 230 kV substation	b1015.1	24,621	
Replace Breaker #125 at Printz 230 kV substation	b1015.2	24,621	

Install 2 new 230 kV breakers at Planebrook (on the 220-02 line terminal and on the 230 kV side of the #9			
transformer)	b1073	2,359,200	
Upgrade Richmond 230 kV breaker '525'	b1156.1	36,862	
Replace Emilie 138 kV breaker '190'	b1156.12	913,027	
Upgrade Richmond 230 kV breaker '415'	b1156.2	-	Α
Upgrade Richmond 230 kV breaker '475'	b1156.3	2,908	
Upgrade Richmond 230 kV breaker '575'	b1156.4	29,209	
Upgrade Richmond 230 kV breaker '185'	b1156.5	582	
Upgrade Richmond 230 kV breaker '285'	b1156.6	-	Α
Upgrade Waneeta 230 kV breaker '85'	b1156.7	595,249	
Replace Waneeta 230 kV breaker '425'	b1156.8	1,482,474	
Replace Emilie 230 kV breaker '815'	b1156.9	443,960	
Replace terminal equipment at Eddystone and Saville. Replace underground section of the line	b1179	3,239,637	
Replace terminal equipment at Chichester	b1180.1	255,514	
Replace terminal equipment at Chichester	b1180.2	255,514	
Install 230/138 kV transformer at Eddystone	b1181	3,064,183	
Replace 230/69 kV transformer #6 at Cromby. Add two 50 MVAR 230 kV banks at Cromby	b1183	10,821,904	
Add 138 kV breakers at Cromby, Perkiomen, and North Wales. Add a 35 MVAR capacitor at Perkiomen 138 kV	b1184	4,990,213	
Upgrade Eddystone 230 kV breaker #365	b1185	-	Α
Upgrade Eddystone 230 kV breaker #785	b1186	372,437	
Reconductor the PECO portion of the Burlington - Croydon circuit, replace some towers, and replace aerial wire at			
Croydon.	b1197	1,550,007	
Replace terminal equipment including station cable, disconnects and relay at Conowingo 230 kV station	b1198	282,071	
Upgrade Printz 230 kV breaker '225'	b1338	252,355	
Upgrade Printz 230 kV breaker '315'	b1339	617,757	
Upgrade Printz 230 kV breaker '215'	b1340	448,523	
Reconductor the Crescentville - Foxchase 138 kV circuit	b1718	1,095,241	
Reconductor the Foxchase - Bluegrass 138 kV circuit	b1719	1,067,669	
Increase the effective rating of the Eddystone 230/138 kV transformer by replacing a circuit breaker at Eddystone	b1720	255,349	
Increase the rating of the Waneeta - Tuna 138 kV circuit by replacing two 138 kV CTs at Waneeta	b1721	16,371	
Increase the normal rating of the Cedarbrook - Whitemarsh 69 kV circuit by changing the CT ratio and replacing sta	at b1722	16,550	
Install 39 MVAR capacitor at Cromby 138 kV bus	b1768	4,809,675	
Replace Waneeta 138 kV breaker '15' with 63 kA rated breaker	b2130	668,084	
Replace Waneeta 138 kV breaker '35' with 63 kA rated breaker	b2131	522,525	
Replace Waneeta 138 kV breaker '895' with 63 kA rated breaker	b2133	417,640	
Replace two sections of conductor inside Richmond substation	b2145	-	Α
Install a second Eddystone 230/138 kV transformer	b2222	20,342,771	
Replace the Eddystone 138 kV #205 breaker with 63kA breaker	b2222.1	272,372	
Increase Rating of Eddystone #415 138kV Breaker	b2222.2	425,581	
50 MVAR reactor at Buckingham 230 kV	b2236	5,578,133	
Replace Whitpain 230 kV breaker '155' with 80kA breaker	b2527	509,794	
Replace Whitpain 230 kV breaker '525' with 80kA breaker	b2528	474,748	
Replace Whitpain 230 kV breaker '175' with 80kA breaker	b2529	463,898	
Replace terminal equipment inside Chichester substation on the 220-36 (Chichester – Eddystone) 230 kV line	b2549	306,063	
Replace terminal equipment inside Nottingham substation on the 220-05 (Nottingham - Daleville - Bradford) 230 k	V b2550	12,913	
Replace terminal equipment inside Llanerch substation on the 130-45 (Eddystone to Llanerch) 138 kV line	b2551	249,700	
Replace the Peach Bottom 500 kV '#225' breaker with a 63kA breaker	b2572	772,840	

Reconductor the Emilie - Falls 138 kV line, and and replace station cable and relay	b2774	5,399,046	
Reconductor the Falls - U.S. Steel 138 kV line	b2775	95,316	
Replace the Waneeta 230kV "285" with 63kA breaker	b2850	- A	A
Replace the Chichester 230kV "195" with 63kA breaker	b2852	- B	3
Replace the North Philadelphia 230kV "CS 775" with 63kA breaker	b2854	2,123,320	
Replace the North Philadelphia 230kV "CS 885" with 63kA breaker	b2855	2,158,251	
Replace the Parrish 230kV "CS 715" with 63kA breaker	b2856	1,490,758	
Replace the Plymouth Meeting 230kV "215" with 63kA breaker	b2859	374,445	
Replace the Plymouth Meeting 230kV "235" with 63kA breaker	b2860	440,571	
Replace the Plymouth Meeting 230kV "325" with 63kA breaker	b2861	394,525	
Replace the Grays Ferry 230kV "705" with 63kA breaker	b2862	598,664	
Replace the Grays Ferry 230kV "985" with 63kA breaker	b2863	- A	4
Replace the Grays Ferry 230kV "775" with 63kA breaker	b2864	629,876	
Replace the Chichester 230kV '215' breaker with 63kA breaker	b2926	1,720,636	
Replace the Plymouth Meeting 230kV '125' breaker with 63kA breaker	b2927	359,055	
Total	_	131,060,517	

Notes:

A: Work was completed and the cost included as part of another Schedule 12 tariffed project 100% allocated to PECO and as such, the cost for this project is not being presented separately.

B: No field work was required for this project.

Protocol F.4

Provide supporting documentation for Attachment H-7B that will include workpapers showing that the income tax/(credit) for excess deferred income taxes is only related to the current year and reconciling input balances to the appropriate FERC Form No. 1 data

Income Tax Expense PECO Energy Company

Line	Title of Account	FERC Form 1 Reference	Transmission ¹ (A)	TCJA Related FAS109 Amortization ² (B)	MDTAC ³ (C)	AFUDC Equity ⁴ (D)	Total Transmission (Columns A+B+C+D) (E)	Distribution / Other ⁵ (F)	FERC Form 1 ⁶ (Columns E+F)

Notes:

¹Represents the income tax accrual attributable to transmission related activity.

²Represents the current year amortization of excess deferred taxes attributable to the Tax Jobs & Cuts Act (TCJA).

³Represents the current year reversal / amortization of income tax regulatory assets / liabilities (i.e. Excess Deferred Taxes [Non-TCJA]), Repair Allowance and Federal and State Flow Through).

⁴Represents the current year origination and reversal of income tax regulatory asset / liabilities attributable to AFUDC Equity.

⁵Represents income tax accrual attributable to distribution and other related activity

 $^6\mbox{Represents total income tax accrual reflected on the FERC Form 1.}$

Protocol F.14

Include a workpaper with a breakdown of all Service Company costs allocated to and incurred by PECO and recognized in its Annual FERC Form No. 1, including costs recorded in Account 923. This breakdown will show the Service Company costs allocated to and incurred at PECO by FERC Account and expense item, and will be reconciled to both Exelon Business Services Company (BSC)'s Annual Form 60, Schedule XVII – Analysis of Billing – Associate Companies (Account 457), Line 31 (or the equivalent line number should that line number change) in addition to the inputs included in the annual transmission formula rate template

PECO Energy 2020 Exelon Service Company Allocated Costs to PECO

Attachment 6H – CW Edison Formula Rate Update Filing

April 16, 2021

Kimberly Bose Secretary Federal Energy Regulatory Commission 888 First Street, N.E. Washington, D.C., 20426

Re: Commonwealth Edison Company and Commonwealth Edison Company of Indiana, Inc., Informational Filing of Formula Rate Annual Update

<u>Docket No. ER09-1145-000</u>

Dear Secretary Bose

Attached for informational purposes in the above-referenced proceeding, please find the 2021 Annual Update of Commonwealth Edison Company ("ComEd"). This informational filing is required pursuant to the Settlement Agreement approved by the Federal Energy Regulatory Commission ("Commission") on January 16, 2008 in Docket No. ER07-583, and Section 1(b) of the Formula Rate Implementation Protocols in Attachment H-13B of PJM Interconnection, LLC's ("PJM") Open Access Transmission Tariff ("OATT"). Under Attachment H-13B and the Settlement Agreement, on or before May 15 of each calendar year ComEd recalculates its Annual Transmission Revenue Requirement and submits an Annual Update for the upcoming Rate Year. *See* Attachment H-13B §§ 1(a)-(b). The Annual Update is to be submitted to the Commission as an informational filing each rate year.²

The March 12, 2010 Letter Order accepting ComEd's 2009 Annual Update established the procedure for the Annual Update filings:

This letter also advises ComEd that annual updates in the forthcoming years should be submitted, for informational purposes only, in Docket No. ER09-1145-000. Upon receipt, the Commission will not act on or notice the informational filing because the formula rate implementation protocols provide specific procedures for notice, review, and challenges to the annual updates.³

¹ Commonwealth Edison Co., 122 FERC ¶ 61,030 (2008) ("January 16 Order")

² The protocols require that ComEd submit the Annual Update by May 15 of each rate year, unless the date for making the Annual Update falls on a weekend, then the filing may be made on the next business day. *See* ComEd Protocols, § 1.c.

³ Letter Order Accepting Commonwealth Edison Company's 5/15/09 filing of the 2009 Formula Rate Annual Update, Docket No. ER09-1145 (Mar. 12, 2010).

Attachment 1 to this Annual Update is a copy of the ComEd formula rate (Attachment H-13A to the PJM OATT) populated with 2020 inputs. This populated formula rate will be used by PJM to determine charges for service to the ComEd zone during the June 1, 2021 through May 31, 2022 rate period. A copy of this document in Excel format is being provided along with service of this Annual Update to the persons on the official service list in ComEd's last rate case, Docket No. ER07-583, as well as the Manager of Accounting of the Illinois Commerce Commission ("ICC"). ComEd has requested PJM to post this filing on the PJM website. As required by the implementation protocols, notice of an Annual Meeting to be held on June 5, 2020 also is being provided on the PJM website. The Annual Meeting will permit ComEd to explain the Annual Update and will provide interested parties an opportunity to seek information and clarifications about the Annual Update.

I. Required Information

ComEd has prepared the 2021 Annual Update in a manner consistent with its protocols, as set forth in Attachment H-13B of the PJM Tariff, and reflecting the guidance issued by Commission Staff on July 17, 2014.⁴

Section 1(g)(iii) and (iv) of the Protocols and Section 4.7 of the Settlement Agreement identify certain information that is to be provided in the Annual Update. This information is provided herein and in the referenced attachments. Consistent with Commission Staff guidance, in addition to the PDF package, ComEd is submitting the formula templates and attachments/workpapers in Excel format, with the formulas intact.⁵ Additional information provided to be consistent with the Staff Guidance is included as Attachment No. 15.⁶

A. 2020 FERC Form No. 1

In accordance with Section 1(g)(iii)(1), a copy of ComEd's FERC Form No. 1 is available for download through the Commission's elibrary, accessible at elibrary.ferc.gov. ComEd submitted the 2020 FERC Form No. 1 to FERC on March 26, 2021.

B. Changes to Formula References to the FERC Form No. 1

In accordance with Section 1(g)(iii)(2), ComEd has identified one change in the formula references to the FERC Form No 1. Attachment 2, which serves as the placeholder for this protocol item identifying this change. The change relates to new depreciable asset subcategories related to FERC Account 397 – Communications Equipment which was added to FERC Form 1. Accordingly, the instruction for the calculation on Attachment 5, Line 88 of the

⁴ See Staff's Guidance on Formula Rate Updates, available at http://www.ferc.gov/industries/electric/indus-act/oatt-reform/staff-guidance.pdf.

⁵ See Staff Guidance at 1 ("Format").

⁶ On November 21, 2019, the Commission issued Order No. 864. *Public Utility Transmission Rate Changes to Address Accumulated Deferred Income Taxes*, Order No. 864, 84 Fed. Reg. 65,281, 169 FERC ¶ 61,139 (2019). The ER19-5 Settlement provides that the formula rate reflected in this Annual Update include all the information and rate modifications required in Order No. 864. ER19-5 Settlement, at P 3.4.

Formula Rate which includes FERC Account 397 – Communications Equipment has been updated to include the additional FERC line item.

C. Adjustments to FERC Form 1 Data in Formula Inputs

Section 1(g)(iii)(3) of the Protocols requires identification of any adjustments to FERC Form No. 1 data in determining formula inputs. In 2012, the Commission approved the merger of Exelon Corporation ("Exelon"), which is ComEd's parent company, and Constellation Energy Group, Inc. ("Constellation") and their respective public utility subsidiaries. Exelon Corp., 138 FERC ¶ 61,167 (2012) ("Constellation Approval"). On November 20, 2014, the Commission approved the merger of Exelon and Pepco Holdings, Inc. ("PHI") and their respective public utility subsidiaries. Exelon Corp., 149 FERC ¶ 61,148 (2014) ("PHI Approval"). As part of their applications to the Commission for authorization to merge, the companies committed to hold transmission customers harmless for five years from costs related to the merger. The Commission accepted these hold harmless commitments. See Constellation Approval at P 118; PHI Approval at P 105. The five-year commitment to hold customers harmless from costs related to the 2012 Constellation merger expired in 2017, however ComEd has elected to continue to remove those merger related costs from the 2021 filing. Consistent with the hold harmless commitment for the PHI merger, no transaction-related costs or transition costs related to that merger are included among the costs to be recovered through the 2021 Annual Update. Accordingly, ComEd has adjusted inputs from the FERC Form 1 to remove merger-related costs. These adjustments are detailed in Attachment No. 15. Consistent with the Commission's Orders, recovery of excluded merger costs will occur only upon the Commission's acceptance of a filing seeking recovery of the costs made pursuant to the instructions in the Commission's Orders.

ComEd made an adjustment to the FERC Form 1 data reported on Appendix A, Line 60 (transmission lease payments). The FERC Form 1 entry includes the lease payments related to the distribution equipment housed in the Willis Tower. The amount reported in the FERC Form 1 is properly recovered from ComEd's retail customers, and thus has been excluded from the transmission formula rate.

The details of these adjustments are included in Attachment No. 15, which consistent with the Staff Guidance, also includes supporting documentation for the formula rate entry for Attachment 5, Line 65, which is not sourced from the FERC Form 1.

Additionally ComEd has included adjustments required by the ER19-5 Settlement. The support for the ER19-5 Settlement adjustment is included in Attachment No. 15.

D. 2020 ICC Annual Report

In accordance with Section 1(g)(iii)(4) of the Protocols, a copy of ComEd's 2020 Annual Report filed with the ICC (Form 21) is included as Attachment No. 3.

E. Statement Regarding Certain Rate Filings with any Federal, State, or Other Regulatory Body that has Jurisdiction

Section 1(g)(iii)(5) of the Protocols requires a statement describing the extent to which operating revenues are subject to refund for the period covered by the Annual Update for each rate change filed with any federal, state or other regulatory body that has jurisdiction, as well as copies of any orders in which applications for a rate increase have been acted on by any regulatory body during the period covered by the Annual Update and a copy of any transmittal letter or equivalent written document by which ComEd summarized and submitted any pending applications that have not been acted upon.

ComEd did not record any revenues subject to refund in 2020.

F. Reconciliation of Monthly Peak Demands

Section 1(g)(iii)(6) of the Protocols requires a reconciliation of monthly peak demands shown on FERC Form No. 1 and monthly peak demands used in the formula.

The 2020 ComEd Zonal Peak Load reported by PJM is 20,220 MW and matches the peak load reported on page 401b of the 2020 FERC Form No. 1. No reconciliation is necessary.

G. Uniform System of Accounts Itemization

Section 1(g)(iii)(7) of the Protocols requires an itemization of each of the following accounts of the Uniform System of Accounts by sub-account:

- i. Account 165 Prepayments. See Attachment No. 4.
- ii. Account 454 Rent From Electric Property. See Attachment No. 5.
- iii. Account 456 Other Electric Revenues. See Attachment No. 6.
- iv. Account 303 Miscellaneous Intangible Plant. See Attachment No. 7.
- v. Account 397 General Plant (Communications Equipment). *See* Attachment No. 8.
- vi. Account 105 Land Held for Future Use. See Item H, infra.
- vii. Account 255 Accumulated Deferred Investment Tax Credits. *See* Attachment No. 10.
- viii. Account 450 Forfeited Discounts. See Attachment No. 11.
- ix. Account 451 Miscellaneous Service Revenues. See Attachment No. 12.

Communications equipment recorded under Account 397 is functionalized based on the results of ComEd's most recent locational direct assignment study allocating communications equipment. Section 4.7 of the Settlement Agreement approved in the January 16 Order requires ComEd to update the study analysis each year and provide the updated study as part of the information included with its Annual Update. The updated functionalization study for Account 397 is included in Attachment No. 8.

Additionally, the ER19-5 Settlement requires ComEd to provide certain workpapers with each annual update concerning Accumulated Deferred Income Tax Support; AFUDC Equity Depreciation; and Asset Retirements. Those workpapers are included in Attachment No. 15.

H. Land Held for Future Use

Section 1(g)(iii)(8) of the Protocols specifically requires a description of the intended use for each piece of land within 15 years of the rate base determination period. A plan identifying the date of intended use for land held for transmission purposes in the Uniform Systems of Accounts - Account 105 is provided in Attachment No. 9.

I. Factors Influencing Change in Annual Revenue Requirement

Section 1(g)(iii)(9) of the Protocols requires a description of those factors influencing any change in the annual revenue requirement, including identification of any respects in which charges under the formula rate materially differ from the preceding Annual Update (e.g., due to changes in accounting procedures, the purchase or sale of major assets, or other such significant changes) and identification of the major reason(s) for the differences, if any, between the Annual Update and the prior year's Annual Update.

ComEd's 2020 Annual Update included a net zonal revenue requirement of \$718M, applicable from June 2020 through May 2021. ComEd's 2021 Annual Update includes a net zonal revenue requirement of \$763M.

The primary drivers of the increase relate to increased rate base due to 2020 plant additions, depreciation expense and 2021 projected plant additions⁷. The plant related costs are in large part attributable to transformer upgrades/replacements and reliability projects such as installation of capacitor banks which allow better control of voltage flows, installation of circuit breakers to increase operational flexibility and resiliency, line reconductoring and capacity expansion work. The drivers are detailed in Attachment No. 13.

The network service rate effective June 1, 2021 is \$37,749 MW/Year reflecting 2020 actual costs plus 2021 forecasted plant additions, compared to a current rate of \$34,281 MW/Year which reflects 2019 actual costs plus 2020 forecasted plant additions. These changes are also shown in Attachment 13.

J. Changes to Inputs as a Result of Reconciliation

Section 1(g)(iii)(10) of the Protocols requires identification of any changes to the data inputs made as a result of the reconciliation mechanism set forth in Section 4 of the implementation protocols. Attachment No. 14 consists of formula worksheets showing 2020 inputs trued-up to actuals.

K. Changes in Accounting Policies, Practices and Procedures

Section 1(g)(iii)(10) of the Protocols requires a description of material changes, if any, in ComEd's accounting policies, practices and procedures from those in effect for the calendar year

⁷ ComEd updated the stated depreciation rates in FERC Docket No. ER19-876. *See* Letter Order, Docket No. ER19-876 (Mar. 14, 2019). As noted in the depreciation rate update filing, these depreciation rates are reflected for the first time in this annual update.

upon which the immediately preceding Annual Update was based that could or did affect the charges under the formula rate.

As described in its filing in FERC Docket No. ER20-379, ComEd has modified its reporting of Materials and Supplies amounts. ComEd proposed a modification to its formula rate to ensure proper rate recovery after that modification, and that modification was approved by the Commission.⁸ The Annual Update includes the modifications approved in Docket No. ER20-379.

As described above, ComEd reached an agreement relating to deferred tax issues in the ER19-5 Settlement, and that agreement is reflected in the Annual Update.

Otherwise, there were no material changes in ComEd's accounting policies, practices and procedures in 2020 that could or did affect the charges under the formula rate.

II. Conclusion

This Annual Update provides the information required by the implementation protocols contained in the Settlement Agreement approved by the Commission in Docket No. ER07-583-000 and now in effect under Attachment H-13B of the PJM OATT. The Protocols provide specific procedures for notice, requests for information, as well as review and challenge to the Annual Update. Consistent with the Letter Order accepting ComEd's 2009 Annual Update and establishing procedures for future filings, the 2021 Annual Update is being submitted for informational purposes only in Docket No. ER09-1145. As stated,

This letter also advises ComEd that annual updates in the forthcoming years should be submitted, for informational purposes only, in Docket No. ER09-1145-000. Upon receipt, the Commission will not act on or notice the informational filing because the formula rate implementation protocols provide specific procedures for notice, review, and challenges to the annual updates. ¹¹

Thank you for your attention to this matter.

Sincerely,

Chad Newhouse

Vice President, Regulatory Policy & Strategy

Notes

- A Electric portion only
- **B** Line 16, for the Reconciliation, includes New Transmission Plant that was actually placed in service weighted by the number Line 17 includes New Transmission Plant to be placed in servcie in the current calendar year that is not included in the PJM (time-weighted) as shown on Attachment 6.
- C Includes Transmission portion only. At each annual informational filing, Company will identify for each parcel of land an inte
- D Includes all EPRI Annual Membership Dues
- E Includes all Regulatory Commission Expenses
- F Includes Safety related advertising included in Account 930.1
- **G** Includes Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemize
- **H** CWIP can only be included if authorized by the Commission.
- I The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of
- **J** ROE will be supported in the original filing and no change in ROE will be made absent a filing at FERC.
 - PBOP expense is fixed until changed as the result of a filing at FERC.
 - Depreciation rates shown in Attachment 9 are fixed until changed as the result of a filing at FERC.
 - If book depreciation rates are different than the Attachment 9 rates, ComEd will provide workpapers at the annual update to depreciation expense and depreciation accruals to Form No. 1 amounts.
- K Education and outreach expenses relating to transmission, for example siting or billing
- L As provided for in Section 34.1 of the PJM OATT; the PJM established billing determinants will not be revised or updated in
- **M** Amount of transmission plant excluded from rates per Attachment 5.
- **N** Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Customers who have towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A.
 - Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmisison Owne

ATTACHMENT H-13A Page 6 of 24

- O Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 in Transmission O&M on Line 56. If they are booked to Acct 565, they are included on Line 59.
- **P** Securitization bonds may be included in the capital structure.
- Q Equity and debt ratios will be the ratios determined by the actual capital structure and the specified calculation processes of period May 1, 2007 through May 31, 2009 the formula produces an equity ratio exceeding 58.0%, the formulaic value at Line and the formulaic value at Line 117 shall be manually set to 42.0% less the percentage shown at Line 118.

 If, during the period June 1, 2009 through May 31, 2010, the formula produces an equity ratio exceeding 57.0%, the formula set to 57% and the value at Line 117 shall be manually set to 43.0% less the percentage shown at Line 118.
 - If, during the period June 1, 2010 through May 31, 2011, the formula produces an equity ratio exceeding 56.0%, the formula set to 56% and the value at Line 117 shall be manually set to 44.0% less the percentage shown at Line 118.
 - If, during any period following May 31, 2011, the formula produces an equity ratio exceeding 55.0%, the formulaic value at L and the formulaic value at Line 117 shall be manually set to 45.0% less the percentage shown at Line 118.

Note: ADIT associated with Gain or Loss on Reacquired Debt included in ADIT-283, Column A is excluded from rate base and instead included in Cost of Debt on Attachment H-13A, Line 111. A deferred tax (liability) should be reported as a positive balance and a deferred tax asset should be reported as a negative balance on Attachment H-13A, Line 111.

(6,052,353)

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B - F and each separate ADIT item will be listed, dissimilar items with amounts exceeding \$100,000 will be listed

(A) ADIT-190	(B) Total	(C) Gas, Production, Distribution, or	(D) Only Transmission	(E) Plant	(F) Labor	(G)
Accrued Holiday Pay Provision	(723,108)	Other Related	Related -	Related -	Related (723,108)	Accelerated tax deduction related to Holiday Pay. Underltying O&M expense related to all functions.
Accrued Vacation Pay Provision	9,597,440	_	_	_		Capitalized portion of vacation pay earned and expensed for books. Deductible for income tax purpoes
		11.050				when paid. Related to all functions.
Pending Litigation Reserve	14,253	14,253	-	-	•	Related to reserves associated with ongoing and/or pending litigation. These are not legal service fees, but accrual for possible liability payments upon resolution of ongoing litigation matters. For income tax purposes, these amounts are deductible when paid.
Charitable Contributions	-	-	-	-	-	For tax purposes, the charitable contribution deduction is limited to 10% of taxable income. If an amount cannot be deducted in a given year, the deduction can be carried forward and used when taxable income is available in the following 5 years.
Obsolete Materials - net change in provision	1,669,214	-	-	1,669,214	-	For book, expense taken when identified as obsolete; For tax, the expense is taken when actually disposed. Relates to all functions.
Provision for Bad Debt: Uncollectible Accounts Reserve	32,166,173	32,166,173	-	-	-	Retail bad debt. For book, expense taken as it's identified; tax deduction not taken until fully written-off and all collection efforts abandoned. Relates to retail operations.
Damage to Company Property Reserve	1,485,538	-	-	1,485,538	-	Book expense for damage as identified; tax deduction when fully written-off and all collection efforts abandoned. Relates to all functions.
Taxes Other Than Income Taxes	952,162	-	-	952,162	-	Property taxes. Book records on an accrual method based on the prior year; tax reverses the book accrual and deducts the actual payments made. Relates to all functions.
Incentive Compensation Plan	(0)	-	-	-	(0)	Book records an accrual in filing year on estimated payouts. For income tax purposes, the expense is
Liability For Severance Plans	614,429	-	-	-	614,429	deductible when paid. Relates to all functions. Book records an accrual. For income tax purposes, the severance accrual is deductible when paid.
CPS Energy Efficiency Fund - reserve change	492,558	492,558	-	-	-	Relates to all functions. Relates to agreement between ComEd and Chicago Public School to implement energy efficiency project funds. Book records based on an accrual; tax records when payment actually made. Relates to
Other Accrued Expenses	1,516,206	1,516,206	-	_		retail functions, thus non-jurisdictional. Book is recording accruals for other non-jurisdictional expenses.
Other Current	7,700,489	-	-	-		Relates to Accounts Payables. Book records the expense as known; tax records when paid out. Relates to all functions.
Partnerships	723,114	723,114	-	-		Investment in partnerships. Non-Utility.
Environmental Cleanup Costs - Non MGP (Mfg Gas Plants)	157,039	157,039	-	-	-	Reserves for remediation of Superfund sites. Reserves are not deductible for tax purposes. Not fixed and determinable. Book liability (taken to the expense on book), for taxes these are non-recognized until settled/paid. Superfund is reimbursed. Not related to wholesale operations.
Executive uninsured death benefits after retirement	866,331	-	-	-	866,331	Reserve is not tax deductible, expense for books, tax expensed when payments made. Related to all functions.
FAS 123R - Stock Options; Other Equity Based Compensation	1,922,811	-	-	-	1,922,811	Book expense recorded when stock is granted, tax expense when stock is issued at market price - employees in all functions.
Workers Compensation and Bodily Injury Reserve	25,278,356	-	-	-	25,278,356	These accounts are reserves for public claims, workers compensation and other third party incidents. For tax purposes these are not deductible until paid. Related to all functions.
Management Deferred Compensation Plan	9,083,976	-	-	-	9,083,976	Book records estimated accrued compensation; tax deducts only upon the retirement or other separation from service by the employees. Relates to all functions.
Manufactured Gas Plants - Provision	83,486,013	83,486,013	-	-	-	The MGP liability account is used to record the estimated remediation costs. The estimated remediation costs are not deductible for tax purposes. Associated expenses are run through Rider ECR. Not related to wholesale operations.
Merger Costs	1	1	-	-	-	Costs incurred with UNICOM merger (2001). Not related to wholesale operations.
Post Retirement Health Care Liability - Provision	50,664,917	50,664,917	-	-	-	Book accrues anticipated post retirement costs based on actuarial analysis. Tax deducts retirement benefits only when the amounts are paid or contributed to a fund. Related liability not deducted from
Supplemental management retirement plan	1,208,101	-	-	-	1,208,101	rate base. Book accrues anticipated Supplemental Management Retirement costs based on actuarial analysis. Tax deducts retirement benefits only when the amounts are paid. Related to employees in all functions.
Long Term Incentive Cash	32,267,344	-	-	-	32,267,344	Book expense recognized at the time of determination, not recognized for taxes until paid out. Related
Midwest Generation Settlement Asset	0	0	-	-	-	to employees in all functions. This settlement is a capacity reservation agreement guarantee in connection with the City of Chicago agreement. Book amortizes over the life of the franchise. Tax deducted when payments were made.
Accrued Interest	125,787	125,787	-	-	-	Generation related. Non jurisdictional. Accrued interest related to income tax refund claims.
Regulatory (Asset)/Liab: Transmission Rates Recovery	620,432	620,432	-	-	-	Reg asset established to recover transmission rate under/over recoveries. Deferred tax asset/liability will unwind as fluctuations are recovered or billed to the rate payers. The fluctuation is not included in taxable income.
Unamortized Investment Tax Credits - 190	344,054	-	-	344,054	-	Related to unamortized investment tax credit. Tax credit not yet recognized for book purposes thus creating a book/tax timing difference. The regulatory liability is not reflected in rate base therefore
Payroll Tax Deferral	8,201,543	8,201,543	-	-	-	neither is the deferred tax asset. Reflects tax adjustment required as a result of the deferral of employer payroll tax obligation pursuant to CARES Act.
Income Tax Regulatory Asset	(8,866,857)	(8,866,857)	-	-	-	Accumulated Deferred Income Taxes attributable to income tax related regulatory assets and liabilities. This balance is excluded from rate base.

Instructions for Account 283:

- 1. ADIT items related only to Non-Electric Operations (e.g., Gas, Water, Sewer), Production or Distribution Only are directly assigned to Column C
- 2. ADIT items related only to Transmission are directly assigned to Column D 3. ADIT items related to Plant and not in Columns C & D are included in Column E
- 4. ADIT items related to labor and not in Columns C & D are included in Column F
- 5. Deferred income taxes arise when items are included in taxable income in different periods than they are included in rates, therefore if the item giving rise to the ADIT is not included in the formula, the associated ADIT amount shall be excluded.

Instructions

- 1. For transmission allocated deficient / (excess) accumulated deferred income taxes (ADIT) related to rate change(s) to income tax rates occurring after September 30, 2018, insert new amortization table(s) that delineates the deficient and (excess) ADIT by category (i.e., protected property, unprotected property, and unprotected non-property).
- 2. Set the amortization period for unprotected property to the average remaining book life and unprotected non-property to 4 years. The amortization of deficient and excess ADIT designated as protected will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements.
- 3. Update applicable formulas in the "Total Federal Deficient / (Excess) Deferred Income Taxes" and "Total State Deficient / (Excess) Deferred Income Taxes" sections to ensure appropriate inclusion of deficient / (excess) ADIT balances related to rate changes occurring after September 30, 2018.
- 4. Insert note explaining the event giving rise to the deficient / (excess) ADIT including the start and end date for the amortization. The amortization ceases after the related regulatory asset / liability is drawn down to zero.

Notes

Commonwealth Edison Company Deficient / Excess Deferred Income Taxes Attachment 1B - Deficient / Excess Deferred Income Tax Amortization Worksheet

- Deficient and (excess) ADIT related to the Tax Cuts and Jobs Act of 2017 (TCJA) will be amortized beginning January 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments, amendments to income tax returns, or new IRS guidance. The amortization of protected property related deficient and (excess) ADIT will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements and may vary by year depending on where each underlying asset resides in its individual life cycle. The amortization of the underlying asset resides in its individual life cycle and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by December 31, 2021. Note The amortization formula in Column F will change based on where ComEd resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Tax Reform Act of 1986 will be amortized using the Average Rate Assumption Method (ARAM) as provided in the Settlement in Docket No. ER19-5 et al. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Illinois "Corporate Rate Increase of 2017" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The amortization of the unprotected property related deficient and (excess) ADIT will be calculated using the average remaining book life of the underlying assets giving rise to the balances and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected non-property related excess and deficient ADIT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) state related ADIT including related amortization is reported net of federal taxes. Note The amortization formula in Column F will change based on where ComEd resides in the amortization cycle. The current year amortization of excess and deficient deferred income taxes is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Illinois "Corporate Rate Increase of 2011" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The amortization of the unprotected property related deficient and (excess) ADIT will be calculated using the average remaining book life of the underlying assets giving rise to the balances and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected non-property related excess and deficient ADIT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) state related ADIT including related amortization is reported net of federal taxes. Note The amortization formula in Column F will change based on where ComEd resides in the amortization cycle. The current year amortization of excess and deficient deferred income taxes is recorded in FERC Accounts 410.1 and 411.1.

Instruction

1. In accordance with ASC 740, deferred tax assets and liabilities are adjusted (re-measured) for the effect of the changes in tax law (including tax rates) in the period that the change is enacted. Adjustments are recorded in the appropriate deferred income tax balance sheet accounts (Accounts 190, 281, 282 and 283) based on the nature of the temporary difference and the related classification requirements of the accounts. If as a result of action or expected action by a regulator, it is probable that the effect of a future increase or decrease in taxes payable resulting from a change in tax law or rates will be recovered from or passed through to customers through future rates, a regulatory asset or liability is recognized in Account 182.3 (Other Regulatory Assets), or Account 254 (Other Regulatory Liabilities), as appropriate, for that probable future revenue or reduction in future revenue. The amortization of deficient and excess deferred income taxes that will be recovered from or passed through to customers through future rates will be recorded in FERC Accounts 410.1 (Provision for Deferred Income Taxes, Utility Operating Income) and 411.1 (Provision for Deferred Income Taxes—Credit, Utility Operating Income), as appropriate. Re-measurements of deferred tax balance sheet accounts may also result in re-measurements of tax-related regulatory assets or liabilities that had been recorded prior to the change in tax law. If it is not probable that the effect of a future increase or decrease in taxes payable resulting from a change in tax law or rates will be recovered from or passed through to customers through future rates, tax expense will be recognized in Account 410.2 (Provision for Deferred Income Taxes, Other Income or Deductions) or tax benefit is recognized in Account 411.2 (Provision for Deferred Income Taxes-Credit, Other Income or Deductions), as appropriate.

2. For deficient and (excess) accumulated deferred income taxes (ADIT) related to change(s) to income tax rates occurring after September 30, 2018, insert calculations that support the re-measurement amount delineated by categroy (i.e., protected property, unprotected property, and unprotected non-property).

3. Set the allocation percentages equal to the applicable percentages at the date of the rate change.

Notes

A Categorization of items as protected or non-protected will remain as originally agreed, absent a change in guidance from the Internal Revenue Service (IRS) with respect to that items. Balances associated with the tax rate change will not be adjusted (except for amortization each year) absent audit adjustments, tax return amendments, or a change in IRS guidance. Any resulting changes will be prominently disclosed including the basis for the change.

B The allocation percentage in Column T are based on the applicable percentages at the date of the rate change and must remain fixed absent the Commission's express approval.

Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they shall not be included.
- B Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they shall not be included.
- C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator.
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above.
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year.

3 Transmission for Others (Note 3) 7,308,169

4 Schedule 1A 22,279,766

5 Net revenues associated with Network Integration Transmission Service (NITS) for which the load is not included in the divisor (difference between NITS credits from PJM and PJM NITS charges paid by Transmission Owner) (Note 3)

- 6 Point to Point Service revenues for which the load is not included in the divisor received by Transmission Owner
- 7 PJM Transitional Revenue Neutrality (Note 1)
- 8 PJM Transitional Market Expansion (Note 1)
- 9 Professional Services
- 10 Revenues from Directly Assigned Transmission Facility Charges (Note 2)
- 11 Rent or Attachment Fees associated with Transmission Facilities

12 Gross Revenue Credits (Sum Lines 1-11) \$ 43,617,982

- 13 Amount offset from Note 3 below
- 14 Total Account 454 and 456
- 15 Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula will be included as a revenue credit or included in the peak on line 174 of Appendix A.
- Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.

Note 3: If the facilities associated with the revenues are not included in the formula, the revenue is shown here, but not included in the total above and explained in the Cost Support. For example revenues associated with distribution facilities. In addition Revenues from Schedule 12 are not included in the total above to the extent they are credited under Schedule 12.

On the formulas used in the Columns for lines 22+ are as follows For Plant in service: (first year means first year the project is placed in service) For CWIP: "Beginning" is the investment on line 17 for the first year and is the "Ending" for the prior year after the first year

"Depreciation" is the annual depreciation in line 18 divided by twelve times the difference of thirteen minus line 19 in the first year and line 18 thereafter if "no" on line 1. Depreciation is not used

"Ending" is "Beginning" less "Depreciation"

Revenue is "Ending" times line 16 for the current year times the quotient line 19 divided by 13 plus "Depreciation" for the first year and "Ending" times line 16 plus "Dep Revenue is Ending times line 16 for the current year

Source: Docket ER14-1203-000

⁽¹⁾ ComEd applies a single composite depreciation rate to Transmission Plant. The composite rate is determined by calculating the weighted average rate of Accounts 350-359. Within five years of the effective date of the Settlement in Docket No ER19-5 et al, and at least every five years thereafter, ComEd will file an FPA Section 205 rate proceeding to revise its depreciation rates (unless the company has otherwise submitted an FPA Section 205 rate filing that addresses its depreciation rates in the prior five years).

ANNUAL REPORT OF ELECTRIC UTILITIES, LICENSEES AND/OR NATURAL GAS UTILITIES INSTRUCTIONS FOR FILING FORM 21 ILCC

GENERAL INFORMATION

I. PURPOSE:

This form is a regulatory support requirement (Public Utilities Act, Section 5-109). It is designed to collect financial and operational information from electric and gas utilities subject to the jurisdiction of the Illinois Commerce Commission.

II. WHO MUST SUBMIT:

All electric and gas utilities subject to the Illinois Commerce Commission jurisdiction.

III. WHAT, WHERE AND WHEN TO SUBMIT

i.Submit a completed and verified copy of Form 21 ILCC on or before MARCH 31 of the year following the year covered by this report (three hole punched but not bound) to:

ILLINOIS COMMERCE COMMISSION

527 East Capitol Avenue

Springfield, IL 62701

- ii.Submit immediately upon publication one copy of the submitted FERC Form Nos. 1 and/ or 2, if applicable, to the above address. The submitted copy should be three hole punched, but not bound.
- iii.Submit immediately upon publication one copy of the SEC 10-K Report, if applicable, to the above address. The submitted copy should be three hole punched.
- iv. Submit immediately upon publication one copy of the Annual Report to Stockholders. The submitted copy should be three hole punched.
- v.Submit an electronic file of Form 21 ILCC and electronic files or hyperlinks to the FERC Form 1, the SEC 10-K, and the Annual Report to Stockholders when submitted in hard copy to the Illinois Commerce Commission to fad@icc.illinois.gov.

IV. REGISTERED AGENT

<u>Exact Name of Registered Agent</u>: Verónica Gómez, Senior Vice President, Regulatory and Energy Policy and General Counsel, Commonwealth Edison Company

Street or Local Address: 440 South LaSalle Street, Suite 3300

City: Chicago State: Illinois Zip Code: 60605-1028

Telephone (312) 394-4997

ANNUAL REPORT OF ELECTRIC UTILITIES, LICENSEES AND/OR NATURAL GAS UTILITIES

GENERAL INSTRUCTIONS

- I. This form of annual report is prepared in conformity with the applicable Uniform System of Accounts and all of the accounting terminology used herein is in accordance therewith.
- II. Enter in whole numbers only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important.) The truncating of cents is allowed except on the four basic financial statements where rounding to dollars is required. The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts in the balances at the end of the current reporting year, and use for statement of income accounts the current year's amounts.
- III. Complete each question fully and accurately, even if it has been answered in a previous annual report. Enter the word "NONE" where it truly and completely states the fact.
- IV. The schedules within Form 21ILCC are classified as follows:

0 Series - General Corporate Schedules required by all utilities filing Form 21 ILCC

- 100 Series General Corporate Schedules required by gas only utilities not submitting FERC Form No. 2.
- 200 Series Balance Sheet Supporting Schedules required by gas utilities not submitting FERC Form No. 2.
- 300 Series Income Supporting Schedules required by gas utilities not submitting FERC Form No. 2.
- 500 Series Gas Plant Statistical Data required by gas utilities not submitting FERC Form No. 2.
- 600 Series Electric Data required by all electric utilities.
- 700 Series Gas Data required by all gas utilities.

Electric only utilities that submit FERC Form No. 1 to the Illinois Commerce Commission (ICC) must submit the following schedules: 0 Series and 600 Series.

Combination utilities (utilities that provide both electric and gas service in Illinois) that submit FERC Form No. 1 (but not FERC Form No. 2) to the ICC must submit the following schedules: 0 Series, 200 Series, 300 Series, 500 Series, 600 Series, and 700 Series.

Combination utilities (utilities that provide both electric and gas service in Illinois) that submit FERC Form Nos. 1 and 2 to the ICC must submit the following schedules: 0 Series, 600 Series and 700 Series.

Gas only utilities that submit FERC Form No. 2 to the ICC must submit the following schedules: 0 Series and 700 Series.

Gas only utilities that do not submit FERC Form No. 2 to the ICC must submit the following schedules: 0 Series, 100 Series, 200 Series, 300 Series, 500 Series and 700 Series

If a schedule within a series is not applicable to the respondent, enter the words "NOT APPLICABLE" on the particular page or omit the page and enter "N/A" or "NOT APPLICABLE" in the "Remarks" column on the List of Schedules on pages vi through x. If pages are deleted, indicate in the footer of the prior provided page number of the next subsequently provided page.

- V. It is preferred that all data be typed on the form. Entries of an opposite character (such as decreases reported in a column providing for both increases and decreases) should be enclosed in parentheses.
- VI. Enter the month, day and year for all dates. Use customary abbreviations. The "Date of Report" at the top of each page is applicable only to the resubmission (see VII below).
- VII. When making revisions, resubmit only those pages that have been changed from the original submission. Submit the same number of copies as required for filing the form. Include with the resubmission the Identification and Attestation page as the last page. Mail dated resubmission to:

ILLINOIS COMMERCE COMMISSION

527 East Capitol Avenue

Springfield, IL 62701

- VIII. Provide a supplemental statement further explaining accounts or pages as necessary. Attach the supplemental statement (8 1/2 x 11 inch size) to the page being supplemented. Provide the appropriate identification information, including the title(s) of the page and the page number supplemented.
- IX. Do not make references to reports of previous years or to other reports in lieu of required entries, except as specifically authorized. The annual report should in all particulars be complete in itself.
- X. Wherever (schedule) pages refer to figures from a previous year, the figures reported must be based upon those shown on the annual report of the previous year, or an appropriate explanation given as to why the different figures were used.
- XI. Respondents may submit computer printed schedules (reduced to 8 1/2 x 11) instead of the schedules herein if they are substantially the same format.
- XII. Where Illinois Commerce Commission authority is to be supplied, enter the applicable docket number.
- XIII. The word "respondent", whenever used in this report, means the person, corporation, licensee, agency, authority, or other legal entity or instrumentality in whose behalf the report is made.
- XIV. Because of the limited space afforded on some Form 21 ILCC schedules, dollar signs may be omitted where necessary. The rounding of numbers in thousands is permissible in cases where there is insufficient room for all digits. However, notations to this effect must be made in a conspicuous location on the page on which the rounding occurs.

STATEMENT OF RETAINED EARNINGS

Instructions:

- 1. Report all changes in appropriated retained earnings, unappropriated retained earnings, and unappropriated, undistributed subsidiary earnings for the year.
- 2. Each credit and debit during the year should be identified as to the retained earnings account in which recorded. Show the contra primary account affected in column (b).
- 3. State the purpose and amount of each reservation or appropriation of retained earnings.
- 4. List first account 439 Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items in that order.
- 5. Show dividends for each class and series of capital stock.
- 6. Show separately the State and Federal income tax effect of items in account 439, Adjustments to Retained Earnings.
- 7. Explain in a footnote the balance for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.

8. If any notes appearing in the report to stockholders are applicable to this statement, include them on pages 122-123.

Commonwealth Edison Company	(1) An Original	December 31, 2020

ILLINOIS ELECTRIC NET OPERATING REVENUES

- 1. Report the amounts derived from providing utility services in Illinois. Only revenues resulting from tariffed services are to be reported on lines 1 through 8.
- 2. In columns (b) and (c), Supply--Fixed Price Service and Supply--Hourly Priced Service, the revenues reported shall include all supply charges. Revenues from supply charges shall include revenues for the cost of energy, transmission charges, and any ancillary services.
- 3. In column (d), Delivery Charges--Full Service Customers, the revenues reported shall include the delivery service charges for full service customers. Full service customers are those customers receiving either Fixed Price Service or Hourly Priced Service from the utility.
 - In column (e), Delivery Charges-Delivery of RES Power, report delivery service charge revenues for the power that is delivered to customers and that is purchased from Retail Electric Suppliers.
- 5. If the actual amounts are not available, an estimate should be reported. If an estimate is reported, the fact should be footnoted and the supporting documents that show the derivation of the estimate should be sent to the Director of the Financial Analysis Division and the Director of the Energy Division of the Illinois Commerce Commission.
- 6. If the utility has used Account 456 to record revenues from the tariffed transmission of the utility's own electricity rather than limiting transmission revenues in Account 456 to only revenues from transmission of electricity of others over transmission facilities of the utility, report those revenues in the appropriate column on line 20.

Report supply charge revenues from the Power Purchase Option in Supply--Fixed Price Service or Supply--Hourly Priced Service, as appropriate, and in a footnote to this page.

If the utility has offered bundled service, report fixed price bundled service in column (b) and time of day and/or hourly priced bundled service in column (c). Additionally, note the reporting of bundled service amounts in a footnote.

All of the revenue effects (customer credits and generator reimbursements) of the 2007 Settlement Agreement shall be shown on lines 2 and 4 in the appropriate columns.

ILLINOIS MEGAWATT HOURS SOLD OR DELIVERED AND AVERAGE NUMBER OF ILLINOIS ELECTRIC CUSTOMERS PER MONTH

- 1. Report the megawatt hours sold or delivered from providing utility services in Illinois and the average number of electric customers per month. Information reported should correspond to information reported on page 8, Illinois Electric Operating Revenues for the reporting year.
- 2. If the actual amounts are not available, an estimate should be reported. If an estimate is reported, the fact should be footnoted and the supporting documents that show the derivation of the estimate should be sent to the Director of the Financial Analysis Division and the Director of the Energy Division of the Illinois Commerce Commission.
- 3. Report supply charge megawatt hours and average number of customers from the Power Purchase Option in Supply--Fixed Price Service or Supply--Hourly Priced Service, as appropriate, and in a footnote to this page.

A) Represents costs incurred in connection with a settlement agreement between ComEd and City of Chicago. ComEd has made a determination that it will not seek recovery of these operating expenses from Illinois retail customers, and as such, has recorded these expenses and applicable income taxes "below the line" in Account 426.5, Other Deductions and Account 409.2, Income Taxes Federal & Other, for ICC reporting purposes.

B) Represents costs incurred in connection with a settlement agreement between ComEd and the City of Chicago and Midwest Generation. ComEd has made a determination that it will not seek recovery of these operating expenses from Illinois retail customers, and as such, has recorded these expenses and applicable income taxes "below the line" in Account 426.5, Other Deduction and Account 409.2, Income Taxes Federal & Other, for ICC reporting purposes.

C) The ICC accounting treatment for these items is in accordance with 83 III. Adm. Code 415, Uniform System of Accounts for Electric Utilities, effective December 15, 1994.

LONG TERM DEBT (Accounts 221, 222, 223 and 224)

Instructions:

- 1. Report by balance sheet Account the particulars (details) concerning long-term debt included in Accounts 221- Bonds, 222- Reacquired Bonds, 223- Advances from Associated Companies, and 224- Other Long-Term Debt. If information to meet the stock exchange reporting requirement outlined in column (a) is available from the SEC 10-K Report Form filing, a specific reference to the report form (i.e. year and company title) may be reported in column (a) provided the fiscal years for both the 10-K report and this report are compatible.
- 2. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.
- 3. For advances from Associated Companies, report separately advances on notes and advances on open accounts.

Designate demand notes as such. Include in column (a) name of associated companies from which advances were received.

- For receivers' certificates, show in column (a) the name of the court and date of court order under which such certificates were issued.
- 5. In a supplemental statement, give explanatory particulars (details) for Accounts 223 and 224 of net changes during the year.

With respect to long-term advances, show for each company: (a) principal advanced during year, (b) interest added to principal amounts, and

Commonwealth Edison Company	(1) An Original	December 31, 2020					
LONG TERM DEBT (Accounts 221, 222, 223 and 224)							

Instructions:

- 6. If the respondent has pledged any of its long-term debt securities, give particulars (details) in a footnote, including name of the pledgee and purpose of the pledge.
- 7. If the respondent has any long-term securities which have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote.
- 8. If interest expense was incurred during the year on any obligation retired or reacquired before end of year, include interest expense in column (g). Explain in a footnote any difference between the total of column (g) and the total Account 427, Interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.

Give particulars (details) concerning any long-term debt authorized by a regulatory commission but not yet issued.

In column (b) show the principal amount of bonds or other long -term debt originally issued.

11. In column (i) provide redemption price in % or per \$100 of face amount outstanding. If the respondent has provided information required in column (i) in a document filed pursuant to Article 6 of the Illinois Public Utilities Act, respondent may reference that document in a footnote in lieu of providing the information here.

UNAMORTIZED DEBT EXPENSE, PREMIUM & DISCOUNT ON LONG-TERM DEBT

(Accounts 181, 225, 226) (continued)

Instructions:

5. Furnish in a footnote particulars (details) regarding the treatment of Unamortized debt expenses, premiums or discounts associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

- 6. Identify separately undisposed amounts applicable to issues that were redeemed in prior years.
- 7. Explain any debits and credits other than amortization debited to Account 428- Amortization of Debt

Discount and Expenses, or credited to Account 429 - Amortization of Premium on Debt - Credit.

SECURITIES ISSUED OR ASSUMED AND SECURITIES REFUNDED OR RETIRED DURING THE YEAR

- Furnish a supplemental statement giving a brief description of security financing and refinancing transactions during the year and the accounting for the securities, discounts, premiums, expenses, and related gains or losses. Identify as to Commission authorization numbers and dates.
- 2. Furnish particulars (details) showing fully the accounting for the total principal amount, par value, or stated value of each class and series of security issued, assumed, retired, or refunded and the accounting for premiums, discounts, expenses, and gains or losses relating to the securities. Set forth the facts of the accounting clearly with regard to redemption premiums, unamortized discounts, expenses, and gains or losses relating to the securities retired or refunded, including the accounting for such amounts carried in the respondent's accounts at the date of the refunding or refinancing transactions with respect to securities previously refunded or retired.
- 3. Include in the identification of each class and series of security, as appropriate, the interest or dividend rate, nominal date of issuance, maturity date, aggregate principal amount, par value or stated value, and number of shares. Give also the issuance of redemption price and name of the principal underwriting firm through which the security transactions were consummated.
- 4. Where the accounting for the amounts relating to securities refunded or retired is other than that specified in General Instruction 17 of the Uniform System of Accounts, give references to the Commission authorization for the different accounting and state the accounting method.
- 5. For securities assumed, give the name of the company for which the liability on the securities was assumed as well as particulars (details) of the transactions whereby the respondent undertook to pay obligations of another company. If any unamortized discount, premiums, expenses, and gains or

losses were taken over onto the respondent's books, furnish details of these amounts with amounts relating to refunding securities clearly earmarked.

INVESTMENTS (Accounts 123, 124, 136) (continued)

Instructions:

Each note should be listed giving date of issuance, maturity date, and specifying whether note is a renewal.

Designate any advances due from officers, directors, stockholders, or employees. Exclude amounts reported on page 229, of FERC Form 1.

For any securities, notes or accounts that were pledged, designate with an asterisk such

securities, notes or accounts and in a footnote state the name of pledges and purpose of the pledge.

If Commission approval was required for any advances made or securities acquired, designate

such fact in a footnote and give name of Commission, date of authorization, and case or docket number.

 $Report\ in\ column\ (g)\ interest\ and\ dividend\ revenues\ from\ investments\ including\ such\ revenues\ from\ securities\ disposed\ of\ during\ the\ year.$

Instructions:

- 1. The data on number of employees should be reported for the payroll period ending nearest to October 31, or any payroll period ending 60 days before or after October 31.
- 2. If the respondent's payroll for the reported period includes any special construction forces, include such employees as part-time and temporary employees and show the number of such special construction employees so included.
- 3. The number of employees assignable to each department from joint functions of combination utilities may be determined by estimate, based on employee equivalents. Show the estimated number of equivalent employees attributed to each department from joint functions.
- 4. If respondent furnishes two or more kinds of utility service, general officers, executive and other employees not assignable to any particular department are to be reported in column (h). No employee is to be included more than once.

Commonwealth Edison Company	(1) An Original	Yr.)	December 31, 2020

Instructions:

Instructions:

1. Report the information specified below for all charges made during the year included in any account (including plant accounts) for outside consultative and other professional services. (These services include rate, management, construction, engineering, research, financial, valuation, legal, accounting, purchasing, advertising, labor relations, and public relations, rendered for the respondent under written or oral arrangement, for which aggregate payments were made during the year to any corporation, partnerships organization of any kind, or individual (other than for services as an employee or for payments made for medical and related services) amounting to more than \$50,000 for utilities with operating revenues of \$25,000,000 or less and more than \$250,000 for utilities with operating revenues of more than \$25,000,000, including payments for legislative services, except those which should be reported in Account 425.4 Expenditure for Certain Civic, Political and Related Activities.

- Name and Address of person or organization rendering services. (a)
- (b) Description of services received during year and project or case to which services relate.
- (c)
- (d) Total charges for the year, detailing utility department and account charged.
- For any services that are of a continuing nature, give the date and term of contract and date of Commission authorization, if contract received Commission approval.

3. Designate with an asterisk associated companies.

Instructions:

1. Report the information specified below for all charges made during the year included in any account (including plant accounts) for outside consultative and other professional services. (These services include rate, management, construction, engineering, research, financial, valuation, legal, accounting, purchasing, advertising, labor relations, and public relations, rendered for the respondent under written or oral arrangement, for which aggregate payments were made during the year to any corporation, partnerships organization of any kind, or individual (other than for services as an employee or for payments made for medical and related services) amounting to more than \$50,000 for utilities with operating revenues of \$25,000,000 or less and more than \$250,000 for utilities with operating revenues of more than \$25,000,000, including payments for legislative services, except those which should be reported in Account 425.4 Expenditure for Certain Civic, Political and Related Activities.

- Name and Address of person or organization rendering services.
- (b) Description of services received during year and project or case to which services relate.
- (c)
- (d) Total charges for the year, detailing utility department and account charged.
- For any services that are of a continuing nature, give the date and term of contract and date of Commission authorization, if contract received Commission approval.

Designate with an asterisk associated companies.

GENERAL DESCRIPTION OF CONSTRUCTION OVERHEAD PROCEDURE

Instructions:

- 1. For each construction overhead explain: (a) the nature and extent of work, etc., the overhead charges are intended to cover, (b) the general procedure for determining the amount capitalized, (c) the method of distribution to construction jobs, (d) whether different rates are applied to different types of construction, (e) basis of differentiation in rates for different types of construction, and (f) whether the overhead is directly or indirectly assigned.
- 2. Show below the computation of allowances for funds used during construction rates, in accordance with the provisions of Gas Plant Instructions 3(17) of the Uniform System of Accounts.
- 3. Where a net-of-tax rate for borrowed funds is used, show the appropriate tax effect adjustment to the computations below in a manner that clearly indicates the amount of reduction in the gross rate for tax effect.

See Pages 44a, 44b and 44c for a General Description of Construction Overhead Procedure and the Computation of the Quarterly Allowance for Funds Used During Construction Rate.

COMPUTATION OF ALLOWANCES FOR FUNDS USED DURING CONSTRUCTION RATES

- 1. For line 1(5), column (d) below, enter the rate granted in the last rate proceeding. If such is not available, use the average rate earned during the preceding three years.
- 2. Identify, in a footnote, the specific entity used as the source for the capital structure figures.
- 3. Indicate, in a footnote, if the reported rate of return is one that has been approved in a rate case, black-box settlement rate, or an actual three-year average rate.
- 1. Components of Formula (Derived from actual book balances and actual cost rates):

Line No.	Title (a)	Amount (b)	Capitalization Ratio (Percent) (c)	Cost Rate Percentage (d)
1	Average Short-Term Debt	S		
2	Short Term Interest			s
3	Long-Term Debt	D		d
4	Preferred Stock	Р		р
5	Common Equity	С		С
6	Total Capitalization			
7	Average Construction Work in Progress Balance	W		

- 2. Gross Rates for Borrowed Funds = s(S/W)+d(D/(D+P+C))(1-S/W)
- 3. Rate for Other Funds = [1-S/W][p(P/(D+P+C))+c(C/(D+P+C))]

Weighted Average Rate Actually Used for the Year:

Rate for Borrowed Funds -

Rate for Other Funds -

Page 44, Item 1, Line No. 5, column (d) - The Common Equity Cost Rate Percentage used in the computations on pages 44b and 44c reflects the cost of common equity allowed in the ICC Order per Docket No. 19-0387.

Name of Respondent This Report Is: Date of Report (Mo./Da./Yr.) Year of Report

Commonwealth Edison Company (1) An Original December 31, 2020

GENERAL DESCRIPTION OF CONSTRUCTION OVERHEAD PROCEDURE

Engineering

The salaries and expenses of engineers whose time can be directly assigned to specific projects are directly recorded to applicable capital projects. The salaries and expenses of engineers performing strategic services, system expansion and other safeguards to aid in system reliability not directly assigned are allocated to capital projects on the basis of direct labor costs and contract labor costs.

Certain Administrative, Legal and Injuries and Damages Costs

An analysis is made of certain administrative and general costs, legal costs and injuries and damages costs, including certain affiliated service company costs, to determine the portions of such costs accumulated in operation and maintenance expense accounts, which are applicable to construction. Amounts applicable to construction are charged to an overhead project and distributed to construction based on total costs of construction projects each month.

Workmen's Compensation, Incentive Compensation, Stock Compensation, Pensions, Employee Benefits and Payroll Taxes

The costs of workmen's compensation, incentive compensation, stock compensation, pensions, employee benefits and payroll taxes are accumulated in clearing accounts and projects provided for that purpose. The costs are allocated to construction projects on the basis of direct labor costs.

Supervision and Other Operations' Support Costs Includable in Direct Construction Costs and Information Systems Costs

The salaries and expenses of employees whose time can be directly assigned to specific projects are directly recorded as direct construction costs. The salaries and expenses of certain department heads, other supervisory employees, other operations' support employees and certain information systems costs are allocated to construction projects on the basis of direct labor costs and contract labor costs.

Illinois Use Tax

Illinois Use Tax is added to the cost of materials purchased and thus is expensed or capitalized in accordance with the accounting for the associated materials

Allowance for Funds Used During Construction (AFUDC)

The computation of an annual AFUDC rate has been approved by the Chief Accountant of the Federal Energy Regulatory Commission. However, ComEd made quarterly computations during the year 2020. The rates used in 2020 are presented on pages 44b and 44c. The allowance is compounded semi-annually and is applied to construction expenditures for projects having a construction period exceeding 30 days and amounting to more than \$25,000. The computation period begins with the commencement of construction and ends with the in-service date. AFUDC is charged to specific overhead projects and distributed to construction based on direct charges to construction projects each month.

Capitalized Interest

ComEd uses Accounting Standards Certification No. 835, "Capitalization of Interest Costs," to calculate the costs during construction of debt funds used to finance its non-regulated construction projects.

Name of Respondent This Report Is: Date of Report (Mo./Da./Yr.) Year of Report

Commonwealth Edison Company (1) An Original December 31, 2020

COMPUTATION OF QUARTERLY ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION RATES

First Quarter 2020

Title	Amount (in \$000)	Capitalization Ratio	Cost Rate
Average Short-term Debt	217,741		
Short-Term Interest			2.00 %
Long-Term Debt	8,757,648	45.06 %	4.26 %
Preferred Stock			
Common Equity	10,675,900	54.94 %	8.91 %
Total Capitalization	19,433,548	100.00 %	
Average CWIP Balance	765,411		
Gross Rate for Borrowed Funds		1.94%	
Rate for Other Funds		3.50%	
Weighted Average Rate Actually Used for the Quarter			
Rate for Borrowed Funds		1.94%	Note 1
Rate for Other Funds		3.50%	

Second Quarter 2020

Title	Amount (in \$000)	Capitalization Ratio	Cost Rate
Average Short-term Debt	_		
Short-Term Interest			0.00 %
Long-Term Debt	9,784,786	47.15 %	3.88 %
Preferred Stock			
Common Equity	10,968,292	52.85 %	8.91 %
Total Capitalization	20,753,078	100.00 %	
Average CWIP Balance	777,584		
Gross Rate for Borrowed Funds		1.83%	
Rate for Other Funds		4.71%	
Weighted Average Rate Actually Used for the Quarter			
Rate for Borrowed Funds		1.83%	Note 1
Rate for Other Funds		4.71%	

Note 1 According to the FERC guidelines defining the components of the cost of construction, the formula to determine the proportion of costs from varying funding sources (Equity Capital, Long-Term Debt & Short-term debt) derives rates from funding sources other than STD by first allocating the portion attributable to STD. The calculation fundamentally first assigns short-term borrowing to capital investment. Using that premise, in situations where short-term borrowings exceed invested capital (CWIP), 100% of the AFUDC rate will be comprised of the estimated short-term borrowing rate for the calculation period. This treatment is also consistent with an ICC ruling that specifically states this position.

Name of Respondent This Report Is: Date of Report (Mo./Da./Yr.) Year of Report

Commonwealth Edison Company (1) An Original December 31, 2020

COMPUTATION OF QUARTERLY ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION RATES

Third Quarter 2020

Title	Amount (in \$000)	Capitalization Ratio	Cost Rate
Average Short-term Debt	203,915		
Short-Term Interest			0.43 %
Long-Term Debt	9,784,786	47.00 %	3.87 %
Preferred Stock			
Common Equity	11,032,124	53.00 %	8.91 %
Total Capitalization	20,816,910	100.00 %	
Average CWIP Balance	870,276		
Gross Rate for Borrowed Funds		1.49%	
Rate for Other Funds		3.62%	
Weighted Average Rate Actually Used for the Quarter			
Rate for Borrowed Funds		1.49%	Note 1
Rate for Other Funds		3.62%	

Fourth Quarter 2020

Title	Amount (in \$000)	Capitalization Ratio	Cost Rate
Average Short-term Debt	310,332		
Short-Term Interest			0.24 %
Long-Term Debt	9,284,786	44.74 %	3.95 %
Preferred Stock			
Common Equity	11,467,987	55.26 %	8.91 %
Total Capitalization	20,752,773	100.00 %	
Average CWIP Balance	967,428		
Gross Rate for Borrowed Funds		1.28%	
Rate for Other Funds		3.34%	
Weighted Average Rate Actually Used for the Quarter			
Rate for Borrowed Funds		1.28%	Note 1
Rate for Other Funds		3.34%	

Note 1 According to the FERC guidelines defining the components of the cost of construction, the formula to determine the proportion of costs from varying funding sources (Equity Capital, Long-Term Debt & Short-term debt) derives rates from funding sources other than STD by first allocating the portion attributable to STD. The calculation fundamentally first assigns short-term borrowing to capital investment. Using that premise, in situations where short-term borrowings exceed invested capital (CWIP), 100% of the AFUDC rate will be comprised of the estimated short-term borrowing rate for the calculation period. This treatment is also consistent with an ICC ruling that specifically states this position.

2020 Exelon Business Services Company Service Areas & Cost Assignment Methods

Exelon Business Services Company, LLC (BSC) provides services to the Exelon system of companies. For discussion purposes, BSC is divided into three groups: 1) core shared services, 2) utility focused services, and 3) corporate governance. The following are descriptions of the service areas and the cost assignment methods applied when billing the services.

The discussion below summarizes the cost assignment methods which generally require direct billing of services to the extent possible, then allocation based on cost causative allocation methods of costs that cannot be directly assigned.

1) CORE SHARED SERVICES AREAS

The Core Shared Services Areas provide a variety of shared support and management services for the Exelon system of companies. These shared services include Information Technology, Supply, Legal Services, Human Resources, Transportation and Real Estate.

Information Technology

Energy Delivery Solutions, GenCo Solutions, Projects & Enterprise Solutions. Provides
application support to the business units and centrally manages enterprise-wide applications
and business unit specific projects.

Cost Assignment:

- Costs for information technology applications which are specific to one Client Company are directly charged to the respective Client Company.
- Costs for information technology applications which benefit all or more than one Client Company are allocated to the respective Client Companies based on an appropriate cost causative allocation methodology, which varies from project to project.
- <u>Cloud and Infrastructure Engineering and Operations.</u> Manages the enterprise IT infrastructure, provides infrastructure services, and ensures a safe and stable operating environment.

Cost Assignment:

- Service costs are directly charged to IT Application Portfolios on a unit price basis for services such as mainframe, email, voicemail, LAN, etc. IT Application Portfolio costs are directly charged to Client Companies when specific to one Client Company. IT Application Portfolio costs that benefit more than one Client Company are allocated based on an appropriate cost causative allocation methodology.
- <u>IT Governance.</u> Comprises an IT Program Management Office and Business Office focused on establishing standard processes, procedures and methods and Enterprise Architecture and Planning responsible for comprehensive enterprise strategic planning and architecture standards and assurance.

Cost Assignment:

 Service costs are allocated to Client Companies based on an IT Service Billings ratio of each Client Company or an appropriate cost causative allocation methodology.

Security

Includes the costs of providing Corporate and Information Security services for the Client Companies (formerly part of IT Governance)

- Corporate Security and Analysis. Provides security policy development and alignment with
 policies and strategic initiatives; Intelligence gathering and analytical services across the
 corporation to include threat / risk assessments and recommendations.
- <u>Information Security.</u> Develop, maintain and enforce a security strategy, policy and standards framework that aligns Exelon business need, legislative and regulatory requirements, and industry standard practices.

Cost Assignment

- Costs for Corporate and Information Security services which are specific to one Client Company are directly charged to the respective Client Company.
- Service costs are allocated to Client Companies based on an IT Service Billings ratio
 of each Client Company or an appropriate cost causative allocation methodology
 which varies by service.

Supply

Includes the costs of providing services related to the supply function for the Client Companies. Does not include costs of the materials/services purchased under the Purchase Orders/ Contracts established by BSC Supply Services group or the purchase or sale of power.

- <u>Strategic Sourcing.</u> Manages the sourcing of categories across Exelon, drives total cost of ownership, and manages supplier relationships.
- <u>Supply Operations.</u> Provides tactical support to business unit operations, including logistics and warehousing for Exelon Generation. Embedded Supply employees perform these services for the Utilities.
- <u>Supply Support.</u> Comprises e-business functions, supply projects, and diversity initiatives, as well as policies, programs, systems and decision support systems.

Cost Assignment:

- Whenever possible, service costs are directly charged to Client Companies.
- Remaining service costs are allocated to Client Companies based on various expenditure-spend methodologies (generally, the services and/or materials purchased by each Client Company).
- <u>Accounts Payable.</u> Processes invoices and administers the P-Card (purchasing-card) program.

Cost Assignment:

 Accounts payable service costs are directly charged to Client Companies on a unit price based on transactions processed for each Client Company.

Legal Services

 <u>Corporate & Commercial</u>. Provides legal support for commercial contract negotiations, acquisitions, intellectual property, strategy, securities, financial reporting, real estate, nuclear related issues, bankruptcy, credit and collections, environmental, general corporate, and other transactional matters.

- <u>Environmental</u>. Provides legal support for the defense of agency enforcement actions, compliance counseling, environmental matters relevant to permitting and re-licensing of generation facilities, support for safety and OSHA compliance, EHS compliance audits and NRC investigations.
- <u>Labor & Employment.</u> Represents Exelon's Client Companies in a wide range of employment related matters before agencies, arbitrators, and state and federal courts; provides advice and counsel on all labor and employment related matters.
- <u>Litigation</u>. Provides legal support for all forms of disputes, including breach of contract, commercial disputes, personal injury, and property damage.
- <u>Regulatory.</u> Represents Exelon's Client Companies before various regulatory agencies, including the Illinois Commerce Commission, the Pennsylvania Public Utility Commission, Maryland Public Service Commission, New Jersey Board of Public Utilities, Delaware Public Service Commission, Public Service Commission of the District of Columbia and the Federal Energy Regulatory Commission.
- <u>Client Services.</u> Comprised of the business functions of the Legal Department, including financial management, client billing, business planning and analysis, human resources, systems management, and general administration.

Cost Assignment:

Costs for lawyers and paralegals are directly charged to Client Companies when
possible and the remaining services are allocated on the Modified Massachusetts
Formula, an average of each Client Company's Gross Revenues, Total Assets and
Direct Labor to the totals of all Client Companies.

Human Resources

Human Resources is divided into two groups - (i) General HR activities, including support functions such as diversity, planning and development, employee health and benefits, compensation planning, management and employee development; HR planning, technology and metrics for HR field units; worker's compensation administration; benefits administration services; payroll processing; myHR Service Center Support, HR/Payroll system maintenance and HR process improvement support and metric reporting; (ii) Labor Relations, including development and management of labor relations strategy in support of business units with represented employees.

Cost Assignment:

- Whenever possible, service costs are directly charged to Client Companies.
- Most general Human Resources Activities costs are directly charged to Client Companies on a unit price basis based on the total employee headcount of each Client Company. Payroll processing costs are directly charged to Client Companies on a unit price based on paycheck counts of each Client Company.
- Labor Relations costs are directly charged to Client Companies on a unit price basis based on the headcount of represented employees of each Client Company or direct charged based on time and materials.

Transportation

<u>Transportation.</u> Coordinates corporate aircraft services.

Cost Assignment:

 Service costs are directly charged to Client Companies on a unit price based on total occupied flight hours of each Client Company.

Real Estate

Includes real estate portfolio and asset management strategy, lease administration for facilities, land or infrastructure obligations, property management, mail services and other real estate consulting services, generally concentrating on non-utility and non-power plant operations.

Cost Assignment for the above mentioned area:

Service costs are allocated to Client Companies based on occupied square footage.

2) EXELON UTILITIES AREA

Exelon Utilities is comprised of a small utility-focused corporate governance and oversight function that will facilitate collaboration among the utilities to achieve the highest standards of organizational effectiveness, operational excellence, financial discipline and efficiency, and customer and stakeholder satisfaction.

Utility Planning & Performance includes oversight and coordination of the business planning process, benchmarking and surveys, performance indicators, utility-wide performance and process improvement initiatives, financial reports, Exelon quarterly management meeting coordination, reporting for Utility Board of Directors and the Energy Delivery Oversight Committee of the Exelon Board of Directors, synergy tracking and reporting, regulatory policy and issues alignment, cost management initiatives, and SLA/ALA coordination.

Utility Oversight includes governance and oversight of a Peer Group structure that aligns across the client utilities to drive consistency, best practices and innovation in the core functions of the Management Model; tracks performance regarding key performance indicators, improvement initiatives and industry standards; analyzes opportunities and develops recommendations on issues pertinent to leadership; and provides oversight of Management Model documentation integration across the Utilities.

Cost Assignment for the above mentioned groups:

- Whenever possible, service costs are directly charged to specific utility companies.
- The remaining corporate governance costs that cannot be directly charged are allocated
 to the Utilities based on a utility variation of the Modified Massachusetts Formula, an
 average of each utility's Gross Revenues, Total Assets and Direct Labor to the totals of all
 utility companies.

Transmission Strategy & Compliance manages the Exelon Utilities' interface with the applicable regional transmission and reliability organizations, manages the NERC Reliability Standard Compliance program to ensure ongoing compliance with NERC Standards, represents utilities' interests and implements corporate strategy in both PJM Regional Transmission Organization and Regional Reliability Organization stakeholder proceedings, and also includes oversight of GAS DOT compliance.

Cost Assignment:

- Whenever possible, service costs are directly charged to specific utility companies.
- Remaining service costs that benefit participating utilities are allocated for transmission related activities based on transmission peak load allocation, or allocated based on total gas delivered for Gas DOT compliance activities.

3) CORPORATE GOVERNANCE AREAS

The Corporate Governance Areas house employees who provide corporate governance services for the Exelon system of companies. The Corporate Governance Areas in BSC include:

<u>Finance.</u> Includes Senior Executive Vice President and CFO Exelon, Finance, Treasury (cash management services, facility and commitment fees, letter of credit fees, and bank service fees), Controller, External Audit fees, Tax (consolidated Federal and state returns), Financial Planning and Analysis, Internal Audit and Financial Controls (Sarbanes-Oxley compliance), Risk Management, Investor Relations, Capital Markets, Insurance Services, and External Reporting.

<u>Executives and General BSC Activities.</u> Includes Exelon senior leadership positions including President and Chief Executive Officer and other Executive Committee members. Also includes general activities, such as income and other taxes, severance and interest, and Board of Directors costs and shareholder meetings.

Communications, Public Advocacy and Corporate Relations. Includes Exelon Corporation advertising/brand management, donations/contributions, sponsorships and annual report creation, shareholder/investor external communications, and other communication services; as well as Client Company public advocacy, advertising, coordination of donations/contribution approval, corporate/ media relations, and corporate and external communications; public affairs activities; internal communications; and photography, videography and video production services.

Governmental and Regulatory Affairs and Public Policy. Includes executive oversight; management services for compliance with Federal laws, regulations and other policy requirements including relationship management with Congress, Administration and regulators; strategy development and lobbying and advocacy related to Federal legislative and regulatory initiatives; wholesale market development activities; competition initiative activities; PAC administration and operation; grassroots activities; and Federal public affairs activities.

<u>Legal Governance.</u> Includes General Counsel, Corporate Strategy, and the Corporate Governance group (including the corporation's compliance and ethics program and Corporate Secretary and shareholder services).

<u>Corporate Development.</u> Includes strategic expertise and governance in the evaluation and execution of merger and acquisition opportunities, evaluating company assets for divestiture opportunities, and providing financial and transactional support to restructuring projects.

<u>Corporate Transmission Analysis & Development.</u> Reports to Corporate Development and includes a transmission projects evaluation and development group. (Service costs are direct charged to the Exelon Transmission Company and related transmission projects).

Physical Security. Includes corporate security functions such as security investigations and assessments, crisis management response and security related training.

<u>Investments.</u> Includes determining the investment strategy and asset allocation of Exelon's pension funds, VEBA post retirement funds and nuclear decommissioning funds, managing relationships with investment managers, overseeing daily investment activities and maintaining a well-diversified investment menu for the Employee Savings Plans. (Certain Investments Area costs are reimbursable by and therefore billed directly to the applicable funds and plans).

Cost Assignment for the Corporate Governance Areas:

Whenever possible, service costs are directly charged to Client Companies.

The remaining corporate governance costs that cannot be directly charged are allocated to Client Companies based on the Modified Massachusetts Formula, an average of each Client Company's Gross Revenues, Total Assets and Direct Labor to the totals of all Client Companies.

ACCUMULATED PROVISIONS FOR UNCOLLECTIBLE ACCOUNTS RECEIVABLE

- This page is required for utilities that have implemented an automatic adjustment clause tariff for uncollectibles under Sections 16-111.8 or 19-145 of the Public Utilities Act.
- 2. Report below the specified information called for in this schedule. Electric and gas information shall be separately
- In the comments section, provide an explanation or calculation of how the Illinois-jurisdictional amounts are derived. If the Accumulated Provision for Uncollectible Accounts Receivable is not used to record the Write-offs (Col. D) and Recoveries (Col. E), state so and provide the relevant Write-off and Recoveries data by ICC Account.
- 5. The information may be reported in more detail if direct cost data is available.

Line No.	Description	Balance at Beginning of Year	Reserve Accrual	Write-offs	Recoveries	Adjustments	Balance at End of Year
	(A)	(B)	(C)	(D)	(E)	(F)	(G)
1	Total Electric	79,586,206	53,957,374	27,787,120	l	12,299,007	118,055,467
2	Total Gas					-	_
3	Total	79,586,206	53,957,374	27,787,120		12,299,007	118,055,467

Explanation of how Illinois-jurisdictional amounts are derived: 100% Jurisdictional.

ELECTRIC PLANT ACQUISITION ADJUSTMENTS AND ACCUMULATED PROVISION FOR AMORTIZATION OF ELECTRIC PLANT ACQUISITION ADJUSTMENTS (Accounts 114,115)

- Report the balances at beginning and end of year and changes during the year for Account 114, Electric Plant Acquisition Adjustments, and Account 115, Accumulated Provision for Amortization of Electric Plant Acquisition Adjustments. Explain each debit and credit during the year, give reference to any Commission orders or other authorizations concerning such 1.
- 2. amounts, and show contra accounts debited or credited.
- For acquisition adjustments arising during the year, state the name of the company from which the property was acquired, date of transaction, and date journal entries clearing Account 102, Electric Plant Purchased or Sold, were accepted for filing by the Commission. Credits to Account 114 and debits to Account 115 should be enclosed in parentheses.
- In the blank space at the bottom of the schedule explain the plan of disposition of acquisition adjustments. Give also, date the Commission authorized use of Account 115, Accumulated Provision for Amortization of Electric Plant Acquisition Adjustments.

FRANCHISE REQUIREMENTS (Account 927) (Electric)

- 1. Report below cash payments of \$2,500 or more to municipal or other governmental authorities, and the cost of electricity, materials, supplies, and other items furnished to such authorities during the year without reimbursement in compliance with franchise, ordinance, or similar requirements. For amounts less than \$2,500 the payments may be grouped provided the number of payments so grouped is shown.
- 2. Give the basis of amounts entered in column (c) for electricity supplied without charge.

CONSTRUCTION OVERHEADS - Electric

- List in column (a) the kinds of overheads according to the titles used by the respondent. Charges for outside
 professional services for engineering fees and management or supervision fees and management or supervision fees
 capitalized should be shown as separate items.
- 2. On page 44 furnish information concerning construction overheads.
- 3. A respondent should not report "none" to this page if no overhead apportionments are made, but rather should explain on page 44 the accounting procedures employed and the amounts of engineering, supervision and administrative costs, etc., which are directly charged to construction.
- 4. Enter on this page engineering, supervision, administrative, and allowance for funds used during construction, etc., which are first assigned to a blanket work order and then prorated to construction jobs.

ELECTRIC DISTRIBUTION METERS AND LINE TRANSFORMERS

- 1. Report below the information called for concerning distribution watt-hour meters and line transformers.
- 2. Include watt-hour demand distribution meters, but not external demand meters.
- 3. Show in a footnote the number of distribution watt-hour meters or line transformers held by the respondent under lease from others, jointly owned with others, or held otherwise than by reason of sole ownership by the respondent. If 500 or more meters or line transformers are held under a lease, give name of lessor, date and period of lease, and annual rent. If 500 or more meters or line transformers are held other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of accounting for expenses between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

ENVIRONMENTAL PROTECTION FACILITIES

- 1. For purposes of this response, environmental protection facilities shall be defined as any building, structure, equipment, facility, or improvement designed and constructed solely for control, reduction, prevention or abatement of discharges or releases into the environment of gaseous, liquid, or solid substances, heat, noise or for the control, reduction, prevention, or abatement of any other adverse impact of an activity on
- 2 Report the differences in cost of facilities installed for environmental considerations over the cost of alternative facilities which would otherwise be used without environmental considerations. Use the best engineering design achievable without environmental restrictions as the basis for determining costs without environmental considerations. It is not intended that special design studies be made for purposes of this response. Base the response on the best engineering judgment where direct comparisons are not available. Include in these differences in costs, the costs or estimated costs of environmental protection facilities in service constructed or modified in connection with the production, transmission, and distribution of electrical energy and shall be reported herein for all such environmental facilities placed in service on or after January 1, 1969, so long as it is readily determinable that such facilities were constructed or modified for environmental rather than operational purposes. Also report similar expenditures for environmental plant included in construction work in progress. Estimate the cost of facilities when the original cost is not available or facilities are jointly owned with another utility, provided the respondent explains the basis of such estimations. Examples of these costs would include a portion of the cost of tall smokestacks, underground lines, and landscaped substations. Explain such costs in a footnote.
- In the cost of facilities reported on this page, include an estimated portion of the cost of plant that is or will be used to provide power to operate 3 associated environmental protection facilities. These costs may be estimations on a percentage of plant
- 4. Report all costs under the major classifications provided below and include, as a minimum, the items listed hereunder:

Air pollution control facilities:

- (1) Scrubbers, precipitators, tall smokestacks, etc.
- (2) Changes necessary to accommodate use of environmentally clean fuels such as low ash or low sulfur fuels including storage and handling equipment.
 - Monitoring equipment
 - (4) Other
- В Water pollution control facilities:
 - (1) Cooling towers, ponds, piping, pumps, etc.
 - Waste water treatment equipment
 - (2) (3) Sanitary waste disposal equipment
 - Oil interceptors
 - (4) (5) Sediment control facilities
 - (6)Monitoring equipment
 - (7)Other.
- Solid Waste disposal costs:
 - (1) Ash handling and disposal equipment
 - Land
 - (2) (3) Settling Ponds
 - (4) Other.
- D. Noise Abatement Equipment:
- (1)Structures
 - (2) Mufflers
 - (3) (4) (5) Sound proofing equipment
 - Monitoring equipment
- Other
- E. Esthetic Costs:
 - Architectural costs (2) Towers
 - Underground lines
 - (3) (4) (5) Landscaping
 - Other
- Additional plant capacity necessary due to restricted output from existing facilities or addition of pollution control facilities.
- Miscellaneous:
 - Preparation of environmental reports
 - (2) Fish and wildlife plants included in Accounts 330, 331, 332, and 335.
 - (3) Parks and related facilities
 - Other.
- 5. In those instances when costs are composites of both actual supportable costs and estimates of costs, specify in column (f) the actual costs that are included in column (e)
- 6. Report construction work in progress relating to environmental facilities at line 9.

Name of Respondent	This Report Is:	Date of Report (Mo./Da./Yr.)	Year of Report					
Commonwealth Edison Company	(1) An Original		December 31, 2020					
ENVIRONMENTAL PROTECTION EXPENSES								

Instructions:

Show below expenses incurred in connection with the use of environmental protection facilities, the cost of which are reported on page. 430. Where it is necessary that allocations and/or estimates of costs be made, state the basis or method used.

Include below the costs incurred due to the operation of environmental protection equipment, facilities, and programs. Report expenses under the subheadings listed below.

Under item 6 report the difference in cost between environmentally clean fuels and the alternative fuels that would otherwise be used and are available for use.

Under item 7 include the cost of replacement power, purchased or generated, to compensate for the deficiency in output from existing plants due to the addition of pollution control equipment, use of alternate environmentally preferable fuels or environmental regulations of governmental bodies. Base the price of replacement power purchased on the average system price of purchased power if the actual cost of such replacement power is not known. Price internally generated replacement power at the system average cost of power generated if the actual cost of specific replacement generation is not known.

Under item 8 include ad valorem and other taxes assessed directly on or directly relatable to environmental facilities.

Also include under item 8 licensing and similar fees on such facilities.

In those instances where expenses are composed of both actual supportable data and estimates of costs, specify in column (c) the actual expenses that are included in column (b).

Notes:

(1) Transmission portion calculated using allocator on Attachment 11.

12.73987%

- (2) All miscellaneous service revenues are assigned 100% to Distribution & Customer due to the nature of the product/service.
- (3) Represents income from 3rd party fees for lease applications. Allocated based on direct assignment of rental income from property leases to the plant account identification of leased properties.
- (4) Fees from "interval data request services" special meter readings.

Notes

- A Electric portion only
- **B** Line 16, for the Reconciliation, includes New Transmission Plant that was actually placed in service weighted by the number Line 17 includes New Transmission Plant to be placed in servcie in the current calendar year that is not included in the PJM (time-weighted) as shown on Attachment 6.
- C Includes Transmission portion only. At each annual informational filing, Company will identify for each parcel of land an inte
- D Includes all EPRI Annual Membership Dues
- E Includes all Regulatory Commission Expenses
- F Includes Safety related advertising included in Account 930.1
- **G** Includes Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemize
- **H** CWIP can only be included if authorized by the Commission.
- I The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility includes taxes in more than one state, it must explain in Attachment 5 the name of
- **J** ROE will be supported in the original filing and no change in ROE will be made absent a filing at FERC.
 - PBOP expense is fixed until changed as the result of a filing at FERC.
 - Depreciation rates shown in Attachment 9 are fixed until changed as the result of a filing at FERC.
 - If book depreciation rates are different than the Attachment 9 rates, ComEd will provide workpapers at the annual update to depreciation expense and depreciation accruals to Form No. 1 amounts.
- K Education and outreach expenses relating to transmission, for example siting or billing
- L As provided for in Section 34.1 of the PJM OATT; the PJM established billing determinants will not be revised or updated in
- **M** Amount of transmission plant excluded from rates per Attachment 5.
- **N** Outstanding Network Credits is the balance of Network Facilities Upgrades Credits due Transmission Customers who have towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A.
 - Interest on the Network Credits as booked each year is added to the revenue requirement to make the Transmisison Owne

ATTACHMENT H-13A Page 6 of 24

- O Payments made under Schedule 12 of the PJM OATT that are not directly assessed to load in the Zone under Schedule 12 in Transmission O&M on Line 56. If they are booked to Acct 565, they are included on Line 59.
- **P** Securitization bonds may be included in the capital structure.
- Q Equity and debt ratios will be the ratios determined by the actual capital structure and the specified calculation processes of period May 1, 2007 through May 31, 2009 the formula produces an equity ratio exceeding 58.0%, the formulaic value at Line and the formulaic value at Line 117 shall be manually set to 42.0% less the percentage shown at Line 118.

 If, during the period June 1, 2009 through May 31, 2010, the formula produces an equity ratio exceeding 57.0%, the formula set to 57% and the value at Line 117 shall be manually set to 43.0% less the percentage shown at Line 118.
 - If, during the period June 1, 2010 through May 31, 2011, the formula produces an equity ratio exceeding 56.0%, the formula set to 56% and the value at Line 117 shall be manually set to 44.0% less the percentage shown at Line 118.
 - If, during any period following May 31, 2011, the formula produces an equity ratio exceeding 55.0%, the formulaic value at L and the formulaic value at Line 117 shall be manually set to 45.0% less the percentage shown at Line 118.

Line	Description	Total					

Note: ADIT associated with Gain or Loss on Reacquired Debt included in ADIT-283, Column A is excluded from rate base and instead included in Cost of Debt on Attachment H-13A, Line 111. A deferred tax (liability) should be reported as a positive balance and a deferred tax asset should be reported as a negative balance on Attachment H-13A, Line 111.

(6,052,353)

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B - F and each separate ADIT item will be listed, dissimilar items with amounts exceeding \$100,000 will be listed separately.

(A) ADIT-190	(B) Total	(C) Gas, Production, Distribution, or	(D) Only Transmission	(E) Plant	(F) Labor	(G)
Accrued Holiday Pay Provision	(723,108)	Other Related	Related -	Related -	Related (723,108)	Accelerated tax deduction related to Holiday Pay. Underltying O&M expense related to all functions.
Accrued Vacation Pay Provision	9,597,440	-	-	-	9,597,440	Capitalized portion of vacation pay earned and expensed for books. Deductible for income tax purpoes
Pending Litigation Reserve	14,253	14,253	-	-	-	when paid. Related to all functions. Related to reserves associated with ongoing and/or pending litigation. These are not legal service fees,
Charitable Contributions	-	-	-	-	-	but accrual for possible liability payments upon resolution of ongoing litigation matters. For income tax purposes, these amounts are deductible when paid. For tax purposes, the charitable contribution deduction is limited to 10% of taxable income. If an
						amount cannot be deducted in a given year, the deduction can be carried forward and used when taxable income is available in the following 5 years.
Obsolete Materials - net change in provision	1,669,214	-	-	1,669,214		For book, expense taken when identified as obsolete; For tax, the expense is taken when actually disposed. Relates to all functions.
Provision for Bad Debt: Uncollectible Accounts Reserve	32,166,173	32,166,173	-	-		Retail bad debt. For book, expense taken as it's identified; tax deduction not taken until fully written-off and all collection efforts abandoned. Relates to retail operations.
Damage to Company Property Reserve	1,485,538	-	-	1,485,538		Book expense for damage as identified; tax deduction when fully written-off and all collection efforts abandoned. Relates to all functions.
Taxes Other Than Income Taxes	952,162	-	-	952,162	-	Property taxes. Book records on an accrual method based on the prior year; tax reverses the book accrual and deducts the actual payments made Relates to all functions.
Incentive Compensation Plan	(0)	-	-	-	(0)	Book records an accrual in filing year on estimated payouts. For income tax purposes, the expense is deductible when paid. Relates to all functions.
Liability For Severance Plans	614,429	-	-	-	614,429	Book records an accrual. For income tax purposes, the severance accrual is deductible when paid. Relates to all functions.
CPS Energy Efficiency Fund - reserve change	492,558	492,558	-	-	-	Relates to agreement between ComEd and Chicago Public School to implement energy efficiency project funds. Book records based on an accrual; tax records when payment actually made. Relates to retail functions, thus non-jurisdictional.
Other Accrued Expenses Other Current	1,516,206 7,700,489	1,516,206	-	-		Book is recording accruals for other non-jurisdictional expenses. Relates to Accounts Payables. Book records the expense as known; tax records when paid out. Relates
Partnerships	723,114	723,114	-	-		to all functions. Investment in partnerships. Non-Utility.
Environmental Cleanup Costs - Non MGP (Mfg Gas Plants)	157,039	157,039	-	-		Reserves for remediation of Superfund sites. Reserves are not deductible for tax purposes. Not fixed and determinable. Book liability (taken to the expense on book), for taxes these are non-recognized until
Executive uninsured death benefits after retirement	866,331	-	-	-	866,331	settled/paid. Superfund is reimbursed. Not related to wholesale operations. Reserve is not tax deductible, expense for books, tax expensed when payments made. Related to all
FAS 123R - Stock Options; Other Equity Based Compensation	1,922,811	-	-	-	1,922,811	functions. Book expense recorded when stock is granted, tax expense when stock is issued at market price -
Workers Compensation and Bodily Injury Reserve	25,278,356	-	-	-	25,278,356	employees in all functions. These accounts are reserves for public claims, workers compensation and other third party incidents.
Management Deferred Compensation Plan	9,083,976	-	-	-	9,083,976	For tax purposes these are not deductible until paid. Related to all functions. Book records estimated accrued compensation; tax deducts only upon the retirement or other
Manufactured Gas Plants - Provision	83,486,013	83,486,013	-	-	-	separation from service by the employees. Relates to all functions. The MGP liability account is used to record the estimated remediation costs. The estimated
						remediation costs are not deductible for tax purposes. Associated expenses are run through Rider ECR. Not related to wholesale operations.
Merger Costs	1	1	-	-	-	Costs incurred with UNICOM merger (2001). Not related to wholesale operations.
Post Retirement Health Care Liability - Provision	50,664,917	50,664,917	-	-	-	Book accrues anticipated post retirement costs based on actuarial analysis. Tax deducts retirement benefits only when the amounts are paid or contributed to a fund. Related liability not deducted from rate base.
Supplemental management retirement plan	1,208,101	-	-	-	1,208,101	Book accrues anticipated Supplemental Management Retirement costs based on actuarial analysis. Tax deducts retirement benefits only when the amounts are paid. Related to employees in all functions.
Long Term Incentive Cash	32,267,344	-	-	-	32,267,344	Book expense recognized at the time of determination, not recognized for taxes until paid out. Related to employees in all functions.
Midwest Generation Settlement Asset	0	0	-	-	-	This settlement is a capacity reservation agreement guarantee in connection with the City of Chicago agreement. Book amortizes over the life of the franchise. Tax deducted when payments were made. Generation related. Non jurisdictional.
Accrued Interest	125,787	125,787	-	-	-	Accrued interest related to income tax refund claims.
Regulatory (Asset)/Liab: Transmission Rates Recovery	620,432	620,432	-	-	-	Reg asset established to recover transmission rate under/over recoveries. Deferred tax asset/liability will unwind as fluctuations are recovered or billed to the rate payers. The fluctuation is not included in taxable income.
Unamortized Investment Tax Credits - 190	344,054	-	-	344,054	-	Related to unamortized investment tax credit. Tax credit not yet recognized for book purposes thus creating a book/tax timing difference. The regulatory liability is not reflected in rate base therefore neither is the deferred tax asset.
Payroll Tax Deferral	8,201,543	8,201,543	-	-	-	Reflects tax adjustment required as a result of the deferral of employer payroll tax obligation pursuant to CARES Act.
Income Tax Regulatory Asset	(8,866,857)	(8,866,857)	-	-	-	Accumulated Deferred Income Taxes attributable to income tax related regulatory assets and liabilities. This balance is excluded from rate base.
Subtotal: ADIT-190 (FERC Form)	261,568,315	169,301,178	-	4,450,967	87,816,170

Instructions for Account 283:

- 1. ADIT items related only to Non-Electric Operations (e.g., Gas, Water, Sewer), Production or Distribution Only are directly assigned to Column C
- 2. ADIT items related only to Transmission are directly assigned to Column D
- 3. ADIT items related to Plant and not in Columns C & D are included in Column E 4. ADIT items related to labor and not in Columns C & D are included in Column F
- 5. Deferred income taxes arise when items are included in taxable income in different periods than they are included in rates, therefore if the item giving rise to the ADIT is not included in the formula, the associated ADIT amount shall be excluded.

Instructions

- 1. For transmission allocated deficient / (excess) accumulated deferred income taxes (ADIT) related to rate change(s) to income tax rates occurring after September 30, 2018, insert new amortization table(s) that delineates the deficient and (excess) ADIT by category (i.e., protected property, unprotected property, and unprotected non-property).
- 2. Set the amortization period for unprotected property to the average remaining book life and unprotected non-property to 4 years. The amortization of deficient and excess ADIT designated as protected will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements.
- 3. Update applicable formulas in the "Total Federal Deficient / (Excess) Deferred Income Taxes" and "Total State Deficient / (Excess) Deferred Income Taxes" sections to ensure appropriate inclusion of deficient / (excess) ADIT balances related to rate changes occurring after September 30, 2018.
- 4. Insert note explaining the event giving rise to the deficient / (excess) ADIT including the start and end date for the amortization. The amortization ceases after the related regulatory asset / liability is drawn down to zero.

Notes

- Deficient and (excess) ADIT related to the Tax Cuts and Jobs Act of 2017 (TCJA) will be amortized beginning January 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments, amendments to income tax returns, or new IRS guidance. The amortization of protected property related deficient and (excess) ADIT will be calculated using the Average Rate Assumption Method (ARAM) or a manner that complies with the normalization requirements and may vary by year depending on where each underlying asset resides in its individual life cycle. The amortization of the underlying asset resides in its individual life cycle and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected non-property related deficient and (excess) ADIT will be fully amortized by December 31, 2021. Note The amortization formula in Column F will change based on where ComEd resides in the amortization cycle. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Tax Reform Act of 1986 will be amortized using the Average Rate Assumption Method (ARAM) as provided in the Settlement in Docket No. ER19-5 et al. The current year amortization of deficient and (excess) ADIT is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Illinois "Corporate Rate Increase of 2017" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The amortization of the unprotected property related deficient and (excess) ADIT will be calculated using the average remaining book life of the underlying assets giving rise to the balances and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected non-property related excess and deficient ADIT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) state related ADIT including related amortization is reported net of federal taxes. Note The amortization formula in Column F will change based on where ComEd resides in the amortization cycle. The current year amortization of excess and deficient deferred income taxes is recorded in FERC Accounts 410.1 and 411.1.
- The remaining unamortized deficient and (excess) ADIT related to the Illinois "Corporate Rate Increase of 2011" as of September 30, 2018 will be amortized beginning October 1, 2018 based on the prescribed amortization periods as provided in the Settlement in Docket No. ER19-5 et al. The amortization periods for unprotected property and unprotected non-property related deficient and (excess) ADIT are fixed and cannot be changed without the Commission's express approval except, balances and categorizations may be changed if required by audit adjustments or tax return amendments. The amortization of the unprotected property related deficient and (excess) ADIT will be calculated using the average remaining book life of the underlying assets giving rise to the balances and may vary by year depending on where each underlying asset resides in its individual life cycle. The unprotected non-property related excess and deficient ADIT will be fully amortized by September 30, 2022. The unamortized deficient and (excess) state related ADIT including related amortization is reported net of federal taxes. Note The amortization formula in Column F will change based on where ComEd resides in the amortization cycle. The current year amortization of excess and deficient deferred income taxes is recorded in FERC Accounts 410.1 and 411.1.

Instruction

1. In accordance with ASC 740, deferred tax assets and liabilities are adjusted (re-measured) for the effect of the changes in tax law (including tax rates) in the period that the change is enacted. Adjustments are recorded in the appropriate deferred income tax balance sheet accounts (Accounts 190, 281, 282 and 283) based on the nature of the temporary difference and the related classification requirements of the accounts. If as a result of action or expected action by a regulator, it is probable that the effect of a future increase or decrease in taxes payable resulting from a change in tax law or rates will be recovered from or passed through to customers through future rates, a regulatory asset or liability is recognized in Account 182.3 (Other Regulatory Assets), or Account 254 (Other Regulatory Liabilities), as appropriate, for that probable future revenue or reduction in future revenue. The amortization of deficient and excess deferred income taxes that will be recovered from or passed through to customers through future rates will be recorded in FERC Accounts 410.1 (Provision for Deferred Income Taxes, Utility Operating Income) and 411.1 (Provision for Deferred Income Taxes—Credit, Utility Operating Income), as appropriate. Re-measurements of deferred tax balance sheet accounts may also result in re-measurements of tax-related regulatory assets or liabilities that had been recorded prior to the change in tax law. If it is not probable that the effect of a future increase or decrease in taxes payable resulting from a change in tax law or rates will be recovered from or passed through to customers through future rates, tax expense will be recognized in Account 410.2 (Provision for Deferred Income Taxes-Credit, Other Income or Deductions), as appropriate.

2. For deficient and (excess) accumulated deferred income taxes (ADIT) related to change(s) to income tax rates occurring after September 30, 2018, insert calculations that support the re-measurement amount delineated by categroy (i.e., protected property, unprotected property, and unprotected non-property).

3. Set the allocation percentages equal to the applicable percentages at the date of the rate change.

Notes

A Categorization of items as protected or non-protected will remain as originally agreed, absent a change in guidance from the Internal Revenue Service (IRS) with respect to that items. Balances associated with the tax rate change will not be adjusted (except for amortization each year) absent audit adjustments, tax return amendments, or a change in IRS guidance. Any resulting changes will be prominently disclosed including the basis for the change.

B The allocation percentage in Column T are based on the applicable percentages at the date of the rate change and must remain fixed absent the Commission's express approval.

Criteria for Allocation:

- A Other taxes that are incurred through ownership of plant including transmission plant will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail they shall not be included.
- B Other taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail they shall not be included.
- C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator.
- D Other taxes except as provided for in A, B and C above, that are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated as in footnote B above.
- E Excludes prior period adjustments in the first year of the formula's operation and reconciliation for the first year.

Account 456 - Other Electric Revenues (Note 1)

3 Transmission for Others (Note 3) 7,308,169

4 Schedule 1A 22,279,766

5 Net revenues associated with Network Integration Transmission Service (NITS) for which the load is not included in the divisor (difference between NITS credits from PJM and PJM NITS charges paid by Transmission Owner) (Note 3)

- 6 Point to Point Service revenues for which the load is not included in the divisor received by Transmission Owner
- 7 PJM Transitional Revenue Neutrality (Note 1)
- 8 PJM Transitional Market Expansion (Note 1)
- 9 Professional Services
- 10 Revenues from Directly Assigned Transmission Facility Charges (Note 2)
- 11 Rent or Attachment Fees associated with Transmission Facilities

12 Gross Revenue Credits (Sum Lines 1-11) \$ 43,617,982

- 13 Amount offset from Note 3 below
- 14 Total Account 454 and 456
- 15 Note 1: All revenues related to transmission that are received as a transmission owner (i.e., not received as a LSE), for which the cost of the service is recovered under this formula, except as specifically provided for elsewhere in this Attachment or elsewhere in the formula will be included as a revenue credit or included in the peak on line 174 of Appendix A.
- Note 2: If the costs associated with the Directly Assigned Transmission Facility Charges are included in the Rates, the associated revenues are included in the Rates. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in the Rates, the associated revenues are not included in the Rates.

Note 3: If the facilities associated with the revenues are not included in the formula, the revenue is shown here, but not included in the total above and explained in the Cost Support. For example revenues associated with distribution facilities. In addition Revenues from Schedule 12 are not included in the total above to the extent they are credited under Schedule 12.

On the formulas used in the Columns for lines 22+ are as follows

For Plant in service: (first year means first year the project is placed in service)

"Beginning" is the investment on line 17 for the first year and is the "Ending" for the prior year after the first year

"Depreciation" is the annual depreciation in line 18 divided by twelve times the difference of thirteen minus line 19 in the first year and line 18 thereafter if "no" on line 10 Depreciation is not used

"Ending" is "Beginning" less "Depreciation"

Revenue is "Ending" times line 16 for the current year times the quotient line 19 divided by 13 plus "Depreciation" for the first year and "Ending" times line 16 plus "Dep Revenue is Ending times line 16 for the current year

Source: Docket ER14-1203-000

⁽¹⁾ ComEd applies a single composite depreciation rate to Transmission Plant. The composite rate is determined by calculating the weighted average rate of Accounts 350-359. Within five years of the effective date of the Settlement in Docket No ER19-5 et al, and at least every five years thereafter, ComEd will file an FPA Section 205 rate proceeding to revise its depreciation rates (unless the company has otherwise submitted an FPA Section 205 rate filing that addresses its depreciation rates in the prior five years).

Footnotes

¹Incurred AFUDC Equity per the general ledger by year.

²Balances agree to adjustments to incurred AFUDC Equity .

³Represents AFUDC Equity incurred by year.

⁴Based on the applicable plant related transmission allocator by year.

 $^{^5\}mbox{Balances}$ represent the incurred AFUDC Equity allocated to transmission.

⁶Balances represent the in-service AFUDC equity per the fixed asset system.
